Atmospheric and Oceanic Optics

- Seasonal variability of cirrus depolarization properties derived from CALIPSO lidar measurements over Beijing in China *Xiaomei Lu, Yuesong Jiang, Xuguo Zhang, Bo Zhou, and Jun Ou* 127
- Fluorescence lidar for remote monitoring of plant *Kaifa Cao, Bo Zhao, Xin Fang, Shaolin Wang, Min Wang, and Shunxing Hu* 130

Diffraction and Gratings

- High quality beam shaping by square soft-edge diaphragm combined with liquid crystal spatial light modulator *Yunfeng Ma, Zhongwei Fan, Jisi Qiu, Chengyong Feng, Tianzhuo Zhao, and Weiran Lin* 134

Fiber Optics and Optical Communications

- Optical ultra-wideband pulse generation and distribution using a dual-electrode Mach-Zehnder modulator *Jing Li, Tigang Ning, Li Pei, and Chuntui Qi* 138
- Extending path computation element for light-path restoration in wavelength-switched optical networks *Lianxing Hou, Yueming Lu, Junhua Wang, Yuefeng Ji, and Yiqiang Hua* 142

Imaging Systems

- Sub-pixel processing algorithm of the reducing boundary recursive error in staring FPA micro-scanning imaging *Yan Chen, Weiqi Jin, Lingxue Wang, and Xia Wang* 146
- Fast macroblock mode selection algorithm for multiview depth video coding *Zongju Peng, Mei Yu, Gangyi Jiang, Feng Shao, Yun Zhang, and You Yang* 151
- Theoretical model for the performance of a multi-spectral imaging sensor *Xiaorui Wang, Honggang Bai, and Jianqi Zhang* 155
- Pupil design based on Fisher information optimization to extend field depth in practical optical system *Qinxiao Liu, Tingyu Zhao, Yanping Chen, Wenzhi Zhang, and Feihong Yu* 159
- Study of terahertz interferometric imaging using optical techniques *Yuntao He, Yuesong Jiang, Yuedong Zhang, and Guoli Fan* 162
- High-resolution subsurface articular cartilage imaging based on Fourier-domain common-path optical coherence tomography *Jae-Ho Han, Xuan Liu, Jin U. Kang, and Chul Gyu Song* 167

Instrumentation, Measurement and Metrology

- Monte-Carlo simulation of effective stiffness of time-sharing optical tweezers *Yuxuan Ren, Jianguang Wu, Mincheng Zhong, and Yinmei Li* 170
- Artificial neural network method for determining optical properties from double-integrating-spheres measurements *Chenxi Li, Huijuan Zhao, Qiuyin Wang, and Kexin Xu* 173
- Resonant characteristics of microcantilever by using self-mixing interferometer based on phase reconstruction method *Shaoqing Wang and Xiangzhao Wang* 177
- Qualification of superpolished substrates for laser-gyro by surface integrated scatter measurement *Zhimeng Wei, Xingwu Long, and Kaiyong Yang* 181

Lasers and Laser Optics

- Linearly polarized operation of Yb-doped fiber laser by Brewster's angle-polished fiber end *Xia Liu, Songtao Du, Jun Zhou, Jingxing Dong, Yunrong Wei, Zhijun Yuan, Wei Wang, Zhouping Su, and Qihong Lou* 184
- Highly efficient Nd:YAG/LBO laser at 473 nm under direct 885-nm diode laser pumping *Yanfei Lü, Jing Xia, Junguang Wang, Anfeng Zhang, Xihe Zhang, Lin Bao, Hui Quan, and Xiaodong Yin* 187
- Determination of energy transfer and up-conversion constants for Yb³⁺/Er³⁺ codoped phosphate glass *Suya Feng, Fei Luan, Shunguang Li, Li Chen, Biao Wang, Wei Chen, Lili Hu, Y. Guyot, and G. Boulon* 190
- Generation of synchronized femtosecond and picosecond laser pulses in a two-beam-pumped Ti:sapphire laser *Changjun Zhu, Junfang He, Xuejun Zhai, Bing Xue, and Chonghui Zhang* 194

Materials

- Enhancement of up-conversion luminescence properties in Yb³⁺/Tm³⁺/Er³⁺ tri-doped transparent oxyfluoride tellurite glass ceramics *Chunlei Yu, Dongbing He, Guonian Wang, Junjie Zhang, and Lili Hu* 197
- Effects of annealing on luminescence efficiency of large-size YAG:Ce crystal grown by temperature gradient techniques *Dunhua Cao, Guangjun Zhao, Qin Dong, Jianyu Chen, Yan Cheng, Yuchong Ding, and Jun Zou* 199

Medical Optics and Biotechnology

- All-fiber ring-cavity based frequency swept laser source for frequency domain OCT *Minghui Chen, Zhihua Ding, Lei Xu, Tong Wu, Chuan Wang, Guohua Shi, and Yudong Zhang* 202
- An efficient Jacobian scaling method for time-domain optical mammography *Yiwen Ma, Feng Gao, Pingqiao Ruan, Fang Yang, and Huijuan Zhao* 206

Nonlinear Optics

- Small-scale self-focusing of divergent beam in nonlinear media with loss *Yanli Zhang, Xiaoyan Li, Yan Zhang, Pingping Sun, and Jianqiang Zhu* 210
- A quasi-crystal model of collagen microstructure based on SHG microscopy *Pu Xu, Eleanor Kable, Colin J. R. Sheppard, and Guy Cox* 213
- Numerical simulations of the impact of wavefront phase distortions of pump on the beam quality of OPA *Fuling Zhang, Yanhai Wang, Meizhi Sun, Qunyu Bi, Xinglong Xie, and Zunqi Lin* 217

Optical Devices

- A new structure of multi-layer phosphor package of white LED with high efficiency *Baicheng Li, Dawei Zhang, Yuanshen Huang, Zhengji Ni, and Songlin Zhuang* 221

Optics in Computing

- Configuration of an optical waveguide interconnect mesh network based on EOPCB *Fengguang Luo and Liangjia Zong* 224

Quantum Optics

- Non-classical properties of the single-mode cavity field after interacting with a Ξ -type three-level atom *Jiangming Lin, Lanwen Ouyang, Bin Zhang, and Zhirong Zhong* 228
- Sudden death of entanglement in the two-mode cavity field *Feng Han and Yunjie Xia* 231

Spectroscopy

- Study on interaction between Dy(III)(NR)₃ complex and herring sperm DNA by spectroscopy *Yan Zhang, Xingming Wang, Dan Fei, Na Zhao, Tingting Zhao, Haifeng Zhu, and Lisheng Ding* 236

Thin Films

- Study on the laser-induced damage threshold of sol-gel ZO₂-PVP coatings *Haiyuan Li, Huai Xiong, and Yongxing Tang* 241

Ultrafast Optics

- The role of refocusing in dynamic X-wave formation during femtosecond laser filamentation in water *Junjie Xu, Han Xu, Hui Xiong, Ya Cheng, Zhizhan Xu, Weiwei Liu, and See Leang Chin* 244
- Stability analysis of linearly chirped Gaussian pulse stacking in laser plasma reaction *Huan Zheng, Anting Wang, Lixin Xu, Kun Gao, and Hai Ming* 248
