

CONTENTS

Discrete Optimization

- 1 A global optimization algorithm for reliable network design
J. Desai and S. Sen
- 9 Complete solution to a conjecture on Randić index
X. Li, B. Liu and J. Liu
- 14 Variable neighbourhood search for bandwidth reduction
N. Mladenovic, D. Urošević, D. Pérez-Brito and C.G. García-González
- 28 A branch and cut algorithm for the hierarchical network design problem
C. Obreque, M. Donoso, G. Gutiérrez and V. Marianov
- 36 A branch and bound algorithm for the maximum diversity problem
R. Martí, M. Gallego and A. Duarte
- 45 K-PPM: A new exact method to solve multi-objective combinatorial optimization problems
C. Dhaenens, J. Lemesre and E.G. Talbi

26008 - 519LB005

Production, Manufacturing and Logistics

- 54 Multi-item inventory control with full truckloads: A comparison of aggregate and individual order triggering
G.P. Kiesmüller
- 63 A hybrid fuzzy integral decision-making model for locating manufacturing centers in China: A case study
C.-M. Feng, P.-J. Wu and K.-C. Chia
- 74 A stochastic programming approach for planning horizons of infinite horizon capacity planning problems
K. Huang and S. Ahmed
- 85 A disjunctive graph model and framework for constructing new train schedules
R.L. Burdett and E. Kozan
- 99 Incorporating one-way substitution policy into the newsboy problem with imprecise customer demand
P. Dutta and D. Chakraborty
- 111 Product availability in competitive and cooperative dual-channel distribution with stock-out based substitution
W.K. Chiang
- 127 Sensitivity analysis with finite changes: An application to modified EOQ models
E. Borgonovo
- 139 Column generation approaches to ship scheduling with flexible cargo sizes
G. Brønmo, B. Nygreen and J. Lysgaard

Stochastics and Statistics

- 151 Analysing head coach dismissals in the German "Bundesliga" with a mixed logit approach
B. Frick, C.P. Barros and J. Prinz
- 160 Calculation of minimal capacity vectors through k minimal paths under budget and time constraints
Y.-K. Lin
- 170 Optimal selection of obsolescence mitigation strategies using a restless bandit model
U. Dinesh Kumar and H. Saranga

Decision Support

- 181 On expected utility for financial insurance portfolios with stochastic dependencies
E.-M. Ortega and L.F. Escudero
- 187 Particle swarm with equilibrium strategy of selection for multi-objective optimization
Y. Wang and Y. Yang
- 198 PROMETHEE: A comprehensive literature review on methodologies and applications
M. Behzadian, R.B. Kazemzadeh, A. Albadvi and M. Aghdasi

Continued on last page of this issue

Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

Innovative Applications of O.R.

- 216 Introducing regulation in the measurement of efficiency, with an application to the Canadian air carriers industry
P. Ouellette, P. Petit, L.-P. Tessier-Parent and S. Vigeant
- 227 Price competition with integrated and decentralized supply chains
E.J. Anderson and Y. Bao
- 235 Adaptive Tabu Search for course timetabling
Z. Lü and J.-K. Hao
- 245 A robust optimization approach to wine grape harvesting scheduling
C. Bohle, S. Maturana and J. Vera
- 253 An entropy-based measurement of working time flexibility
J. Olivella, A. Corominas and R. Pastor
- 261 Post-objective determination of weights of the evaluation factors in public procurement tenders
P.L. Lorentziadis
- 268 Decision model and analysis for investment interest expense deduction and allocation
Z.-H. Lee, S. Deng, B. Lin and J.G.S. Yang

Interfaces with Other Disciplines

- 281 Promoting symmetric weight selection in data envelopment analysis: A penalty function approach
S. Dimitrov and W. Sutton
- 289 Duality, efficiency computations and interpretations in imprecise DEA
K.S. Park
- 297 A semi-oriented radial measure for measuring the efficiency of decision making units with negative data, using DEA
A. Emrouznejad, A.L. Anouze and E. Thanassoulis

Short Communications

- 305 Complexity and approximability of scheduling resumable proportionally deteriorating jobs
S. Gawiejnowicz and A. Kononov
- 309 A note on flow shop scheduling problems with deteriorating jobs on no-idle dominant machines
L. Sun, L. Sun, K. Cui and J.-B. Wang
- 312 Dynamic mean-variance portfolio selection with borrowing constraint
C. Fu, A. Lari-Lavassani and X. Li
- 320 Directional distance functions and slacks-based measures of efficiency
R. Färe and S. Grosskopf
