

CONTENTS

Invited Review

- 237 Architecture of manufacturing scheduling systems: Literature review and an integrated proposal
J.M. Framinan and R. Ruiz

Continuous Optimization

- 247 Second-order multiobjective symmetric duality with cone constraints
T.R. Gulati, H. Saini and S.K. Gupta
- 253 Necessary optimality conditions for nonsmooth generalized semi-infinite programming problems
N. Kanzi and S. Nobakhtian
- 262 Weak sharp minima for set-valued vector variational inequalities with an application
J. Li, N.J. Huang and X.Q. Yang

Discrete Optimization

- 273 Cutting plane algorithms for 0-1 programming based on cardinality cuts
O. Oguz
- 280 Due dates assignment and JIT scheduling with equal-size jobs
N. Huynh Tuong and A. Soukhal
- 290 An electromagnetism metaheuristic for the unicost set covering problem
Z. Naji-Azimi, P. Toth and L. Galli

Production, Manufacturing and Logistics

- 301 On competitive sequential location in a network with a decreasing demand intensity
D. Granot, F. Granot and T. Raviv
- 313 Inventory management of multiple items with irregular demand: A case study
G. Nenes, S. Panagiotidou and G. Tagaras
- 325 A search method for optimal control of a flow shop system of traditional machines
O. Selvi and K. Gokbayrak
- 332 Two-stage cooperation model with input freely distributed among the stages
Y. Zha and L. Liang
- 339 Supply chain coordination with insurance contract
Z. Lin, C. Cai and B. Xu
- 346 A water flow-like algorithm for manufacturing cell formation problems
T.-H. Wu, S.-H. Chung and C.-C. Chang

Stochastics and Statistics

- 361 Efficient estimation of large portfolio loss probabilities in *t*-copula models
J.C.C. Chan and D.P. Kroese
- 368 Optimally maintaining a Markovian deteriorating system with limited imperfect repairs
M. Kurt and J.P. Kharoufeh
- 381 Approximate analysis of load-dependent generally distributed queuing networks with low service time variability
B.Y. Ekren and S.S. Heragu

Decision Support

- 390 A parallel multiple reference point approach for multi-objective optimization
J.R. Figueira, A. Liefooghe, E.-G. Talbi and A.P. Wierzbicki
- 401 A linear implementation of PACMAN
S. Angilella, A. Giarlotta and F. Lamantia
- 412 A revenue management model for products with two capacity dimensions
B. Xiao and W. Yang

Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

Innovative Applications of O.R.

- 422 The drivers of citations in management science journals
J. Mingers and F. Xu
- 431 Efficiency in the Greek insurance industry
C.P. Barros, M. Nektarios and A. Assaf
- 437 Free trial or no free trial: Optimal software product design with network effects
H.K. Cheng and Q.C. Tang
- 448 Cost allocation in collaborative forest transportation
M. Frisk, M. Göthe-Lundgren, K. Jörnsten and M. Rönnqvist
- 459 Credit contagion in a network of firms with spatial interaction
D. Barro and A. Basso

Short Communications

- 469 A note on coordination in decentralized assembly systems with uncertain component yields
X. Yan, M. Zhang and K. Liu
- 479 A unified analysis for the single-machine scheduling problem with controllable and non-controllable variable job processing times
C. Koulamas, S. Gupta and G.J. Kyparisis
- 483 A note on deriving decision rules to locate export containers in container yards
C. Zhang, W. Chen, L. Shi and L. Zheng

Book Review

- 486 Metaheuristics. From Design to Implementation, El-Ghazali Talbi. John Wiley & Sons Inc. (2009). XXI + 593 pp., Publication 978-0-470-27858-1
J. Teghem
