Detectors

- Ghosting reduction in scene-based nonuniformity correction of infrared image sequences *Junqi Bai, Qian Chen, Weixian Qian, and Xianya Wang* 1113

Diffraction and Gratings

- Enhanced optical transmission through a nanoslit by coupling light between periodic strips and metal film *Huajun Zhao and Dairong Yuan* 1117

Fiber Optics and Optical Communications

- Design of a practical optical cross-connect with limited-range wavelength conversion *Zichun Le, Zhijun Zhu, Minglei Fu, and Jun Chen* 1120
- Effects of modulation amplitude and frequency of frequency-modulated fiber lasers on the threshold of the stimulated Brillouin scattering in optical fiber *Wei Chen and Zhou Meng* 1124

Image Processing

- Modified level set method with Canny operator for image noise removal *Pengcheng Wen, Xiangjun Wang, and Hong Wei* 1127

Instrumentation, Measurement, and Metrology

- Efficiency measurement of optical components in 45–110 nm range at beamline U27, HLS *Shengnan He, Ying Liu, Keqiang Qiu, Hongjun Zhou, Tonglin Huo, and Shaojun Fu* 1131

Lasers and Laser Optics

- Method for eliminating mismatching error in monolithic triaxial ring resonators *Xingwu Long and Jie Yuan* 1135
- Chaotic dynamics of active optical fiber ring resonator with optical injection *Yunqiao Wu, Zhanduo Qiao, Mingjiang Zhang, Zhuoqun Jin, and Lingzhen Yang* 1139
- Shock-timing experiments in polystyrene target *Hua Shu, Sizu Fu, Xiuguang Huang, Guo Jia, Huazhen Zhou, Jiang Wu, Junjian Ye, and Yuan Gu* 1142
- High efficiency, high power QCW diode-side-pumped Nd:YAG ceramic laser at 1064 nm based on domestic ceramic *Yuanbin Wang, Baoshan Wang, Yong Bo, Jialin Xu, Song Song, Qinjun Peng, Zuyan Xu, Wenbin Liu, Yubai Pan, and Jinghe Liu* 1144

Contents continued

All-optical realization of \times NOR logic gate using chaotic semiconductor lasers under phase modulator control	<i>Senlin Yan</i>	1147
Cost-effective tunable fiber laser based on self-seeded Fabry-Perot laser diode using a Sagnac loop reflector	<i>Min Zhu, Shilin Xiao, Meihua Bi, He Chen, and Weisheng Hu</i>	1150
Materials		
Synthesis and optical properties of PbMoO ₄ nanoplates	<i>Runping Jia and Yingqiang Zhang</i>	1152
Medical Optics and Biotechnology		
<i>In vivo</i> whole-body imaging of optical agent dynamics using full angle fluorescence diffuse optical tomography	<i>Xin Liu, Fei Liu, Daifa Wang, and Jing Bai</i>	1156
Nonlinear Optics		
Stochastic resonance in an optical bistable system subjected to cross-correlated additive white noise and multiplicative colored noise	<i>Bing Wang, Xiuqing Wu, and Jianfa Qian</i>	1160
Optical Design and Fabrication		
Optimization designed large-stroke MEMS micromirror for adaptive optics	<i>Quan Sun, Kelly He, and Edmond Cretu</i>	1163
Optical Devices		
Electrically controlled optical choppers based on holographic polymer dispersed liquid crystal gratings	<i>Jihong Zheng, Guoqiang Sun, Ken Wen, Tingting Wang, Songlin Zhuang, Yanjun Liu, and Stuart Yin</i>	1167
Viewing angle characteristics of a nematic liquid crystal cell with two crossed-grating surface substrates	<i>Wenjiang Ye, Hongyu Xing, Zhi Ren, Zhidong Zhang, Yubao Sun, and Guoying Chen</i>	1171
Optics at Surfaces		
Effective medium theory applied to frequency selective surfaces on periodic substrates	<i>Huaxin Zhu, Jinsong Gao, Jingli Zhao, Tongtong Wang, Xiaoqun Feng, Fengchao Liang, Yansong Wang, and Xin Chen</i>	1175
Surface plasmon interference formed by tightly focused higher polarization order axially symmetric polarized beams	<i>Zhehai Zhou, Qiaofeng Tan, and Guofan Jin</i>	1178
Optics in Computing		
Independent reflecting element interaction characterization for indoor visible light communication based on new generation lighting	<i>Jupeng Ding, Zhitong Huang, and Yuefeng Ji</i>	1182
Quantum Optics		
Electromagnetically induced left handedness in a V-type four-level atomic system	<i>Zhenqing Zhang, Zhengdong Liu, Shuncai Zhao, and Jun Zheng</i>	1187
Entanglement dynamics of two atoms successively passing a cavity	<i>Qinghong Liao, Guangyu Fang, Yueyuan Wang, M. A. Ahmad, and Shutian Liu</i>	1191
Scattering		
Scattering of an unpolarized Bessel beam by spheres	<i>Xiubo Ma and Enbang Li</i>	1195
Thin Films		
Modeling of silicon-nanocrystal formation in amorphous silicon/silicon dioxide multilayer structure	<i>Keyong Chen, Xue Feng, and Yidong Huang</i>	1199
Ultrafast Optics		
Fabrication and enhanced optical absorption of submicrometer pits array on 6H-SiC via two-beam interference of femtosecond laser	<i>Yi Zhang, Xin Jia, Pingxin Xiong, and Tianqing Jia</i>	1203
