THIS WEEK

EDITORIALS

5 SCIENCE & SOCIETY

Communication breakdown

UK government scientists should not be prevented from speaking freely

5 ENVIRONMENT

Tree cheers

The world needs to follow Brazil's lead in protecting forests

6 ENGINEERING

Walking 2.0

A simple boot that really kicks it when it comes to movement

WORLD VIEW

7 Change the cancer conversation

Colin Macilwain

It is time to regroup and redeploy forces in the war on cancer

RESEARCH HIGHLIGHTS

8 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Terroir down to bacteria? / Earliest Neanderthal DNA / Potato blight resistance protein / Open-source health / Conservation on a budget / Antarctic ice shelves thinner

SEVEN DAYS

10 THE NEWS IN BRIEF

LHC restart delayed / Global investments in renewables rise / Twins head into space / FDA approves anthrax drug / NASA backs plan to capture asteroid

CAREERS

121 AUTHORSHIP

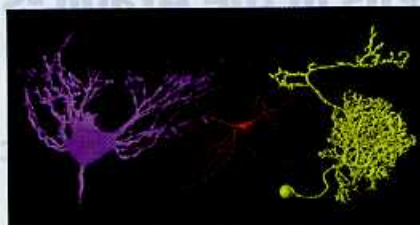

Dynamic duos

When it comes to writing a popular science book, two heads can be better than one

123 TURNING POINT

Danielle Edwards faced a dilemma: take a tempting offer in Australia or hold out for her Californian dream

NEWS IN FOCUS

13 NEUROSCIENCE

Bid to catalogue neurons shapes up

14 CLIMATE CHANGE

Questions raised over 2°C warming limit

16 UK ELECTION

Up-and-coming parties set out their science stalls

18 BIOMEDICINE

Shrunken enzyme paves way to easier gene therapy

FEATURES

20 ENVIRONMENT

Battle for the Amazon

Brazil's success in cutting deforestation offers lessons for other nations

MEDICINE

Save blood, save lives

It is time to cut back on the overuse of transfusions **PAGE 24**

TOOLBOX

119 THE PUBLISHING EXPERIENCE

Rate that journal

The comparison-website model can help a researcher buy insurance — and decide where to submit a paper

COMMENT

CLIMATE POLICY

Social conscience

The IPCC remains an important influence but needs a new approach if it is not to become irrelevant, says David G Victor **PAGE 27**

BOOKS & ARTS

30 HISTORY OF SCIENCE

Revelations of a wild continent

Linda Lear

31 BOOKS IN BRIEF

32 NEUROSCIENCE

Total recall, welcome oblivion

Alison Abbott

CORRESPONDENCE

33 Myth meets science in the outback / Congressional scrutiny of NSF spending / Chemicals and reservoirs don't mix / The call of the lab

FUTURES

126 Mort's laws

Jacey Bedford

CONTENTS

2 April 2015 / Vol 520 / Issue No 7545

RESEARCH

NEW ONLINE

35 Papers published this week at nature.com

NEWS & VIEWS

36 QUANTUM PHYSICS

Two-atom bunching

Hong–Ou–Mandel quantum effect demonstrated for helium-4 atoms
Lindsay J LeBlanc

SEE LETTER P.66

37 CANCER

A piece of the p53 puzzle

The tumour-suppressor protein p53 regulates iron-dependent cell death
Kathryn T Biegging & Laura D Attardi

SEE ARTICLE P.57

38 BIODIVERSITY

Land use matters

Land-use change has driven an 8.1% average decline in species richness
Brian McGill

SEE ARTICLE P.45

40 PLANETARY SCIENCE

Preventing stars from eating their young

Explaining the distances of gas-giant planets from their host stars
Martin J Duncan

