

## CONTENTS

### Invited Review

- 1 Synergies of Operations Research and Data Mining  
*S. Meisel and D. Mattfeld*

### Continuous Optimization

- 11 The inverse Fermat–Weber problem  
*R.E. Burkard, M. Galavii and E. Gassner*
- 18 Natural gas cash-out problem: Bilevel stochastic optimization approach  
*V.V. Kalashnikov, G.A. Pérez-Valdés, A. Tomasgard and N.I. Kalashnykova*
- 34 Global convergence of a robust filter SQP algorithm  
*C. Shen, W. Xue and X. Chen*

### Discrete Optimization

- 46 Hybrid variable neighbourhood approaches to university exam timetabling  
*E.K. Burke, A.J. Eckersley, B. McCollum, S. Petrovic and R. Qu*
- 54 Algorithms for the generalized quadratic assignment problem combining Lagrangean decomposition and the Reformulation-Linearization Technique  
*A.A. Pessoa, P.M. Hahn, M. Guignard and Y.-R. Zhu*
- 64 Accelerated tabu search for no-wait flowshop scheduling problem with maximum lateness criterion  
*C. Wang, X. Li and Q. Wang*

### Production, Manufacturing and Logistics

- 73 Validating vehicle routing zone construction using Monte Carlo simulation  
*J.F. Bard, A.I. Jarrah and J. Zan*
- 86 The setting of profit targets for target oriented divisions  
*C.V. Shi, X. Zhao and Y. Xia*
- 93 On the benefits of co-collection: Experiments with a multi-compartment vehicle routing algorithm  
*L. Muyldermans and G. Pang*

### Stochastics and Statistics

- 104 Monge extensions of cooperation and communication structures  
*U. Faigle, M. Grabisch and M. Heyne*
- 111 Burn-in by environmental shocks for two ordered subpopulations  
*J.H. Cha and M. Finkelstein*
- 118 Analysis of a two-phase queueing system with a fixed-size batch policy  
*H.-M. Park, T.-S. Kim and K.C. Chae*

### Decision Support

- 123 The pricing and optimal strategies of callable warrants  
*K. Yagi and K. Sawaki*
- 131 Optimal testing strategies in overlapped design process  
*Y. Qian, M. Xie, T.N. Goh and J. Lin*
- 144 Constrained group balancing: Why does it work  
*D. Krass and A. Ovchinnikov*

### Innovative Applications of O.R.

- 155 A hybrid scatter search heuristic for personalized crew rostering in the airline industry  
*B. Maenhout and M. Vanhoucke*

Continued on last page of this issue

## Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

### Contents continued from the outside back cover

- 168 A branch and bound algorithm for determining locations of long-term care facilities  
*D.-G. Kim and Y.-D. Kim*
- 178 An incentive-compatible solution for trade credit term incorporating default risk  
*X. Shi and S. Zhang*
- 197 On pricing of multiple bundles of products and services  
*J.-C. Ferrer, H. Mora and F. Olivares*
- 209 Stakeholder preference elicitation and modelling in multi-criteria decision analysis – A case study on urban water supply  
*P.N. Kodikara, B.J.C. Perera and M.D.U.P. Kularathna*
- 221 Random yield supply chain with a yield dependent secondary market  
*Y. He and J. Zhang*

### Interfaces with Other Disciplines

- 231 DEA-based hypothesis tests for comparing two groups of decision making units  
*R.D. Banker, Z.(E). Zheng and R. Natarajan*
- 239 Considering endogeneity for optimal catalog allocation in direct marketing  
*H. Hruschka*
- 248 On the robustness of non-linear personalized price combinatorial auctions  
*S. Schneider, P. Shabalín and M. Bichler*

### Short Communications

- 260 On the product line selection problem under attraction choice models of consumer behavior  
*C. Schön*
- 265 On the boundedness of the SORM DEA models with negative data  
*A. Emrouznejad, G.R. Amin, E. Thanassoulis and A.L. Anouze*
- 269 Comment on "A new clustering approach using data envelopment analysis"  
*J.J. Krüger*
