## FOCUS ISSUE OF ENABLING SCIENCE AND TECHNOLOGY FOR HIGH-SPEED OPTICAL COMMUNICATIONS

### Editorial

- Editorial for Focus Issue on Enabling Science and Technology for High-Speed Optical Communications *Jianjun Yu* 815

### Papers

#### High-Speed Signal Long-Haul Transmission

- An experiment of PMD compensation in 40-Gb/s PSBT transmission system *Feng Tian, Lixia Xi, Xiaoguang Zhang, Xuan Weng, Guangyong Zhang, and Qianjin Xiong* 816
- Heterodyne direct-detection OOFDM system with low sampling rate *Lin Cheng, He Wen, Xiaoping Zheng, Hanyi Zhang, and Yili Guo* 819
- Novel schemes to generate multi-level modulation formats for ultra-capacity coherent detection transmission systems *Jianjun Yu and Xiang Zhou* 823
- 100-Gb/s undersea transmission with high spectral efficiency using pre-filtered QPSK modulation format *J.-X. Cai, Y. Cai, C. R. Davidson, D. G. Foursa, A. Lucero, O. Sinkin, W. Patterson, A. Pilipetskii, G. Mohs, and Neal S. Bergano* 831
- High speed optical transmission utilizing constant envelope modulation based on frequency shift keying and minimum-shift keying *Nan Chi, Wuliang Fang, Yufeng Shao, Junwen Zhang, Bo Huang, Jiangbo Zhu, and Li Tao* 837
- Nonlinear polarization effects and mitigation in polarization-division-multiplexed coherent transmission systems *Chongjin Xie* 844
- Novel orthogonal modulation format DRZ-FSK/DPSK for high-speed long-haul optical communication *Junwen Zhang, Yufeng Shao, Wuliang Fang, Bo Huang, Li Tao, Jiangbo Zhu, and Nan Chi* 852
- Analysis of smooth phase modulation formats compared with conventional QPSK and BPSK using coherent detection *Bo Huang, Nan Chi, Yufeng Shao, Junwen Zhang, Jiangbo Zhu, Wei Li, and Wen Liu* 856

Contents continued

## Optical and Electrical Signal Processing

- Simultaneous multichannel NRZ-to-RZ format conversion of 4-ASK signal based on phase-intensity hybrid modulation and dispersion compensation fiber *Wenke Yu, Caiyun Lou, Xiaofan Zhao, and Dan Lu* 859
- Digital signal processing for coherent multi-level modulation formats *Xiang Zhou* 863
- Phase pre-emphasis technique in real-time AOS-OFDM system *Hongwei Chen, Chao Tang, Feifei Yin, Minghua Chen, and Shizhong Xie* 871
- Phase pre-emphasis for PAPR reduction in optical OFDM systems based on OIDFT or time lens *Jing Shao, Wei Li, and Xiaojun Liang* 875
- Non-feedback precoder for optical DQPSK modulation *Lumin Zhang, Yi Dong, Zhaohui Li, Hao He, and Weisheng Hu* 881
- Construction of optimal 2D variable-weight optical orthogonal codes for high-speed OCDMA networks *Xiyang Li, Pingzhi Fan, and Xianfu Lei* 884
- Blind frequency offset estimation based on cyclic prefix and virtual subcarriers in CO-OFDM system *Yaojun Qiao, Zhansheng Wang, and Yuefeng Ji* 888
- ### Access System
- A novel OFDM-CPM modulation scheme and its application in WDM-PON *Yufeng Shao, Junwen Zhang, Wuliang Fang, Shumin Zou, Xinying Li, Bo Huang, Nan Chi, and Siyuan Yu* 894
- RSOA-based distributed access long reach hybrid WDM-TDM PON with OADMs *Yinbo Qian, Minming Zhang, Deming Liu, Lei Deng, and Kang Yang* 899
- Photonic ultra-wideband monocycle pulses generation using semiconductor optical amplifier and electro-absorber in parallel *Bingbing Wu, Jian Wu, Kun Xu, Xiaobin Hong, Junyi Zhang, and Jintong Lin* 902
- Optical homodyne receiver utilizing image rejection in FSK/ASK re-modulation WDM-PON *Yuan Fang, Xiao Liu, Xi Zheng, Chunning Hou, Wuliang Fang, Bo Huang, Xinying Li, Shumin Zou, Junwen Zhang, Yufeng Shao, and Nan Chi* 906
- ### Passive Optical Components
- Integrated nano-structured silicon waveguides and devices for high-speed optical communications *Alan E. Willner, Lin Zhang, Yang Yue, and Xiaoxia Wu* 909
- All-optical functions based on semiconductor ring lasers *Siyuan Yu* 918
