THIS WEEK

EDITORIALS

427 NEUROSCIENCE

A priceless resource

An international bank for child and fetal brains is needed

427 ANIMALS IN RESEARCH

Animal talk

Germany must improve dialogue on animal experiments

428 PUBLISHING

Scientific climate

Preprints and conference debates are valid parts of the scientific process

WORLD VIEW

429 **Piecemeal cuts won't add up to radical reductions**

Jane C S Long

The energy system requires reinvention to meet greenhouse-gas targets

RESEARCH HIGHLIGHTS

430 **SELECTIONS FROM THE SCIENTIFIC LITERATURE**

Hendra vaccine hope / Fear of predation / Updated cycads / A hydrophobic powder / Tool-using birds not so bright / Antitumour sirtuin

SEVEN DAYS

432 **THE NEWS IN BRIEF**

Earthquake in Turkey / Birth of a planet / MS drug shows promise / Floods in Thailand / ESA launches first part of Galileo

CAREERS

547 FRANCE

Peak of potential

Grenoble's plans for a vibrant science sector

549 TURNING POINT

The science is good in New York, says Josefina del Marmol, but don't mention the weather

549 CAREER BRIEFS

NATURE JOBS ADVERTISING FEATURE

Spotlight on France

NEWS IN FOCUS

435 **NUCLEAR DISASTER**

Fukushima radiation release was higher than claimed — but could have been worse

437 **ENVIRONMENTAL SCIENCE**

Doubts surface over source of arsenic that is poisoning Asian water

438 **POLICY**

US House seeks to cut biomedical salaries

439 **GLOBAL HEALTH**

Malaria vaccine shows only limited promise

440 **GENETICS**

Non-invasive screen for unborn babies reaches the market

441 **REGENERATIVE MEDICINE**

Seeing the bright side of Europe's stem-cell patent ban

FEATURES

442 **NEUROSCIENCE**

Brain child

The study and treatment of mental disorders would benefit hugely from access to children's brain tissue

GENOMICS

Black death

Draft sequence of 660-year-old bacterium sheds fresh light on the plague that swept through fourteenth-century Europe **PAGE 444**

COMMENT

447 **ENVIRONMENTAL CHANGE**

Migration as adaptation

Richard Black, Stephen R G Bennett, Sandy M Thomas & John R Beddington
Mobility helps people to cope with rapid environmental change

450 **CLIMATE CHANGE**

The next dust bowl

Joseph Romm
We must plan to combat the potentially catastrophic effects of drought on agriculture

BOOKS & ARTS

453 **PSYCHOLOGY**

A farewell to arms

Martin Daly

454 **SOCIOLOGY**

The illustrated scientist

Margo DeMello

455 **BOOKS IN BRIEF**

456 **BIOTECHNOLOGY**

DNA dollars

Linnaea Ostroff

457 **Q&A**

The mathemagician

Persi Diaconis shares some of the secrets behind the best magic tricks

CORRESPONDENCE

458 Uncertain future for Iraq's wounded / Now Brazil's wetlands are threatened / Beating mental illness / Online debate on research funding

OBITUARY

460 **Ralph Steinman (1943–2011)**

Michel C Nussenzweig & Ira Mellman

FUTURES

552 **An easy sale**

Biren Shah

CONTENTS

27 October 2011 / Vol 478 / Issue No 7370

RESEARCH

NEW ONLINE

461 Papers published this week at nature.com

NEWS & VIEWS

462 ATMOSPHERIC SCIENCE

An Arctic ozone hole?

