## THIS WEEK

### EDITORIALS

#### 253 SCIENCE PUBLISHING

##### There's a time to be self-critical

Striking the balance between robust review and sensitive editing

#### 253 HEALTH CARE

##### Getting personal

The promise and problems of personalized medicine

#### 254 GEOLOGY

##### The human epoch

We should admit that the future is in our hands, and enter the Anthropocene

### WORLD VIEW

#### 255 Add coastal vegetation to the climate critical list

Margareth da

Silva Copertino

Brazil's threatened coastline is as vital as its rain forests

### RESEARCH HIGHLIGHTS

#### 256 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Colonic bacteria / Marine mimics / Sumatra fault destabilized / Vitamin D and psoriasis / Transporter protein gene linked to depression

### SEVEN DAYS

#### 258 THE NEWS IN BRIEF

Europe in fisheries reform / Iran goes nuclear / Meltdown at Fukushima / Chile to construct five dams

## CAREERS

#### 409 FORENSICS

##### The call of the crime lab

Crime can pay, but the demand for forensic scientists is unpredictable

#### 411 TURNING POINT

An analytical approach can be an advantage in the neurosciences, says Jill Venton

### NATUREJOBS ADVERTISING FEATURE

Spotlight on medical genetics

## NEWS IN FOCUS

#### 261 CLIMATE CHANGE

IPCC agrees major reforms

#### 262 SPACE EXPLORATION

The penultimate space-shuttle flight highlights NASA's launcher deficit

#### 263 ENERGY

Japan faces up to a low-energy future

#### 264 POLICY

Spanish spat overshadows top cancer institute

#### 265 ENTOMOLOGY

Can the honeybee genome sequence help cure colony-collapse disorder?

#### 266 NUCLEAR WASTE

Still no conclusion to Yucca Mountain storage debate

### FEATURES

#### 268 ENERGY

America's top climate cop

### STEM CELLS

## No recipe for success

The growing pains of iPS cells

PAGE 272

### TECHNOLOGY

#### 403 SYNTHETIC GENOMES

The next step for the synthetic genome

Whole-genome engineering edges towards industrial application

## COMMENT

#### 275 CLIMATE CHANGE

Nuclear winter is a real and present danger

Alan Robock

#### 277 INDUSTRY

Research beyond the recession

Leo Kärkkäinen; Jean Jacques Garaud

## BOOKS & ARTS

### Q&A

## Going green

Landscape architect and designer Charles Jencks on gardens, architecture and metaphor [PAGE 283](#)

#### 280 NEUROSCIENCE

My brain made me do it

Adam Kepecs

#### 281 BOOKS IN BRIEF

#### 282 THEATRE

The chief designer

Philip Ball

## CORRESPONDENCE

284 Phylogenetics in court / PhD supply and demand / Biodiversity and crop failures / China's environment / The role of an archive / Oil-troubled waters

## OBITUARY

286 William Nunn Lipscomb Jr (1919–2011)

Russell N Grimes

## FUTURES

414 Surveillance

Julian Tang

# CONTENTS

19 May 2011 / Vol 473 / Issue No 7347

## RESEARCH

### NEW ONLINE

287 Papers published this week at nature.com

### NEWS & VIEWS

#### 288 BIODIVERSITY

##### Species loss revisited

Revising estimates of extinction rates due to habitat loss

Carsten Rahbek & Robert K Colwell

SEE LETTER P.368

#### 289 ASTRONOMY

##### Bound and unbound planets abound

New discoveries from gravitational microlensing

Joachim Wambsganss SEE LETTER P.349

#### 291 ECONOMICS

##### A positive side of disaster

Socio-economic change in the wake of Hurricane Mitch

Arun Agrawal

#### 292 EARTH SCIENCE

##### A deep foundry

Melting at the surface of Earth's inner core

Bruce Buffett SEE LETTER P.361

#### 293 EPIGENETICS

##### Tet proteins in the limelight

DNA modification in embryonic stem cells

Nathalie Véron & Antoine H F M Peters

SEE ARTICLE P.343 & LETTERS P.389, P.394 & P.398

#### 294 PLANT BIOLOGY

##### Unveiling the Casparian strip

Insight into structures that control water flow into roots

Markus Grebe SEE LETTER P.380

### GEOPHYSICS

## Core values

Melting of the Earth's inner core explains seismic anomalies at the inner core boundary. **PAGES 292 & 361**

### ON THE COVER

## Ice spy

The Canadian Arctic Archipelago contains a third of the global volume of land ice outside the ice sheets, and is now shown to be a significant contributor to sea level rise. On the cover, an englacial melt channel within the Devon Island ice cap. **PAGE 357**

### ARTICLES

337 **CELL BIOLOGY** Global quantification of mammalian gene expression control  
B Schwanhäusser et al.

343 **STEM CELLS** TET1 and hydroxy-methylcytosine in transcription and DNA methylation fidelity  
K Williams et al. SEE N&V P.293

### LETTERS

349 **ASTRONOMY** Unbound or distant planetary mass population detected by gravitational microlensing  
The Microlensing Observations in Astrophysics (MOA) Collaboration & The Optical Gravitational Lensing Experiment (OGLE) Collaboration SEE N&V P.289

353 **PARTICLE PHYSICS** Observation of the antimatter helium-4 nucleus  
The STAR Collaboration

357 **CLIMATE SCIENCE** Sharply increased mass loss from glaciers and ice caps in the Canadian Arctic Archipelago  
A S Gardner et al.

361 **GEOPHYSICS** Melting of the Earth's inner core  
D Gubbins, B Sreenivasan, J Mound & S Rost SEE N&V P.292

364 **EVOLUTION** Eocene lizard from Germany reveals amphisbaenian origins

J Müller et al.

368 **ECOLOGY** Species-area relationships always overestimate extinction rates from habitat loss  
F He & S P Hubbell SEE N&V P.288

372 **NEUROSCIENCE** Neuropilin cleaves EphB2 in the amygdala to control anxiety  
B K Attwood et al.

376 **PLANT SCIENCES** Stem-cell-triggered immunity through CLV3p-FLS2 signalling  
H Lee, O-K Chah & J Sheen

380 **PLANT CELL BIOLOGY** A novel protein family mediates Casparian strip formation in the endodermis  
D Roppolo et al. SEE N&V P.294

384 **CANCER** BCL6 enables Ph<sup>+</sup> acute lymphoblastic leukaemia cells to survive BCR-ABL1 kinase inhibition  
C Duy et al.

389 **STEM CELLS** Dual functions of Tet1 in transcriptional regulation in mouse embryonic stem cells  
H Wu et al. SEE N&V P.293

394 **STEM CELLS** Genome-wide mapping of 5-hydroxymethylcytosine in embryonic stem cells  
W A Pastor et al. SEE N&V P.293

398 **DEVELOPMENTAL BIOLOGY** Dynamic regulation of 5-hydroxymethylcytosine in mouse ES cells and during differentiation  
G Ficiz et al. SEE N&V P.293

### EVOLUTION

## Leg work

A fossil find shows that limblessness in amphisbaenian lizards evolved independently from that in snakes **PAGE 364**
