

CONTENTS

Special Issue: Artificial Intelligence Techniques for the Smart Grid

Guest editors: Nick Bassiliades and Georgios Chalkiadakis

- 1 Artificial Intelligence Techniques for the Smart Grid  
*Nick Bassiliades and Georgios Chalkiadakis*
- 3 An innovative soft computing system for smart energy grids cybersecurity  
*Konstantinos Demertzis, Lazaros S. Iliadis and Vardis-Dimitrios Anezakis*
- 25 Customized time-of-use pricing for small-scale consumers using multi-objective particle swarm optimization  
*A. Chrysopoulos and P. A. Mitkas*
- 48 Applying extended Kalman filters to adaptive thermal modelling in homes  
*Muddasser Alam, Alex Rogers, James Scott, Kamran Ali and Frederik Auffenberg*
- 66 Introduction of plug-in hybrid electric vehicles in an isolated island system  
*Christos S. Ioakimidis and Konstantinos N. Genikomsakis*
- 84 Modelling of household electricity consumption with the aid of computational intelligence methods  
*Kostas Karatzas and Nikos Katsifarakis*
- 97 Energy management in solar microgrid via reinforcement learning using fuzzy reward  
*Panagiotis Kofinas, George Vouros and Anastasios I. Dounis*
- 116 Predicting agent performance in large-scale electricity demand shifting  
*Charilaos Akasiadis and Alexandros Georgogiannis*
