

Communications in Theoretical Physics

Vol. 59, No. 6, 2013

Contents

General

- Solving Nonlinear Fractional Differential Equation by Generalized Mittag-Leffler Function Method
A.A.M. Arafa, S.Z. Rida, A.A. Mohammadein, and H.M. Ali 661–663
- Breather Dynamics of the Sine-Gordon Equation
Stephen Johnson and Anjan Biswas 664–670
- On Integrable Properties for Two Variable-Coefficient Evolution Equations
ZHANG Yu-Feng, HAN Zhong, and Honwah Tam 671–678
- 2D Pauli Equation with Hulthén Potential in the Presence of Aharonov–Bohm Effect
N. Ferkous and A. Bounames 679–683
- Conformists and Contrarians in a Kuramoto Model with Uniformly Distributed Natural Frequencies
YUAN Di and YANG Jun-Zhong 684–688
- Relativistic Treatment of Spinless Particles Subject to a q -Deformed Morse Potential
Sami Ortakaya 689–692
- Quantum Discord of Non-X State
YAO Jing-Ying, DONG Yu-Li, and ZHU Shi-Qun 693–699
- Probabilistic Teleportation of Three-Atom State via Five-Atom Cluster State
YU Li-Zhi and WU Tao 700–702
- Dynamics of Nonautonomous Dark Solitons
LIU Chong, YANG Zhan-Ying, ZHANG Ming, ZHANG Tao, YANG Wen-Li, and YUE Rui-Hong 703–710

Physics of Elementary Particles and Fields

- Constraints on the R-Parity Violating Couplings Using the Newest Measurement of the Decay $B_s^0 \rightarrow \mu^+ \mu^-$
LI Cheng, Lü Cai-Dian, and GAO Xiang-Dong 711–713

Atomic and Molecular Physics

- Microscopic Dynamics of Nonsequential Double Ionization by Elliptically Polarized Few-Cycle Laser Pulses
YU Ben-Hai, LI Ying-Bin, and LI Fang-Tao 714–718

Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics, and Fluid Dynamics

- Integrability Test and Spatiotemporal Feature of Breather-Wave to the (2+1)-Dimensional Boussinesq Equation
LUO Hong-Ying, WANG Chuan-Jian, LIU Jun, and DAI Zheng-De 719–722

(Continued)

ISSN 0253-6102
CN 11-2592/O3
Price: 108.00 Yuan

ISSN 0253-6102

New Rogue Wave Solutions of (1+2)-Dimensional Non-Isospectral KP-II Equation
GUO Yan-Feng, LING Li-Ming, and DAI Zheng-De 723-728

The Mathematical Analysis for Peristaltic Flow of Hyperbolic Tangent Fluid in a Curved Channel
S. Nadeem and E.N. Maraj 729-736

Physics of Gases, Plasmas, and Electric Discharges

Numerical Simulation of 2-D Radiation-Drive Ignition Implosion Process
YONG Heng, SONG Peng, ZHAI Chuan-Lei, KANG Dong-Guo, GU Jian-Fa, HANG Xu-Deng, GU Pei-Jun, and JIANG Song 737-744

Time-Dependent Cylindrical and Spherical Solitary Structures and Double Layers of Dust Ion-Acoustic Waves in Ultra-Relativistic Dense Plasma
T. Akhter, M.M. Hossain, and A.A. Mamun 745-750

Condensed Matter: Electronic Structure, Electrical, Magnetic, and Optical Properties

Elastic, Piezoelectric and Acoustic Properties of Wurtzite MnO from Density Functional Calculation
HAN Han 751-755

Positron Energy Levels in Cd-Based Semiconductors
B. Abbar, S. Méçabih, S. Amari, N. Benosman, and B. Bouhafs 756-762

Polaron Effect of a Two Electron Parabolic Quantum Dot
S. Saravana Kumar, A. John Peter, and Chang Kyoo Yoo 763-768

Skew Information for a Single Cooper Pair Box Interacting with a Single Cavity Field
N. Metwally, A. Al-Mannai, and M. Abdel-Aty 769-772

Interdisciplinary Physics and Related Areas of Science and Technology

Dynamical Consensus Algorithm for Second-Order Multi-Agent Systems Subjected to Communication Delay
LIU Cheng-Lin and LIU Fei 773-781

Geophysics, Astronomy, and Astrophysics

High-Precision Direct Method for the Radiative Transfer Problems
ZHANG Yan, HOU Su-Qing, YANG Ping, and WU Kai-Su 782-788
