THIS WEEK

EDITORIALS

443 POLICY

Vive la révolution

Tunisia's move towards democracy merits support from the scientific community

444 FOOD SAFETY

What comes first?

US Congress must ensure its food-regulation law gets the funds it needs

444 SOLAR SCIENCE

Staring at the Sun

Better measurements may leave researchers in the shade

WORLD VIEW

445 Of course scientists can communicate

Tim Radford

Given the opportunity, most scientists are well able to explain their work

RESEARCH HIGHLIGHTS

446 SELECTIONS FROM THE SCIENTIFIC LITERATURE

A new TB vaccine / Bitterness as a digestif / 'Ortho' and 'para' water separated / A novel Dead Sea microbe / The global cooling effect of plants

SEVEN DAYS

448 THE NEWS IN BRIEF

Dutch students take to the street / Theft halts European carbon market / Daisy removed from endangered list / Pfizer buys antibody technology

CAREERS

569 INDUSTRY-ORIENTED EDUCATION

The other path

Funding cuts threaten professional masters degree programmes

570 COLUMN

The care and maintenance of your adviser

Hugh Kearns & Maria Gardiner

Mentors need a little mentorship too

571 TURNING POINT

The UK science-funding freeze is a concern, says neuroscientist Ian Simons

NEWS IN FOCUS

451 ASTRONOMY

Brazil offers boost to European bid to build massive telescope in Chile

453 POLICY

Tunisian scientists relish prospect of greater academic freedom

455 GENETICS

China offers funds and target population to gene-variation study

457 SOLAR SCIENCE

Glory satellite promises an accurate view of the Sun

458 NEUROIMAGING

Diagnostic for Alzheimer's disease offers boost to research — but not yet to therapy

FEATURES

462 POLICY

Panama's big ambition

A scientific renaissance in Central America

MARINE RESEARCH

Sea change

Wang Pinxian plots a course for Chinese oceanography **PAGE 460**

COMMENT

465 CONSERVATION

Regulate trade in rare plants

Patrick D Shirey & Gary A Lambert

BOOKS & ARTS

468 EPIDEMIOLOGY

Epidemic of panic

Melvin Konner

469 BOOKS IN BRIEF

470 BIOGRAPHY

Ecology's midwife

John Whitfield

CULTURE

In the frame

Colin Martin welcomes a new gallery of nineteenth-century Chinese natural history paintings **PAGE 471**

CORRESPONDENCE

472 Women lose out in competition for scholars' awards / Peak coal a distant prospect / Ghost busters

FUTURES

574 Inculturation

Robert Scherrer

CONTENTS

27 January 2011 / Vol 469 / Issue No 7331

RESEARCH

NEW ONLINE

473 Papers published this week at nature.com

NEWS AND VIEWS

474 COGNITIVE ENHANCEMENT

A molecular memory booster

Insulin-like growth factor II promotes memory in rats

Johannes Gräff & Li-Huei Tsai

SEE ARTICLE P.491

475 QUANTUM INFORMATION

Entanglement on ice

Entangled photons can be stored and retrieved in a solid-state memory

Jevon Longdell SEE LETTERS P.508 & P.512

476 CIRCADIAN RHYTHMS

Redox redux

Biological rhythmic cycles may occur without gene transcription

Joseph Bass & Joseph S Takahashi

SEE ARTICLE P.498 & LETTER P.554

478 MEDICINE

Diabetes in India

Diabetes prevalence in India is rising alarmingly

Jared Diamond

479 COSMOLOGY

A glimpse of the first galaxies

Possible discovery of a galaxy at a redshift of 10

Naveen A Reddy SEE LETTER P.504

481 ZOOLOGY

Why are whales big?

Comparative studies provide clues about size-variation in diving vertebrates

Graeme D Ruxton

REVIEW

483 DRUG DISCOVERY The challenge of new drug discovery for tuberculosis

A Koul et al.

ARTICLES

491 NEUROSCIENCE A critical role for IGF-II in memory consolidation and enhancement

D Y Chen et al. SEE N&V P.474

498 BIOCHEMISTRY Circadian clocks in human red blood cells

J S O'Neill & A B Reddy

SEE N&V P.476

ON THE COVER

Family tree

A Sumatran orang-utan draft genome assembly has been analysed, together with five further Sumatran and five Bornean orang-utan genomes.

Knowledge of the genome and its variation between populations will be a valuable resource for conservationists.

PAGE 529

LETTERS

504 ASTRONOMY A candidate redshift $z \approx 10$ galaxy and rapid changes in that population at an age of 500 Myr

R J Bouwens et al. SEE N&V P.479

508 PHYSICS Quantum storage of photonic entanglement in a crystal

C Clausen et al. SEE N&V P.475

512 PHYSICS Broadband waveguide quantum memory for entangled photons

E Saglamyurek et al. SEE N&V P.475

516 MATERIALS SCIENCE Hard-tip, soft-spring lithography

W Shim et al.

521 CLIMATE SCIENCE Melt-induced speed-up of Greenland ice sheet offset by efficient subglacial drainage

A V Sundal et al.

525 EVOLUTION Ependymal cells of chordate larvae are stem-like cells that form the adult nervous system

T Horie et al.

529 GENOMICS Comparative and demographic analysis of orang-utan genomes

D P Locke et al.

534 GENETICS Distinct physiological and behavioural functions for parental alleles of imprinted *Grb10*

A S Garfield et al.

539 CANCER Exome sequencing identifies frequent mutation of the SWI/SNF complex gene *PBRM1* in renal carcinoma

I Varela et al.

543 PHYSIOLOGY Bifidobacteria can protect from enteropathogenic infection through production of acetate

S Fukuda et al.

548 CANCER Interferon- γ links ultraviolet radiation to melanomagenesis in mice

M R Zaidi et al.

554 CHEMICAL BIOLOGY Circadian rhythms persist without transcription in a eukaryote

J S O'Neill et al. SEE N&V P.476

559 BIOCHEMISTRY Structural basis for site-specific ribose methylation by box C/D RNA protein complexes

J Lin et al.

564 STRUCTURAL BIOLOGY Structure of human O-GlcNAc transferase and its complex with a peptide substrate

M B Lazarus et al.

STEM CELLS

Well grown

Adult stem cells that retain the ability to recreate a nervous system. PAGE 525