Ozone depletion over the Arctic in spring 2011

Rolando R Garcia [SEE ARTICLE P.469](#)

463 BIOCHEMISTRY

Suicide of a protein

An enzyme acts as a reagent in thiamine biosynthesis

Peter Roach [SEE LETTER P.542](#)

464 PLANETARY SCIENCE

Eris under scrutiny

New size estimate for dwarf planet Eris

Amanda Gulbis [SEE LETTER P.493](#)

465 GENOMICS

Plague's progress

The Black Death was the ancestor of all subsequent plagues

Edward C Holmes [SEE LETTER P.506](#)

466 ASTROPHYSICS

Shedding light on the fabric of space-time

Distant cosmic sources and space-time fuzziness

Giovanni Amelino-Camelia

467 BIOPHYSICS

More than a bystander

Water's active role in protein binding and aggregation

Philip Ball

ARTICLES

469 CLIMATE SCIENCE Unprecedented Arctic ozone loss in 2011

G L Manney et al. [SEE N&V P.462](#)

476 GENOMICS A high-resolution map of human evolutionary constraint using 29 mammals

K Lindblad-Toh et al.

483 NEUROSCIENCE Spatio-temporal transcriptome of the human brain

H J Kang et al.

LETTERS

490 ASTRONOMY Kelvin-Helmholtz instabilities as the source of inhomogeneous mixing in nova

ON THE COVER

Spade work

The 1987 excavation of a fourteenth-century cemetery on the site of London's old Royal Mint. The genome of the Black Death pathogen has been pieced together from DNA collected from plague pits, revealing a sequence very similar to today's *Yersinia pestis* strains. [PAGES 444, 465 & 506](#)

explosions

J Casanova, J José, E García-Berro, S N Shore & A C Calder

493 PLANETARY SCIENCE A Pluto-like radius and a high albedo for the dwarf planet Eris from an occultation

B Sicardy et al. [SEE N&V P.464](#)

497 PHYSICS Laser cooling and real-time measurement of the nuclear spin environment of a solid-state qubit

E Togan, Y Chu, A Imamoglu & M D Lukin

502 INORGANIC CHEMISTRY Structure and reactivity of a mononuclear non-haem iron(III)-peroxo complex

J Cho et al.

506 GENOMICS A draft genome of *Yersinia pestis* from victims of the Black Death

K I Bos et al. [SEE N&V P.465](#)

511 NEUROSCIENCE A natural polymorphism alters odour and DEET sensitivity in an insect odorant receptor

M Pellegrino, N Steinbach, M C Stensmyr, B S Hansson & L B Vosshall

515 IMMUNOLOGY STING is a direct innate immune sensor of cyclic di-GMP

D L Burdette et al.

519 NEUROSCIENCE Temporal dynamics and genetic control of transcription in the human prefrontal cortex

C Colantuoni et al.

524 CANCER RNAi screen identifies Brd4 as a therapeutic target in acute myeloid leukaemia

J Zuber et al.

529 CANCER Inhibition of BET recruitment to chromatin as an effective treatment for MLL-fusion leukaemia

M A Dawson et al.

534 STRUCTURAL BIOLOGY Active-site remodelling in the bifunctional fructose-1,6-bisphosphate aldolase/phosphatase

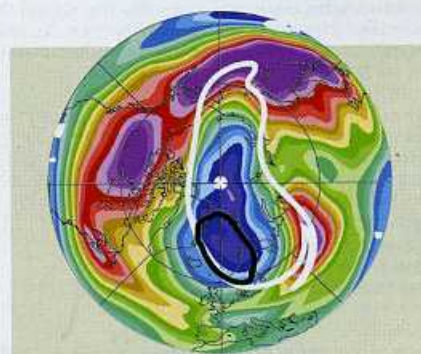

J Du, R F Say, W Lü, G Fuchs & O Einsle

538 STRUCTURAL BIOLOGY Structural basis for the bifunctionality of fructose-1,6-bisphosphate aldolase/phosphatase

S Fushinobu, H Nishimasu, D Hattori, H-J Song & T Wakagi

542 BIOCHEMISTRY *Saccharomyces cerevisiae* THI4p is a suicide thiamine thiazole synthase

A Chatterjee et al. [SEE N&V P.463](#)

CLIMATE SCIENCE

North hole

Arctic ozone loss in 2011 had a rather familiar look. [PAGE 469](#)
