

# INTERNATIONAL JOURNAL OF HEAT AND MASS TRANSFER

ABSTRACTED/INDEXED IN: Applied Mechanics Reviews, Applied Science & Technology Abstracts, Applied Science and Technology Index, Cambridge Scientific Abstracts, Chemical Abstracts, Chemical Engineering Abstracts, Current Contents/Engineering, Computing & Technology, Current Contents/Social & Behavioral Sciences, Current Technology Index, Engineering Index, INSPEC, MSCl, Mechanics, PASCAL/CNRS, Petroleum Abstracts, Research Alert, TCEA, Zentralblatt MATH. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

Volume 53, issues 9-10

April 2010

## CONTENTS

L. I. ZAICHIK, O. SIMONIN and V. M. ALIPCHENKOV	1613	Turbulent collision rates of arbitrary-density particles
A. BARLETTA, M. CELLI and D. A. NIELD	1621	Unstably stratified Darcy flow with impressed horizontal temperature gradient, viscous dissipation and asymmetric thermal boundary conditions
J. LI, J. DING and J. YANG	1628	Solidification and melting behaviors and characteristics of molten salt in cold filling pipe
K. D. COLE, C. M. TARAWNEH, A. A. FUENTES, B. M. WILSON and L. NAVARRO	1636	Thermal models of railroad wheels and bearings
K. KHANAFER, A. ALAMIRI and I. POP	1646	Fluid-structure interaction analysis of flow and heat transfer characteristics around a flexible microcantilever in a fluidic cell
R. REPAKA and V. V. SATYAMURTY	1654	Local and average heat transfer in the thermally developing region of an asymmetrically heated channel
R. CHOUDHURY and D. DEY	1666	Free convective visco-elastic flow with heat and mass transfer through a porous medium with periodic permeability
R. KATHIRAVAN, R. KUMAR, A. GUPTA and R. CHANDRA	1673	Preparation and pool boiling characteristics of copper nanofluids over a flat plate heater
M. K. RAMIS and G. JULANI	1682	Heat and fluid flow characteristics of liquid sodium flowing past a nuclear fuel element with non-uniform energy generation
Y. VAROL, H. F. OZTOP, M. MOBEDI and I. POP	1691	Visualization of heat flow using Bejan's heatline due to natural convection of water near 4°C in thick walled porous cavity
A. VEERARAGAVAN and C. CADOU	1699	Theoretical study of conjugate heat transfer effects on temperature profiles in parallel flow with embedded heat sources
J.-Y. JUNG, Y. T. KANG and J. KOO	1712	Development of a new simulation model of spin coating process and its application to optimize the 450 mm wafer coating process
F. SUÁREZ, S. W. TYLER and A. E. CHILDRESS	1718	A fully coupled, transient double-diffusive convective model for salt-gradient solar ponds
H. J. LEE and S. YAO	1731	System instability of evaporative micro-channels
H. J. LEE, D. Y. LIU and S. YAO	1740	Flow instability of evaporative micro-channels
A. ASHARI, T. M. BUCHER, H. V. TAFRESHI, M. A. TAHIR and M. S. A. RAHMAN	1750	Modeling fluid spread in thin fibrous sheets: Effects of fiber orientation
W. WU and C. Y. CHING	1759	Laminar natural convection in an air-filled square cavity with partitions on the top wall
W. WU, H. BOSTANCI, L. C. CHOW, Y. HONG, M. SU and J. P. KIZITO	1773	Nucleate boiling heat transfer enhancement for water and FC-72 on titanium oxide and silicon oxide surfaces
W. LI and Z. WU	1778	A general correlation for evaporative heat transfer in micro/mini-channels

