

# Communications in Theoretical Physics

Vol. 60, No. 1, 2013

## Contents

### General

- Approximate Bound States Solution of the Hellmann Potential  
*M. Hamzavi, K.E. Thylwe, and A.A. Rajabi* ..... 1-8
- Klein Gordon Oscillators in Commutative and Noncommutative Phase Space with Pseudoharmonic Potential in the Presence and Absence Magnetic Field  
*H. Hassanabadi, S.S. Hosseini, and Z. Molaee* ..... 9-18
- Quantum Interference of Dual-Channel Excited Magnons in Spin-1 Bose-Einstein Condensates Atomic Chain  
*ZHAO Xu, ZHAO Xing-Dong, ZHOU Lu, JING Hui, and ZHANG Wei-Ping* ..... 19-24
- Scattering States of Schrödinger Equation under the Modified Cusp Potential  
*Z. Molaee, H. Hassanabadi, and S. Zarrinkamar* ..... 25-27
- Thermodynamics of the Apparent Horizon in FRW Universe with Massive Gravity  
*LI Hui and ZHANG Yi* ..... 28-36
- Some Analytical Properties of the Model for Stochastic Evolutionary Games in Finite Populations with Non-uniform Interaction Rate  
*QUAN Ji and WANG Xian-Jia* ..... 37-47
- The Stability of Multi-modal Traffic Network  
*HAN Ling-Hui Sun Hui-Jun, ZHU Cheng-Juan, WU Jian-Jun, and JIA Bin* ..... 48-54

### Physics of Elementary Particles and Fields

- Light Front Fermion Model Propagation  
*Jorge Henrique Sales and Alfredo Takashi Suzuki* ..... 55-68

### Nuclear Physics

- Reanalysis of Elastic Scattering of  ${}^6\text{Li} + {}^{209}\text{Bi}$  Reaction Using a New Density Distribution of  ${}^6\text{Li}$  Nucleus  
*M. Aygun* ..... 69-72

### Atomic and Molecular Physics

- High-Order Dispersion Coefficients for Alkali-metal Atoms  
*KANG Shuai, DING Chi-Kun, CHEN Chang-Yong, and WU Xue-Qing* ..... 73-79

### Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics, and Fluid Dynamics

- Properties of Defect Modes in Periodic Lossy Multilayer with Negative-Index-Materials  
*Alireza Aghajamali and Mahmood Barati* ..... 80-86

Price: 108.00 Yuan

ISSN 0253-6102

Control of Wave Propagation and Effect of Kerr Nonlinearity on Group Index <i>Hazrat Ali, Ziauddin, and Iftikhar Ahmed</i> .....	87–92
---	-------

Modulational Instability in a Pair of Non-identical Coupled Nonlinear Electrical Transmission Lines <i>Eric Tala-Tebue, Aurelien Kenfack-Jiotsa, Marius Hervé Tatchou-Ntemfack, and Timoléon Crépin Kofané</i> .....	93–100
---	--------

### Condensed Matter: Structural, Mechanical, and Thermal Properties

Brittle-Ductile Transition of Ferroelectric Ceramics Induced by Thermally Activated Dislocation Emission <i>XIE Chao, FANG Qi-Hong, LIU You-Wen, CHEN Jian-Kang, and MA Ting-Feng</i> .....	101–107
--	---------

Effects of Isotopic Concentrations on Thermodynamic Parameters of Deuterium-Tritium Mixtures <i>S.M. Motevalli, M.R. Pahlavani, and M. Azimi</i> .....	108–112
---	---------

Working Mechanism of a BC <sub>3</sub> Nanotube Carbon Monoxide Gas Sensor <i>Ali Ahmadi Peyghan, Siroos Yourdkhani, and Maziar Noei</i> .....	113–118
---	---------

### Condensed Matter: Electronic Structure, Electrical, Magnetic, and Optical Properties

Dependence of Spin-orbit Parameters in Al <sub>x</sub> Ga <sub>1-x</sub> N/GaN Quantum Wells on the Al Composition of the Barrier <i>Li Ming</i> .....	119–123
---	---------

Donor Binding Energy in GaAs/Ga <sub>1-x</sub> Al <sub>x</sub> As Quantum Well: the Laser Field and Temperature Effects <i>WEI Shu-Yi, HOU Wen-Xiu, CHEN Xiao-Yang, and XIA Cong-Xin</i> .....	124–128
---	---------

Topological Insulators on the Ruby Lattice with Rashba Spin-Orbit Coupling <i>HOU Jing-Min and WANG Guo-Xiang</i> .....	129–135
--	---------

### Interdisciplinary Physics and Related Areas of Science and Technology

A Theoretical Model to Explain the Mechanism of Electromagnetic Wave Propagation Along Cylindrical Micelles <i>Afshin Moradi</i> .....	136–138
---	---------

Reliability and Efficiency of Generalized Rumor Spreading Model on Complex Social Networks <i>Yaghoob Naimi and Mohammad Naimi</i> .....	139–144
---	---------
