## ON THE WEB THIS WEEK

### >> Science Podcast

On this week's show: links between intensive farming and drought sensitivity in corn and a roundup of stories from our daily news site.

### >> Find More Online

Check out *Science Express*, the weekly podcast, videos, daily news, our research journals, and *Science Careers* at [www.sciencemag.org](http://www.sciencemag.org).

## COVER

A blood star (*Henricia leviuscula*) near Whidbey Island, Washington state. It is one of 10 species of sea star that appear to be affected by a mysterious wasting syndrome on the west and east coasts of North America. Various levels of mortality have been confirmed in 10 other species, making this the largest documented die-off of echinoderms. See page 464 and [http://scim.ag/slide\\_6183](http://scim.ag/slide_6183).

## DEPARTMENTS

- 447 This Week in *Science*
- 450 Editors' Choice
- 452 *Science* Staff
- 539 New Products
- 540 *Science* Careers

## RESEARCH ARTICLE

- 487 **Neuronal Activity Promotes Oligodendrogenesis and Adaptive Myelination in the Mammalian Brain**  
E. M. Gibson et al.  
Optogenetic stimulation of the mouse motor cortex incites proliferation of myelin-producing cells and axonal myelination.  
*Research Article Summary; for full text:*  
<http://dx.doi.org/10.1126/science.1252304>  
>> *Perspective p. 480*

## REPORTS

- 488 **Edge Nonlinear Optics on a MoS<sub>2</sub> Atomic Monolayer**  
X. Yin et al.  
Second-harmonic generation is used to probe and characterize atomically thin layers of molybdenum disulfide.  
>> *Perspective p. 483*
- 491 **Probing Exchange Pathways in One-Dimensional Aggregates with Super-Resolution Microscopy**  
L. Albertazzi et al.  
One-dimensional supramolecular aggregates can swap constituent monomers through a homogeneous exchange mechanism.
- 495 **Interfacial Effects in Iron-Nickel Hydroxide-Platinum Nanoparticles Enhance Catalytic Oxidation**  
G. Chen et al.  
An alloy catalyst for room-temperature CO creates sites for O<sub>2</sub> activation when the CO<sub>2</sub> product is released.
- 499 **Manipulation of Discrete Nanostructures by Selective Modulation of Noncovalent Forces**  
T. Fukino et al.  
Self-assembled, large-diameter ferrocene-based nanotubes can be cleaved into stable rings and then reassembled into tubes.  
>> *Perspective p. 482*
- 504 **Vibrationally Promoted Dissociation of Water on Ni(111)**  
P. M. Hundt et al.  
The barrier to this reaction, a key step in methane steam reforming, is mainly surmounted by vibrational energy.
- 508 **Faster Decomposition Under Increased Atmospheric CO<sub>2</sub> Limits Soil Carbon Storage**  
K. J. van Groenigen et al.  
Soil carbon turnover increases as atmospheric carbon dioxide rises, which limits carbon accumulation in soils.

- 510 **Genomic Signatures of Specialized Metabolism in Plants**  
L. Chae et al.  
A comparative genomic analysis of plant metabolism can distinguish the evolution of specialized versus primary metabolism.
- 513 **Deception by Flexible Alarm Mimicry in an African Bird**  
T. P. Flower et al.  
A clever African bird flexibly mimics the calls of other species to keep fooling them into abandoning their food.
- 516 **Greater Sensitivity to Drought Accompanies Maize Yield Increase in the U.S. Midwest**  
D. B. Lobell et al.  
Selective breeding focused on increasing corn and soybean yields has left a weakness in corn drought tolerance.  
>> *Perspective p. 484; Science Podcast*
- 519 **Polarization of the Effects of Autoimmune and Neurodegenerative Risk Alleles in Leukocytes**  
T. Raj et al.  
Genetic variants affecting gene expression show both shared and specific immune cell type effects.
- 523 **Reconstructing the DNA Methylation Maps of the Neandertal and the Denisovan**  
D. Gokhman et al.  
Estimates of differentially methylated nucleotides illuminate differences between modern human and ancient hominid bones.
- 527 **Chemical Inhibition of NAT10 Corrects Defects of Laminopathic Cells**  
D. Larrieu et al.  
The small molecule Remodelin can correct nuclear architecture defects and improve cellular fitness of progeric human cells.
- 533 **Molecular-Level Functional Magnetic Resonance Imaging of Dopaminergic Signaling**  
T. Lee et al.  
Development of a molecular functional magnetic resonance imaging tool to quantify dopamine release simultaneously in different brain regions is shown.