|--|------|--|
| M. S. ABEL, M. M. NANDEPPANAVAR and S. B. MAJAPATIL              | 1788 | Heat transfer in a second grade fluid through a porous medium from a permeable stretching sheet with non-uniform heat source/sink                  |
| H.-D. WANG, B.-Y. CAO and Z.-Y. GUO                              | 1796 | Heat flow choking in carbon nanotubes  |
| C.-X. WANG, S.-H. XU, Z.-W. SUN and W.-R. HU                     | 1801 | A study of the influence of initial liquid volume on the capillary flow in an interior corner under microgravity                                   |
| F. CHAUVET, S. CAZIN, P. DURU and M. PRAT                        | 1808 | Use of infrared thermography for the study of evaporation in a square capillary tube   |
| T. BASAK, S. ROY, S. K. SINGH and I. POP                         | 1819 | Analysis of mixed convection in a lid-driven porous square cavity with linearly heated side wall(s)  |
| X. WEI, T. KONG, H. ZHU and L. WANG                              | 1841 | CuS/Cu <sub>2</sub> S nanofluids: Synthesis and thermal conductivity   |
| J. LU and W.-Q. LU   | 1844 | Blood flow velocity and ultra-filtration velocity measured by CT imaging system inside a densely bundled hollow fiber dialyzer                     |
| V. I. DEEV, K. V. KUTSENKO, A. A. LAVRUKHIN and V. S. KHARITONOV | 1851 | Influence of initial heat generation on dynamic characteristics of transient boiling crisis of water   |
| O. WEIN  | 1856 | Convective diffusion from strip-like micro-probes into colloidal suspensions   |
| O. WEIN  | 1868 | Convective diffusion from convex microprobes into colloidal suspensions: The edge effects  |
| O. WEIN  | 1874 | Autocalibration of electrodiffusion friction probes in microdispersion liquids   |
| R.-L. LIN  | 1882 | Explicit full field analytic solutions for two-dimensional heat conduction problems with finite dimensions   |
| I. S. GLAZNEV and YU. I. ARISTOV                                 | 1893 | The effect of cycle boundary conditions and adsorbent grain size on the water sorption dynamics in adsorption chillers                             |
| G. K. AGRAWAL, S. CHAKRABORTY and S. K. SOM                      | 1899 | Heat transfer characteristics of premixed flame impinging upwards to plane surfaces inclined with the flame jet axis                               |
| L. HAO and P. CHENG  | 1908 | Pore-scale simulations on relative permeabilities of porous media by lattice Boltzmann method  |
| Z. LIU, X. YANG, G. WANG and G. GUO                              | 1914 | Influence of carbon nanotube suspension on the thermal performance of a miniature thermosyphon   |
| Y. QIU and Z. LIU  | 1921 | The theoretical simulation of the effect of solid-liquid contact angle on the critical heat flux of saturated water jet boiling on stagnation zone |
| H.-W. WU and R.-H. WANG  | 1927 | Convective heat transfer over a heated square porous cylinder in a channel   |
| S. C. WU, G. R. LIU, X. Y. CUI, T. T. NGUYEN and G. Y. ZHANG     | 1938 | An edge-based smoothed point interpolation method (ES-PIM) for heat transfer analysis of rapid manufacturing system                                |
| C. XU and A. FAGHRI  | 1951 | Water transport characteristics in a passive liquid-feed DMFC  |
| W. LI and Z. WU  | 1967 | A general criterion for evaporative heat transfer in micro/mini-channels   |
| Z. CHE, T. N. WONG and N.-T. NGUYEN                              | 1977 | An analytical model for a liquid plug moving in curved microchannels   |
| S. WANG, A. FAGHRI and T. L. BERGMAN                             | 1986 | A comprehensive numerical model for melting with natural convection  |
| C.-H. CHENG, S.-Y. HUANG and T.-C. CHENG                         | 2001 | A three-dimensional theoretical model for predicting transient thermal behavior of thermoelectric coolers  |
| Y. CHEN, X. LIANG, Y. LIU, J. BAI and B. XU                      | 2012 | Finite element modeling of coating formation and transient heat transfer in the electric arc spray process   |
