

Volume 203, Issue 1, 16 May 2010

CONTENTS

Invited Review

- 1 Simulation in manufacturing and business: A review
M. Jahangirian, T. Eldabi, A. Naseer, L.K. Stergioulas and T. Young

Discrete Optimization

- 14 Solving multiobjective, multiconstraint knapsack problems using mathematical programming and evolutionary algorithms
K. Florios, G. Mavrotas and D. Diakoulaki
- 22 New multi-objective method to solve reentrant hybrid flow shop scheduling problem
F. Dugardin, F. Yalaoui and L. Amodeo
- 32 Resource level minimization in the discrete-continuous scheduling
M. Gorczyca and A. Janiak
- 42 The two-machine open-shop problem with unit-time operations and time delays to minimize the makespan
A. Munier-Kordon and D. Rebaine
- 50 Solving the 2-rooted mini-max spanning forest problem by branch-and-bound
M. Mekking and A. Volgenant

Production, Manufacturing and Logistics

- 59 The Attractive Traveling Salesman Problem
G. Erdoğan, J.-F. Cordeau and G. Laporte
- 70 Coordination mechanism for the supply chain with leadtime consideration and price-dependent demand
H. Chen, Y.(F). Chen, C.-H. Chiu, T.-M. Choi and S. Sethi
- 81 Why are enterprise resource planning systems indispensable to supply chain management?
Y.-f. Su and C. Yang
- 95 A Hybrid Taguchi-Immune approach to optimize an integrated supply chain design problem with multiple shipping
M.K. Tiwari, N. Raghavendra, S. Agrawal and S.K. Goyal
- 107 Heuristics for the Stochastic Eulerian Tour Problem
S. Mohan, M. Gendreau and J.-M. Rousseau
- 118 Trade-off between capacity invested and inventory needed
H. Jodlbauer and K. Altendorfer

Stochastics and Statistics

- 134 The Newsboy problem when customer demand is a compound renewal process
R.W. Grubbström
- 143 Synchronized abandonments in a single server unreliable queue
A. Economou and S. Kapodistria
- 156 Importance functions for restart simulation of general Jackson networks
J. Villén-Altamirano

Decision Support

- 166 A pseudo-Bayesian model in financial decision making with implications to market volatility, under- and overreaction
K. Lam, T. Liu and W.-K. Wong
- 176 Visualizing preferences on spheres for group decisions based on multiplicative preference relations
L.-C. Ma
- 185 Portfolio selection under distributional uncertainty: A relative robust CVaR approach
D. Huang, S. Zhu, F.J. Fabozzi and M. Fukushima
- 195 Additive conjoint measurement with ordered categories
D. Bouyssou and T. Marchant

0377-2217(20100516)203:1;1-#

Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at <http://authors.elsevier.com/locate/ejor>.

Contents continued from the outside back cover

- 205 Modeling methods and a branch and cut algorithm for pharmaceutical clinical trial planning using stochastic programming
M. Colvin and C.T. Maravelias
- 216 On the complexity of Slater's problems
O. Hudry

Innovative Applications of O.R.

- 222 The use of interval arithmetic in solving a non-linear rational expectation based multiperiod output-inflation process model: The case of the IN/GB method
B.A. Stradi-Granados and E. Haven
- 230 A simulation study of the fleet sizing problem arising in offshore anchor handling operations
A. Shyshou, I. Gribkovskaia and J. Barceló
- 241 A memetic algorithm for graph coloring
Z. Lü and J.-K. Hao

Interfaces with Other Disciplines

- 251 Allocative efficiency in simulated multiple-unit combinatorial auctions with quantity support
V. Ervasti and R.-L. Leskelä
- 261 A multiplier bound approach to assess relative efficiency in DEA without slacks
N. Ramón, J.L. Ruiz and I. Sirvent
- 270 Heuristic algorithms for the multi-depot ring-star problem
R. Baldacci and M. Dell'Amico
