Contents

Small Systems: Nonequilibrium Phenomena and Anomalous Behavior

Preface to Special Issue on Small Systems: Nonequilibrium Phenomena and Anomalous Behavior i-ii

General

Exact Solutions and Their Asymptotic Behaviors for the Averaged Generalized Fractional Elastic Models
LI Can, DENG Wei-Hua, and SHEN Xiao-Qin 443-450

What Does Dynamical Systems Theory Teach Us about Fluids?
Hadrien Bosetti and Harald A. Posch 451-468

On the Foundations of Statistical Mechanics: Ergodicity, Many Degrees of Freedom and Inference
Sergio Chibbaro, Lamberto Rondoni, and Angelo Vulpiani 469-475

Theoretical Analysis of the Fluctuation Theorem Applied to Electric Circuits
Charlotte F. Petersen, Elmars Krausz, Denis J. Evans, and Stephen R. Williams 476-484

Solving for the Fixed Points of 3-Cycle in the Logistic Map and Toward Realizing Chaos by the Theorems of Sharkovskii and Li-Yorke
M. Howard Lee 485-496

Life and Death of Stationary Linear Response in Anomalous Continuous Time Random Walk Dynamics
Igor Goychuk 497-504

Coulomb Friction Driving Brownian Motors
Alessandro Manacorda, Andrea Puglisi, and Alessandro Sarracino 505-513

Scaling Properties of Field-Induced Superdiffusion in Continuous Time Random Walks
R. Burioni, G. Gradenigo, A. Sarracino, A. Vezzani, and A. Vulpiani 514-520

Diffusion in the Lorentz Gas
Carl P. Dettmann 521-540

Sieving of H_2 and D_2 Through End-to-End Nanotubes
Devagnik Dasgupta, Debra J. Searles, Lamberto Rondoni, and Stefano Bernardi 541-549

Small Open Chemical Systems Theory: Its Implications to Darwinian Evolution Dynamics, Complex Self-Organization and Beyond
QIAN Hong 550-554

Energy and Heat Fluctuations in a Temperature Quench
M. Zannetti, F. Corberi, G. Gonnella, and A. Piscitelli 555-570

(Continued)

ISSN 0253-6102

Price: 108.00 Yuan

ISSN 0253-6102

Generalized Integral Fluctuation Relation with Feedback Control for Diffusion Processes <i>LIU Fei, XIE Hong-Cheng, and LU Zhi-Yue</i>	571–578
One-Dimensional Steady Transport by Molecular Dynamics Simulation: Non-Boltzmann Position Distribution and Non-Arrhenius Dynamical Behavior <i>SHI Rui and WANG Yan-Ting</i>	579–588
Coefficient of Performance at Maximum χ -Criterion for Feynman Ratchet as a Refrigerator <i>SHENG Shi-Qi, YANG Pan, and TU Zhan-Chun</i>	589–595

Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics, and Fluid Dynamics

Kinetic Density Functional Theory: A Microscopic Approach to Fluid Mechanics <i>Umberto Marini Bettolo Marconi and Simone Melchionna</i>	596–606
---	---------

Condensed Matter: Structural, Mechanical, and Thermal Properties

Finite-Size Conformational Transitions: A Unifying Concept Underlying Chromosome Dynamics <i>Bertrand R. Caré, Pascal Carrivain, Thierry Forné, Jean-Marc Victor, and Annick Lesne</i>	607–616
---	---------

Interdisciplinary Physics and Related Areas of Science and Technology

Statistical Mechanics Analysis of ATP Binding to a Multisubunit Enzyme <i>ZHANG Yun-Xin</i>	617–621
Effect of a Local Source or Sink of Inhibitor on Turing Patterns <i>P. Dziekan, L. Signon, B. Nowakowski, and A. Lemarchand</i>	622–630
Bibliography on Small Systems: Nonequilibrium Phenomena and Anomalous Behavior	631–633
