THIS WEEK

EDITORIALS

255 DISCRIMINATION

Sexism has no place in science
Old-fashioned attitudes continue to hamper progress

255 POLITICS

The right climate
Climate change hits the Republican agenda

256 RISK MANAGEMENT

Risky business
Funding agencies must empower employees to make bold decisions

WORLD VIEW

257 Rethink our approach to assessing risk
Frederick Grinnell
Accept 'post normal' science — a concept that embraces doubt and urgency — and some decisions become much easier

RESEARCH HIGHLIGHTS

258 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Chimps like a drink / Flood defences / Finch in the nest / Dietary evidence is shaky / Evaporation power / Light-touch CRISPR / Spiders with attitude

SEVEN DAYS

260 THE NEWS IN BRIEF

Call to halt oil-sands development / Neutrinos found to switch flavour / EPA draft ruling on aviation emissions / *Nature* editor-in-chief knighted

CAREERS

379 COLUMN

Out of academia
Christopher Taylor
To prepare for a life beyond research, try mapping your own 'professional DNA'

381 TURNING POINT

Stem-cell researcher Paul Tesar may not be alone in hankering after bench work while writing grant proposals

NEWS IN FOCUS

263 ROSETTA MISSION

Philae comet lander ready to start experiments

264 TURKEY

Election results spur hope for researchers

265 CLINICAL RESEARCH

FDA asked to consider ageing as treatable disorder

266 TECHNOLOGY

Changes to US national-security rules would threaten foreign collaborations

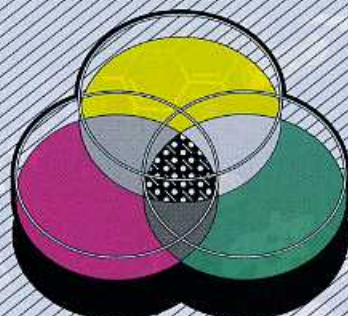

268 BUSINESS

Graphene boom not yet hitting the market

FEATURES

274 MATERIALS RESEARCH

2D or not 2D
Innovative flat materials are flooding into the lab, but applications could lie in stacked assemblies

ANTIBIOTICS

Microbial dark matter

The quest to identify 'unculturable' microbes **PAGE 270**

TECHNOLOGY

373 TISSUE ENGINEERING

Organs from the lab
Biomedical researchers are taming the complexity of human organs with organ-on-a-chip and organoid technologies

COMMENT

DISASTERS

Link up knowledge

Sustainable societies require robust risk management, say Susan L Cutter and colleagues **PAGE 277**

279 CLIMATE CHANGE

Steps to China's carbon peak
Zhu Liu et al.
Regional targets and improved market mechanisms are key to stemming emissions

BOOKS & ARTS

282 PLANT SCIENCE

Rediscovering the bush telegraph
Ian T Baldwin

284 Q&A

Maestros of graphene
Composer Sara Lowes' *Graphene Suite* hits the right notes thanks to her cooperation with materials scientist Cinzia Casiraghi

CORRESPONDENCE

287 Living with tigers / Climate neo-sceptics undermine mitigation / Chinese share data / Carbon on the campus

FUTURES

384 All, alone
Tim Cassford

CONTENTS

18 June 2015 / Vol 522 / Issue No 7556

RESEARCH

NEW ONLINE

289 Papers published this week at nature.com

NEWS & VIEWS

290 ASTRONOMY

A Mars-sized exoplanet

An exoplanet with the smallest measured mass to date

Gregory Laughlin **SEE LETTER P.321**

291 CELL BIOLOGY

Receptors for selective recycling

Receptor-mediated autophagy of the endoplasmic reticulum

David C Rubinsztein

SEE LETTERS P.354 & P.359

292 MATERIALS SCIENCE

Round the bend with microwaves

Defect-free microwave propagation in metamaterials

Sunil Mittal & Mohammad Hafezi

294 NEUROSCIENCE

The power of positivity

Reactivation of positive memory engrams reverses depression in mice

Alex Dranovsky & E David Leonardo

SEE LETTER P.335

295 GLOBAL WARMING

Growing feedback from ocean carbon to climate

A reassessment of carbon-climate coupling

Fortunat Joos

296 NEURODEGENERATION

Aggregates feel the strain

Distinct conformations of α -synuclein protein cause different defects

Seung-Jae Lee & Eliezer Masliah

SEE LETTER P.340

297 INORGANIC CHEMISTRY

Peculiar boron startles again

Donor-acceptor bonding in a main-group compound

Gernot Frenking **SEE LETTER P.327**

REVIEW

299 CLIMATE Pacific western boundary currents and their roles in climate

D Hu et al.

ARTICLES

309 NEUROSCIENCE Hippocampal-prefrontal input supports spatial encoding in working memory

ON THE COVER

Eats shoots and leaves

Chilesaurus diegosuarezi, seen in a reconstruction by Gabriel Lio eating plant foliage in an extinct Patagonian forest. This newly discovered dinosaur from Chile has been characterized as a primitive theropod from the Upper Jurassic. Theropods, a group that included *Tyrannosaurus* and *Velociraptor*, were generally bipedal and apart from some late highly derived forms, almost always carnivores.

PAGE 331

T Spellman et al.

315 INFECTIOUS DISEASES A novel multiple-stage antimalarial agent that inhibits protein synthesis

B Baragaña et al.

LETTERS

321 PLANETARY SCIENCE The mass of the Mars-sized exoplanet Kepler-138 b from transit timing

D Jontof-Hutter, J F Rowe, J J Lissauer, D C Fabrycky & E B Ford **SEE N&V P.290**

324 PLANETARY SCIENCE A permanent, asymmetric dust cloud around the Moon

M Horányi et al.

327 ORGANOMETALLIC CHEMISTRY Multiple complexation of CO and related ligands to a main-group element

H Braunschweig et al. **SEE N&V P.297**

331 PALAEOLOGY An enigmatic plant-eating theropod from the Late Jurassic period of Chile

F E Novas et al.

335 NEUROSCIENCE Activating positive memory engrams suppresses depression-like behaviour

S Ramirez et al. **SEE N&V P.294**

340 NEURODEGENERATION α -Synuclein strains cause distinct synucleinopathies after local and systemic administration

W Peelaerts et al. **SEE N&V P.296**

345 CANCER IL-17-producing $\gamma\delta$ T cells and neutrophils conspire to promote breast cancer metastasis

S B Coffelt et al.

349 CANCER MET is required for the recruitment of anti-tumoural neutrophils

V Finisguerra et al.

354 CELL BIOLOGY Regulation of endoplasmic reticulum turnover by selective autophagy

A Khaminets et al. **SEE N&V P.291**

359 CELL BIOLOGY Receptor-mediated selective autophagy degrades the endoplasmic reticulum and the nucleus

K Mochida et al. **SEE N&V P.291**

363 CELL BIOLOGY Alternative 3' UTRs act as scaffolds to regulate membrane protein localization

B D Berkovits & C Mayr

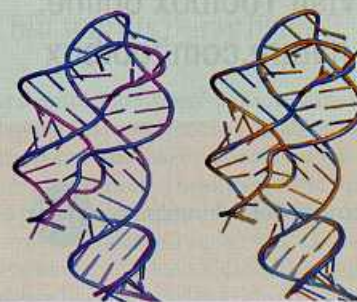

368 CELL BIOLOGY Synthesis and applications of RNAs with position-selective labelling and mosaic composition

Y Liu et al.

CELL BIOLOGY

RNA labels

Position-specific, fluorescence- and isotope-labelled riboswitches. **PAGE 368**

GABRIEL LIO
