

# Communications in Theoretical Physics

Vol. 67, No. 3, 2017

## Contents

### General

- Hypergeometric Series Solution to a Class of Second-Order Boundary Value Problems via Laplace Transform with Applications to Nanofluids  
*Abdelhalim Ebaid, Abdul-Majid Wazwaz, Elham Alali, and Basem S. Masaedeh*..... 231–234
- New Stability Criteria for High-Order Neural Networks with Proportional Delays  
*Chang-Jin Xu and Pei-Luan Li*..... 235–240
- Bound States Energies of a Harmonic Oscillator Perturbed by Point Interactions  
*N. Ferkous and T. Boudjedaa*..... 241–249
- Investigation of Conformable Fractional Schrödinger Equation in Presence of Killingbeck and Hyperbolic Potentials  
*Won Sang Chung, Soroush Zare, and Hassan Hassanabadi*..... 250–254
- Non-Markovianity Measure Based on Brukner–Zeilinger Invariant Information for Unital Quantum Dynamical Maps  
*Zhi He, Lie-Qiang Zhu, and Li Li*..... 255–260
- Quantum Fisher Information of Driven Multi-particle Systems in Structured Bosonic Reservoirs  
*Kai Yan, Yan-Qing Xie, Yu-Meng Huang, and Xiang Hao*..... 261–266
- Quantum Correlations Evolution Asymmetry in Quantum Channels  
*Meng Li, Yun-Feng Huang, and Guang-Can Guo*..... 267–272
- Exact Soliton Solutions for the (2+1)-Dimensional Coupled Higher-Order Nonlinear Schrödinger Equations in Birefringent Optical-Fiber Communication  
*Yue-Jin Cai, Cheng-Lin Bai, and Qing-Long Luo*..... 273–279
- Two-Point Resistance of a Non-Regular Cylindrical Network with a Zero Resistor Axis and Two Arbitrary Boundaries  
*Zhi-Zhong Tan*..... 280–288

### Atomic and Molecular Physics

- Accurate Structure Parameters for Tunneling Ionization Rates of Gas-Phase Linear Molecules  
*Song-Feng Zhao, Jian-Ke Li, Guo-Li Wang, Peng-Cheng Li, and Xiao-Xin Zhou*..... 289–300

### Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics, and Fluid Dynamics

- Advanced Study of Unsteady Heat and Chemical Reaction with Ramped Wall and Slip Effect on a Viscous Fluid  
*Ayesha Sohail, K. Maqbool, Noreen Sher Akbar, and Muhammad Younas*..... 301–308

ISSN 0253-6102

Solutions to Forced and Unforced Lin-Reissner-Tsien Equations for Transonic Gas Flows on Various Length Scales	
<i>Kyle A. Theaker and Robert A. Van Gorder</i> .....	309-316

Electrostatic Surface Waves on Semi-Bounded Quantum Electron-Hole Semiconductor Plasmas	
<i>Afshin Moradi</i> .....	317-321

**Physics of Gases, Plasmas, and Electric Discharges**

Proton Beam Generated by Multi-Lasers Interaction with Rear-Holed Target	
<i>Peng Yang, Da-Peng Fan, and Yu-Xiao Li</i> .....	322-326

Self-similar Solution of a Cylindrical Shock Wave under the Action of Monochromatic Radiation in a Rotational Axisymmetric Dusty Gas	
<i>G. Nath and P.K. Sahu</i> .....	327-336

**Condensed Matter: Electronic Structure, Electrical, Magnetic, and Optical Properties**

Temperature Effects of Electric Field on the First Excited State of Strong Coupling Polaron in a CsI Quantum Pseudodot	
<i>Yong Sun, Zhao-Hua Ding, and Jing-Lin Xiao</i> .....	337-340

Quantum Spin Transport in Rashba Spin-Orbit-Coupled Graphene Nanoflakes	
<i>H. Nikoofard, M. Laghaei, and E. Heidari Semiromi</i> .....	341-346
