Fiber optics and optical communications

- Fiber in-line Fabry-Pérot interferometer for simultaneous measurement of reflective index and temperature *Xiaoqi Ni, Ming Wang, and Dongmei Guo* 050601
- Dual-polarization fiber grating laser-based laser Doppler velocimeter *Zeyuan Kuang, Linghao Cheng, Yizhi Liang, Hao Liang, and Bai-Ou Guan* 050602
- Combined nonlinear effects for UV to visible wavelength generation in a photonic crystal fiber *Binbin Yan, Jinhui Yuan, Xinzhu Sang, Kuiru Wang, and Chongxiu Yu* 050603
- Refractive index and temperature sensing characteristics of an optical fiber sensor based on a tapered single mode fiber/polarization maintaining fiber *Zaihang Yang, Hao Sun, Tingting Gang, Nan Liu, Jiacheng Li, Fei Meng, Xueguang Qiao, and Manli Hu* 050604
- Coherent ONU based on 850 μm -long cavity-RSOA for next-generation ultra-dense access network *Guang Yong Chu, Adolfo Lerín, Iván N. Cano, Victor Polo, and Josep Prat* 050605
- Temperature-compensated dual-polarization fiber grating laser sensors *Jianming Zhu, Long Jin, Yizhi Liang, Linghao Cheng, and Bai-Ou Guan* 050606
- Multi-hop relay-based maritime visible light communication *Hyeong-Ji Kim, Samrat Vikramaditya Tiwari, and Yeon-Ho Chung* 050607
- Direct-detection OFDM-QPSK system performance improvement enabled by DFT spread and receiver-based ISFA algorithm *Jie Su, Xinying Li, and Jianjun Yu* 050608

Holography

- Multiframe full-field heterodyne digital holographic microscopy *Xiaoyu Lv, Bin Xiangli, Wenxi Zhang, Zhou Wu, Yang Li, Xinxin Kong, and Zhiliang Zhou* 050901

Imaging systems

- Highly efficient mid-infrared metasurface based on metallic rods and plate *Qiqi Sun, Shuming Wang, Hui Liu, and Shining Zhu* 051101

Lasers and laser optics

- Nanoscale-resolved patterning on metal hydrazine complex thin films using diode-based maskless laser writing in the visible light regime *Kui Zhang,* Zhimin Chen, Yongyou Geng, Yang Wang, and Yiqun Wu* 051401

Contents continued

Ultra-fast diagnosis of shock waves and plasma at front and rear surfaces in the bulk of fused silica induced by an Nd:YAG pulse laser 051402

Qiang Zhou, Rong Qiu, Yong Jiang, Xiang Gao, Yongjia Yang, Huili Wang, and Huan Ren

Compact phase-lock loop for external cavity diode lasers 051403

Chunhua Wei, Shuhua Yan, Aiai Jia, Yukun Luo, Qingqing Hu, and Zehuan Li

Diode-pumped composite ceramic Nd:YAG planar waveguide amplifier with 327 mJ output at 100 Hz repetition rate 051404

Jiao Liu, Lin Ge, Liwen Feng, Hao Jiang, Hua Su, Tangjian Zhou, Juntao Wang, Qingsong Gao, and Jiang Li

Materials

Preliminary study of the damage resistance of type I doubler KDP crystals at 532 nm 051601

Yinbo Zheng, Lei Ding, Xinda Zhou, Rongsheng Ba, Jing Yuan, Honglei Xu, Xiaoyu Yang, Bo Chen, Jin Na, Yajun Li, and Wanguo Zheng

Investigation of low-temperature cathodoluminescence mechanism of Er-doped GaN thick films by ion implantation 051602

Xiaodan Wang, Yajuan Mo, Xionghui Zeng, Hongmin Mao, Jianfeng Wang, and Ke Xu

Fabrication and characteristics of silicon-rich oxide thin films with controllable compositions 051603

Shiyu Zhang, Quanjun Pan, Xu Fang, Kening Mao, and Hui Ye

Optical design and fabrication

Parallel fabrication of silicon concave microlens array by femtosecond laser irradiation and mixed acid etching 052201

An Pan, Tao Chen, Cunxia Li, and Xun Hou

Optical devices

Graphene field effect transistor-based terahertz modulator with small operating voltage and low insertion loss 052301

Jingbo Liu, Pingjian Li, Yuanfu Chen, Xinbo Song, Fei Qi, Binjie Zheng, Jiarui He, Qiye Wen, and Wanli Zhang

Tunable multiple plasmon-induced transparency with side-coupled rectangle cavities 052302

Dongdong Liu, Qiubo Fan, Maofei Mei, Jicheng Wang, Yuewu Pan, Daoxiang Teng, and Jian Lu

Spectroscopy

Study on low-temperature heat treatment of purplish red sapphire 053001

Xiaozhen Han, Yan Kang, Xiao Wu, Xueliang Liu, and Shouguo Guo
