

# IEEE TRANSACTIONS ON INFORMATION THEORY

A Journal Devoted to the Theoretical and Experimental Aspects of Information Transmission, Processing, and Utilization

JANUARY 2010

VOLUME 56

NUMBER 1

IETTAW

(ISSN 0018-9448)

2009 IEEE Information Theory Society Paper Award  
2009 IEEE Communications Society and Information  
Theory Society Joint Paper Award

## PAPERS

### Shannon Theory

|   |    |
|---|----|
| R. G. Gallager and B. Nakiboğlu                           | 6  |
| T. E. Duncan  | 18 |
| K. Eswaran, A. D. Sarwate, A. Sahai,<br>and M. C. Gastpar | 25 |
| R. H. Etkin, N. Merhav, and E. Ordentlich                 | 40 |
| Y.-H. Kim   | 57 |
| A. Kirsch and E. Drinea                                   | 86 |

### Coding Theory and Techniques

|  |     |
|--|-----|
| S. S. Adams, N. Karst, and M. K. Murugan                                 | 103 |
| E. Ben-Sasson, S. Kopparty,<br>and J. Radhakrishnan                      | 113 |
| I. E. Bocharova, R. Johannesson,<br>B. D. Kudryashov, and V. V. Zyablov  | 121 |
| Y. Chang and C.-D. Lee   | 130 |
| Y. M. Chee, S. H. Dau, A. C. H. Ling, and S. Ling                        | 140 |
| M.-C. Chiu   | 152 |
| N.-D. Đào and C. Tellambura  | 168 |
| L. Dolecek, Z. Zhang, V. Anantharam,<br>M. J. Wainwright, and B. Nikolić | 181 |
| S. Fanali and M. Giulietti   | 202 |
| P. D. Fiore  | 211 |
| Z. Liu and M. Mitzenmacher   | 224 |
| J. Lu and J. M. F. Moura   | 233 |
| F. Oggier and B. Hassibi   | 250 |
| J. Rifà and V. A. Zinoviev   | 266 |
| S. Srinivasan and S. S. Pietrobon  | 273 |
| C.-H. Wang, M.-C. Chiu, and C.-C. Chao                                   | 296 |

(730B0001TIT)

00206

10-W2023 -1

*W. Zhang, M. Lentmaier, K. Sh. Zigangirov,  
and D. J. Costello Jr.*

### Braided Convolutional Codes: A New Class

#### *Cooommunications*

*K. Bhattacharjee and K. R. Narayanan*

A Note on the Rate of Decay of Mean-Squared Error With SNR  
for the AWGN Channel

332

*M. Chiani, M. Z. Win, and H. Shin  
A. K. Dhulipala, C. Fragouli, and A. Orlitsky  
G. Durisi, U. G. Schuster, H. Bölcseki,  
and S. Shamai (Shitz)*

MIMO Networks: The Effects of Interference

336

Silence-Based Communication

350

*M. R. McKay, I. B. Collings, and A. M. Tulino*

Noncoherent Capacity of Underspread Fading Channels

367

Achievable Sum Rate of MIMO MMSE Receivers: A General Analytic Framework

396

#### *Communication Networks*

*R. Mudumbai, J. Hespanha, U. Madhow,  
and G. Barriac  
A. Özgür, R. Johari, D. N. C. Tse, and O. Léveque*

Distributed Transmit Beamforming Using Feedback Control

411

Information-Theoretic Operating Regimes of Large Wireless Networks

427

#### *Complexity and Cryptography*

*P. Harsha, R. Jain, D. McAllester,  
and J. Radhakrishnan  
T. Tian and W.-F. Qi  
F. Vercauteren*

The Communication Complexity of Correlation

438

2-Adic Complexity of Binary  $m$ -Sequences

450

Optimal Pairings

455

#### *Quantum Information Theory*

*A. W. Harrow and P. W. Shor  
P. Tan and J. Li*

Time Reversal and Exchange Symmetries of Unitary Gate Capacities

462

Efficient Quantum Stabilizer Codes: LDPC and LDPC-Convolutional Constructions

476

#### *Compressed Sensing*

*M. Akçakaya and V. Tarokh  
Y. C. Eldar and H. Rauhut  
J. A. Tropp, J. N. Laska, M. F. Duarte,  
J. K. Romberg, and R. G. Baraniuk*

Shannon-Theoretic Limits on Noisy Compressive Sampling

492

Average Case Analysis of Multichannel Sparse Recovery Using Convex Relaxation

505

Beyond Nyquist: Efficient Sampling of Sparse Bandlimited Signals

520

#### *Sequences*

*N. Alon, S. Litsyn, and A. Shpunt  
Q.-X. Zheng and W.-F. Qi*

Typical Peak Sidelobe Level of Binary Sequences

545

Distribution Properties of Compressing Sequences Derived From  
Primitive Sequences Over  $\mathbb{Z}/(p^e)$

555

#### *Source Coding*

*S. Tavildar, P. Viswanath, and A. B. Wagner*

The Gaussian Many-Help-One Distributed Source Coding Problem

564

#### *Detection and Estimation*

*Q. M. Chaudhari, E. Serpedin, and J.-S. Kim*

Energy-Efficient Estimation of Clock Offset for Inactive Nodes  
in Wireless Sensor Networks

582

#### *Pattern Recognition, Statistical Learning and Inference*

*M. Sauvé*

Piecewise Polynomial Estimation of a Regression Function

597

#### *Signal Processing*

*C. Bardaro, P. L. Butzer, R. L. Stens, and G. Vinti*

Prediction by Samples From the Past With Error Estimates Covering  
Discontinuous Signals

614

#### *Random Processes*

*K. Jung, D. Shah, and J. Shin*

Distributed Averaging Via Lifted Markov Chains

634