SEE LETTER P.63

41 PLANT BIOLOGY

Coding in non-coding RNAs

Primary microRNAs that encode peptides
Peter M Waterhouse & Roger P Hellens

SEE LETTER P.90

42 ZOOLOGY

Here be dragons

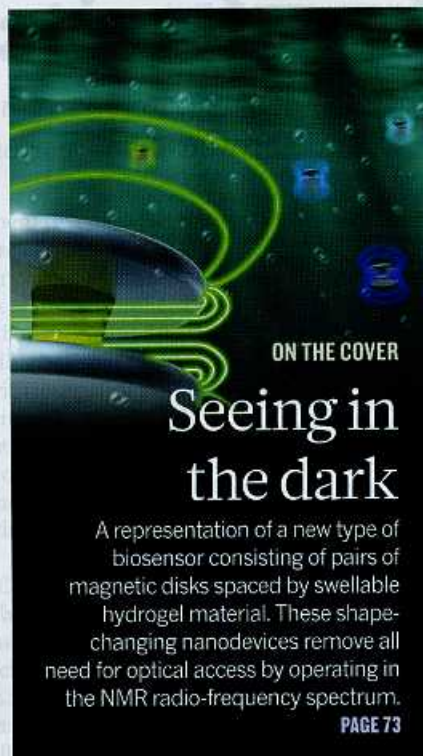

The imminent return of fire-breathing lizards
Andrew J Hamilton, Robert M May & Edward K. Waters

ARTICLES

45 **ECOLOGY** Global effects of land use on local terrestrial biodiversity
T Newbold et al. SEE N&V P.38

51 **NEUROSCIENCE** Loss of δ -catenin function in severe autism
T N Turner et al.

57 **CANCER** Ferroptosis as a p53-mediated activity during tumour suppression
L Jiang et al. SEE N&V P.37

A representation of a new type of biosensor consisting of pairs of magnetic disks spaced by swellable hydrogel material. These shape-changing nanodevices remove all need for optical access by operating in the NMR radio-frequency spectrum.

PAGE 73

LETTERS

63 **PLANETARY SCIENCE** Planet heating prevents inward migration of planetary cores

Pablo Benítez-Llambay, F Masset, G Koenigsberger & J Szulágyi

SEE N&V P.40

66 **QUANTUM PHYSICS** Atomic Hong–Ou–Mandel experiment

R Lopes et al. SEE N&V P.36

69 **NANOSCALE DEVICES** Monolayer semiconductor nanocavity lasers with ultralow thresholds

S Wu et al.

73 **BIOSENSORS** Shape-changing magnetic assemblies as high-sensitivity NMR-readable nanoprobe

G Zabow, S J Dodd & A P Koretsky

78 **PHOTOCHEMISTRY** Orbital-specific mapping of the ligand exchange dynamics of $\text{Fe}(\text{CO})_5$ in solution

Ph Wernet et al.

82 **PALAEONTOLOGY** Osteichthyan-like cranial conditions in an Early Devonian stem gnathostome

S Giles, M Friedman & M D Brazeau

86 **EVOLUTION** Evolution of the snake body form reveals homoplasy in amniote *Hox* gene function

J J Head & P D Polly

90 **PLANT BIOLOGY** Primary transcripts of microRNAs encode regulatory peptides

D Laursen et al. SEE N&V P.41

94 **NEUROSCIENCE** G-protein-independent coupling of MC4R to Kir7.1 in hypothalamic neurons

M Ghamari-Langroudi et al.

99 **CELLULAR MICROBIOLOGY** Growth and host interaction of mouse segmented filamentous bacteria *in vitro*

P Schnupf et al.

104 **IMMUNOLOGY** Commensal–dendritic-cell interaction specifies a unique protective skin immune signature

S Naik et al.

109 **STRUCTURAL BIOLOGY** Recognition determinants of broadly neutralizing human antibodies against dengue viruses

A Ropivinski et al.

114 **MOLECULAR BIOLOGY** Tel1^{ATM}-mediated interference suppresses clustered meiotic double-strand-break formation

V Garcia, S Gray, R M Allison, T J Cooper & M J Neale

STRUCTURAL BIOLOGY

Vaccine hope

Crystal structures of viral-bound antibodies that neutralize all four dengue virus serotypes. PAGE 109
