

## CONTENTS

### Invited Review

- 539 Research on warehouse design and performance evaluation: A comprehensive review  
*J. Gu, M. Goetschalckx and L.F. McGinnis*

### Discrete Optimization

- 550 A simulated annealing with a new neighborhood structure based algorithm for high school timetabling problems  
*D. Zhang, Y. Liu, R. M'Hallah and S.C.H. Leung*
- 559 The minimization of open stacks problem: A review of some properties and their use in pre-processing operations  
*H.H. Yanasse and E.L.F. Senne*
- 568 A priority-rule method for project scheduling with work-content constraints  
*C.-U. Fündeling and N. Trautmann*

### Production, Manufacturing and Logistics

- 575 Supply chain interactions due to store-brand introductions: The impact of retail competition  
*A. Groznik and H.S. Heese*
- 583 Efficient and effective heuristics for the coordinated capacitated lot-size problem  
*A. Narayanan and P. Robinson*
- 593 An optimal production-inventory model for deteriorating items with multiple-market demand  
*Y. He, S.-Y. Wang and K.K. Lai*
- 601 Models for concurrent product and process design  
*T.A. Roemer and R. Ahmadi*
- 614 Optimizing production and transportation in a commit-to-delivery business mode  
*R.A. Melo and L.A. Wolsey*
- 619 Determining order-up-to levels under periodic review for compound binomial (intermittent) demand  
*R.H. Teunter, A.A. Syntetos and M.Z. Babai*

### Stochastics and Statistics

- 625 Separation in homogeneous systems with independent identical elements  
*G. Levitin and K. Hausken*
- 635 Computational complexity in additive hedonic games  
*S.-C. Sung and D. Dimitrov*
- 640 Extended dynamic partial-overlapping batch means estimators for steady-state simulations  
*W.T. Song and M. Chih*

### Decision Support

- 652 A method for member selection of cross-functional teams using the individual and collaborative performances  
*B. Feng, Z.-Z. Jiang, Z.-P. Fan and N. Fu*
- 662 Top-down approaches for integrated risk management: How accurate are they?  
*P. Grundke*
- 673 A comprehensive analytical approach for policy analysis of system dynamics models  
*M. Saleh, R. Oliva, C.E. Kampmann and P.I. Davidsen*

### Computational Intelligence and Information Management

- 684 Limitations of learning in automata-based systems  
*F.S. Oliveira*
- 692 Learning the optimal kernel for Fisher discriminant analysis via second order cone programming  
*R. Khemchandani, Jayadeva and S. Chandra*
- 698 Induction over constrained strategic agents  
*F. Boylu, H. Aytug and G.J. Koehler*

# Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

## Innovative Applications of O.R.

- 706 Benchmarking the operating efficiency of Asia container ports  
*S.-W. Hung, W.-M. Lu and T.-P. Wang*
- 714 Solving a minimum-power covering problem with overlap constraint for cellular network design  
*L. Chen and D. Yuan*
- 724 Corporate governance and firm performance: Evidence from Japanese manufacturing industries after the lost decade  
*T. Sueyoshi, M. Goto and Y. Omi*
- 737 A distributed approach to capacity allocation in logical networks  
*A. Costa, M. Ramakrishnan and P.G. Taylor*

## Interfaces with Other Disciplines

- 749 Measuring dynamic efficiency: Theories and an integrated methodology  
*C.-M. Chen and J. van Dalen*
- 761 The measurement of relative efficiency using data envelopment analysis with assurance regions that link inputs and outputs  
*M. Khalili, A.S. Camanho, M.C.A.S. Portela and M.R. Alirezaee*
- 771 On some methods for performance ranking and correspondence analysis in the DEA context  
*C.-M. Tsou and D.-Y. Huang*

## Short Communication

- 784 A note on "A mixed integer programming model for advanced planning and scheduling (APS)"  
*A. Örnek, S. Özpeynirci and C. Öztürk*
