Atmospheric and Oceanic Optics

- Atmosphere boundary layer height determination and observation from ceilometer measurements over Hefei during the total solar on July 22, 2009 eclipse *Junfeng He, Wenqing Liu, Yunjun Zhang, Ruifeng Kan, Zhenyi Chen, and Jun Ruan* 439
- Gas leakage monitoring with scanned-wavelength direct absorption spectroscopy *Shuai Zhang, Wenqing Liu, Yujun Zhang, Xiaowen Shu, Dianqiang Yu, Ruifeng Kan, Jintong Dong, Hui Geng, and Jianguo Liu* 443

Diffraction and Gratings

- Single-material guided-mode resonance filter for TE waves under normal incidence *Tianyu Sun, Jianyong Ma, Xiaoyong Fu, Jianpeng Wang, Yunxia Jin, Jianda Shao, and Zhengxiu Fan* 447

Fiber Optics and Optical Communications

- Novel 64×2.5 Gb/s all-optical OFDM symbol generator based on triangle waveform driving-LiNbO₃ modulators *Yuan Li, Wei Li, Xiaojun Liang, Kecheng Yang, and Yaojun Qiao* 449
- UWB-over-Fiber transmission system using a dual-output Mach-Zehnder modulator *Ying Zhao, Xiaoping Zheng, Hanyi Zhang, and Bingkun Zhou* 454
- All-fiber cascaded ytterbium-doped nanosecond pulsed amplifier *Jie Zhou, Ping Yan, Shupeng Yin, Dongsheng Wang, and Mali Gong* 457
- Impairment-aware traffic grooming in WDM optical networks *Fengqing Liu, Hanlin Feng, and Yanchen Qian* 460
- Study of FSK/IM orthogonal modulation system with optical Manchester-coded payload *Rui Zhou, Xiangjun Xin, Qi Zhang, Kun Zhao, Tonggang Zhao, and Chongxiu Yu* 464
- Tunable optical comb generation based on carrier-suppressed intensity modulation and phase modulation *Xihua Zou, Wei Pan, and Jianping Yao* 468
- Study on compensating methods of transmission system at 40 Gb/s in photonic crystal fiber *Jing Wang, Hongli Miao, Shiyuan Song, and Ronger Zheng* 471

Image Processing

- Image enhancement algorithm based on NF-ICM *Shan Gao, Cheng Li, and Duyan Bi* 474

Instrumentation, Measurement, and Metrology

- Compound parabolic concentrator applied as receiving antenna in scattering optical communication *Jingyue Fang, Hailiang Zhang, Honghui Jia, Hongwei Yin, Shengli Chang, and Shiqiao Qin* 478
- An optical fiber methane gas sensing film sensor based on core diameter mismatch *Jianchun Yang, Longjun Xu, and Weimin Chen* 482

Integrated Optics

- Dispersion characteristics of nanometer-scaled silicon rib waveguides *Lianxi Jia, Minming Geng, Lei Zhang, Lin Yang, Ping Chen, and Yuliang Liu* 485

Lasers and Laser Optics

- Effects of space duty cycle on the characteristics of fiber laser coherent beam combination *Wei Wang, Qihong Lou, Bing He, Jun Zhou, Zhen Li, Yuhao Xue, and Xia Liu* 490
- Influence of the upper waveguide layer thickness on optical field in asymmetric heterostructure quantum well laser diode *Peixu Li, Kai Jiang, Shuqiang Li, Wei Xia, Xin Zhang, Qingmin Tang, Zhongxiang Ren, and Xiangang Xu* 493
- Frequency-stabilized diode laser at 780 nm with a continuously locked time over 100 h *Tong Zhou, Xianghui Qi, Qing Wang, Wei Xiong, Jun Duan, Xiaoji Zhou, and Xuzong Chen* 496
- High power diode-pumped 914-nm Nd:YVO₄ laser *Xin Yu, Fei Chen, Rempeng Yan, Xudong Li, Junhua Yu, and Zhonghua Zhang* 499
- Investigation of mode radiation loss for microdisk resonators with pedestals by FDTD technique *Yuede Yang, Shijiang Wang, and Yongzhen Huang* 502

Nonlinear Optics

- High-average-power, high-repetition-rate dual signal optical parametric oscillator based on PPMgLN *Feng Ji, Rongsheng Lu, Baosheng Li, Baigang Zhang, and Jianquan Yao* 505

Optical Design and Fabrication

- Microlens arrays prepared via colloidal microsphere templating *Feng Zhao, Mingwei Zhu, and Peng Zhan* 508

Optical Devices

- Imitating micro-lens array for integral imaging *Qionghua Wang, Huan Deng, Tiantian Jiao, Dahai Li, and Fangning Wang* 512
- Fabrication of 3D colloidal photonic crystals in cavity of optical fiber end face *Wenhua Guo, Ming Wang, Ping Yu, and Qing Liu* 515

Physical Optics

- Far-field properties of a cylindrically polarized vector beam and its beam quality beyond the paraxial approximation *Xinting Jia, Bo Li, and Youqing Wang* 517
- Characterization of tightly focused partially coherent radially polarized vortex beams *Lina Guo, Zhilie Tang, Chongqing Liang, and Zhiliang Tan* 520

Quantum Optics

- Entanglement dynamics of W-like states in an open system *Feng Han and Yunjie Xia* 524
- Preparation of entangled states of atomic qubits via atom-cavity-laser interaction *Yu Guo and Guiyun Liu* 529
