Atmospheric and Oceanic Optics

- Analysis of a digital phase retrieval method for wave-front reconstruction *Wei Huang, Dean Liu, Xuejie Zhang, Yan Zhang, and Jianqiang Zhu* 080101

Diffraction and Gratings

- Multimode resonance bandpass filter with twin wideband channels *Zhenhua Wang, Yonggang Wu, Zihuan Xia, Renchen Liu, Gang Lv, Heyun Wu, and Pinglin Tang* 080501

Fiber Optics and Optical Communications

- High channel-count comb filter based on multi-concatenated sampled chirped fiber Bragg gratings *Hongwei Yuan, Jun Zhou, Weitao Ma, Yongtang Sun, and Tiefeng Xu* 080601
- Label swapping and packet transmission of DPSK-labeled PPM signal in optical label switching *Yan Shi, Qi Zhang, Chongxiu Yu, Xiangjun Xin, Cang Jin, and Rui Zhou* 080602

Image Processing

- Sub-pixel processing for super-resolution scanning imaging system with fiber bundle coupling *Bowen An, Bingbin Xue, Shengda Pan, and Guilin Chen* 081001
- Novel averaging window filter for SIFT in infrared face recognition *Junfeng Bai, Yong Ma, Jing Li, Fan Fan, and Hongyuan Wang* 081002

Image Systems

- Analysis of the deviation of the diffracted beams caused by acousto-optic tunable filter in multispectral imaging *Yu Yang, Xuejun Sha, and Zhonghua Zhang* 081101
- Performance of third-order ghost imaging with second-order intensity correlation *Bin Cao, Chunxi Zhang, and Pan Ou* 081102

Instrumentation, Measurement, and Metrology

- Experimental study on minimum resolvable velocity for heterodyne laser Doppler vibrometry *Jianhua Shang, Shuguang Zhao, Yan He, Weibiao Chen, and Ning Jia* 081201
- Full-parallax three-dimensional display using new directional diffuser *Shuai Li, Haifeng Li, Zhenrong Zheng, Yifan Peng, Shicong Wang, and Xu Liu* 081202

Contents continued

Integrated Optics

- Novel photonic approach to microwave frequency measurement using tunable group delay line *Pengsheng Wu, Xinyou Han, Yiyang Gu, Shanfeng Li, Shu Hu, and Mingshan Zhao* 081
- Design and fabrication of polymeric multimode power splitter with secondary asymmetric branches *Shu Li, Qiao Lin, Liuhua Chen, and Xingkun Wu* 081

Lasers and Laser Optics

- 6.5-ns actively Q-switched Nd:YVO₄ laser operating at 1.34 μm *Yongguang Zhao, Zhengping Wang, Haohai Yu, Lei Guo, Lijuan Chen, Shidong Zhuang, Xun Sun, Dawei Hu, and Xinguang Xu* 081
- Diode-pumped high-efficiency broadband tunable Tm:YAP laser *Yanyan Li, Yi Xu, Yuxin Leng, Hao Zhang, and Yongjun Dong* 081
- Kinetics analysis of chemiluminescence in discharge-driven HF chemical lasers *Wei Luo, Shengfu Yuan, Baozhu Yan, Qisheng Lu, and Qianjin Zou* 081
- High-power picosecond regenerative amplifier based on CW diode side-pumped Nd:YAG with high beam quality *Hua Lin, Jinfeng Li, Jinping He, and Xiaoyan Liang* 081
- Conductively cooled 1-kHz single-frequency Nd:YAG laser for remote sensing *Juntao Wang, Ren Zhu, Jun Zhou, Huaguo Zang, Xiaolei Zhu, and Weibiao Chen* 081
- Beam steering of external cavity diode laser by an intracavity electro-optic ceramic deflector *Min Gao, Qing Ye, Zuoren Dong, Zhenglan Bian, Zujie Fang, Haiwen Cai, and Ronghui Qu* 081

Machine Vision

- Pose measurement method based on geometrical constraints *Zimiao Zhang, Changku Sun, Pengfei Sun, and Peng Wang* 0815

Optical Data Storage

- Laser direct writing pattern structures on AgInSbTe phase change thin film *Aihuan Dun, Jinsong Wei, and Fuxi Gan* 0821

Optical Devices

- Low threshold voltage light-emitting diode in silicon-based standard CMOS technology *Zan Dong, Wei Wang, Beiju Huang, Xu Zhang, Ning Guan, and Hongda Chen* 0823
- Study on the saturation characteristics of high-speed uni-traveling-carrier photodiodes based on field screening analysis *Tuo Shi, Bing Xiong, Changzheng Sun, and Yi Luo* 0823
- Uneven splitting-ratio 1×2 multimode interference splitters based on silicon wire waveguides *Jingtao Zhou, Huajun Shen, Rui Jia, Huanming Liu, Yidan Tang, Chengyue Yang, Chunlai Xue, and Xinyu Liu* 0823

Scattering

- Single-molecule surface-enhanced Raman scattering of R6G in aqueous environment under non-resonance conditions *Enzhong Tan, Penggang Yin, Lidong Li, and Lin Guo* 0829

Spectroscopy

- Optical absorption spectra of tourmaline crystals from Altay, China *Xueliang Liu, Xiqi Feng, Jianliang Fan, and Shouguo Guo* 0830

Thin Films

- Effect of standing-wave field distribution on femosecond laser-induced damage of HfO₂/SiO₂ mirror coating *Shunli Chen, Yuan'an Zhao, Hongbo He, and Jianda Shao* 08310
