

Communications in Theoretical Physics

Vol. 64, No. 2, 2015

Contents

General

- Symmetry Reduction of the (2+1)-Dimensional Modified Dispersive Water-Wave System
MA Zheng-Yi, FEI Jin-Xi, and DU Xiao-Yang 127–132
- Stationary States and Modulational Instability of Coupled Two-Component Bose-Einstein Condensates in a Ring Trap
DENG Hai-Ming, ZHONG Hong-Hua, HUANG Jia-Hao, DAI Hui, YAO Min, and HUANG Xiao-Yi 133–138
- Evolution of Dissipative Anisotropic Expansion-Free Axial Fluids
M. Sharif and Zunaira Nasir 139–144
- New Agegraphic Pilgrim Dark Energy in $f(T, T_G)$ Gravity
Abdul Jawad and Ujjal Debnath 145–150
- Colored Noises-Induced Regime Shifts in a Vegetation Ecological System
HAN Qing-Lin, ZENG Jia-Kui, YANG Tao, ZHANG Chun, LONG Fei, FU Yun-Chang, and ZENG Chun-Hua 151–158
- The Effect of Spin-Orbit Coupling and Spin-Spin Coupling of Compact Binaries on Chaos
WANG Hong and HUANG Guo-Qing 159–165

Physics of Elementary Particles and Fields

- SUSY-QCD Effects in Top Quark Pair Production in Association with a Gluon at the ILC
ZHANG Yan-Ming and LIU Ning 166–170
- Perturbation to Mei Symmetry and Adiabatic Invariants for Disturbed El-Nabulsi's Fractional Birkhoff System
SONG Chuan-Jing and ZHANG Yi 171–176

Nuclear Physics

- The Analytical Parametrization of Fusion Barrier by Using the Skyrme Energy-Density Function Model
V. Zanganeh, M. Mirzaei, and N. Wang 177–184
- Role of Surface Energy Coefficients and Temperature in the Fusion Reactions Induced by Weakly Bound Projectiles
R. Gharaei and O.N. Ghodsi 185–196

Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics, and Fluid Dynamics

- Hopf Bifurcation in a New Four-Dimensional Hyperchaotic System
LI Xin and YAN Zhen-Ya 197–202

Price: 108.00 Yuan

ISSN 0253-6102

Numerical Simulation of Antennas with Improved Integral Equation Method

MA Ji, FANG Guang-You, and LU Wei 203-207

Physics of Gases, Plasmas, and Electric Discharges

Roles of Superthermal Electrons and Adiabatic Heavy Ions on Heavy-Ion-Acoustic Solitary and Shock Waves in a Multi-Component Plasma

M.G. Shah, M.M. Rahman, M.R. Hossen, and A.A. Mamun 208-214

Condensed Matter: Structural, Mechanical, and Thermal Properties

A Comprehensive Numerical Investigation on the Mechanical Properties of Hetero-Junction Carbon Nanotubes

Ali Ghavamian and Andreas Öchsner 215-230

Critical Behaviors and Universality Classes of Percolation Phase Transitions on Two-Dimensional Square Lattice

ZHU Yong, YANG Zi-Qing, ZHANG Xin, and CHEN Xiao-Song 231-236

Structural, Elastic, and Electronic Properties of a New Phase of Carbon

XING Meng-Jiang, LI Bin-Hua, YU Zheng-Tao, and CHEN Qi 237-243

Condensed Matter: Electronic Structure, Electrical, Magnetic, and Optical Properties

Structural and Optical Properties of Point Defects in α -SiO₂ Cluster

LIU Meng, LU Peng-Fei, YANG Yang, WU Li-Yuan, SU Rui, and CHEN Jun 244-248

Interdisciplinary Physics and Related Areas of Science and Technology

Influences of the Structure of Lipids on Thermal Stability of Lipid Membranes

HAI Nan-Nan, ZHOU Xin, and LI Ming 249-258
