

CONTENTS

Invited Review

- 1 The hybrid flow shop scheduling problem
R. Ruiz and J.A. Vázquez-Rodríguez

Discrete Optimization

- 19 Two-stage stochastic matching and spanning tree problems: Polynomial instances and approximation
B. Escoffier, L. Gouvêas, J. Monnot and O. Spanjaard
- 31 A hybrid rank-based evolutionary algorithm applied to multi-mode resource-constrained project scheduling problem
S. Elloumi and P. Fortemps
- 42 Generalized linear fractional programming under interval uncertainty
M. Hladík

Production, Manufacturing and Logistics

- 47 Integrated inventory models considering the two-level trade credit policy and a price-negotiation scheme
L.-H. Chen and F.-S. Kang
- 59 The pyramidal capacitated vehicle routing problem
J. Lysgaard
- 65 A fuzzy linear programming based approach for tactical supply chain planning in an uncertainty environment
D. Peidro, J. Mula, M. Jiménez and M. del Mar Botella
- 81 Balancing stochastic two-sided assembly lines: A chance-constrained, piecewise-linear, mixed integer program and a simulated annealing algorithm
U. Özcan
- 98 An efficient tabu algorithm for the single row facility layout problem
H. Samarghandi and K. Eshghi
- 106 Distributions of rectilinear deviation distance to visit a facility
M. Miyagawa
- 113 Price and lead time decisions in dual-channel supply chains
G. Hua, S. Wang and T.C.E. Cheng
- 127 Using MSRP to enhance the ability of rebates to control distribution channels
S. Yang, C.L. Munson and B. Chen

Stochastics and Statistics

- 136 Optimization designs and performance comparison of two CUSUM schemes for monitoring process shifts in mean and variance
Z. Wu, M. Yang, M.B.C. Khoo and F.-J. Yu
- 151 Robust strategies for natural gas procurement
T. Aouam, R. Rardin and J. Abrache
- 159 Pricing surplus server capacity for mean waiting time sensitive customers
S.K. Sinha, N. Rangaraj and N. Hemachandra
- 172 Neural network metamodeling for cycle time-throughput profiles in manufacturing
F. Yang

Decision Support

- 186 Multivariate optimisation for procurement of emergency services equipment – Teams of the best or the best of teams?
C.J. Woodruff
- 195 Do forecasts expressed as prediction intervals improve production planning decisions?
P. Goodwin, D. Önköl and M. Thomson

Continued on last page of this issue

Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

- 202 Fuzzy decision-making method based on the weighted correlation coefficient under intuitionistic fuzzy environment
J. Ye

Innovative Applications of O.R.

- 205 A multi-objective multi-period stochastic programming model for public debt management
E. Balıbek and M. Köksalan
- 218 An ensemble method using credal decision trees
J. Abellán and A.R. Masegosa
- 227 What drives value creation in investment projects? An application of sensitivity analysis to project finance transactions
E. Borgonovo, S. Gatti and L. Peccati

ScienceDirect
