THIS WEEK

EDITORIALS

585 DATA ACCESS

Thank you for sharing

Cancer project reveals limits of generosity

585 MARINE CONSERVATION

A hard sell

UK needs plan to balance conservation against other maritime interests

586 PALAEOLOGY

More on unicorns

Tiny dinosaur defies current categorization system

WORLD VIEW

587 China's scientific progress hinges on access to data

Zheng Wan

Chinese scientists are struggling against growing barriers to public-data access

RESEARCH HIGHLIGHTS

588 SELECTIONS FROM THE SCIENTIFIC LITERATURE

A direct look at an exoplanet / Walking on water / Sulfur-eating bacteria get together / Groundwater microbes / Bar graphs fail to impress / The last mammoths / World's best atomic clock

SEVEN DAYS

590 THE NEWS IN BRIEF

First editing of human-embryo genome / Huge death toll from Nepal earthquake / Young film-goers still exposed to smoking

CAREERS

711 PUBLIC HEALTH

Behind a vaccine

Crises such as the Ebola epidemic highlight the importance of vaccine research and production

713 WORKPLACE CLIMATE

Metrics for ethics

A bad working environment can encourage behaviours such as poor record-keeping and even plagiarism

NEWS IN FOCUS

593 GENETIC MODIFICATION

Landmark human-embryo work sparks debate about ethics of research

595 POLITICS

Canadian budget favours applied over basic research

596 SOCIETY

Vatican convenes major climate-change meeting

597 MEDICAL RESEARCH

Gene-testing firms aim to cash in on large DNA data sets

598 ARCHAEOLOGY

Ancient Peruvian DNA points to single human migration to South America

FEATURES

600 STAP FALLOUT

Collateral damage

How the aftershocks of a misconduct case rippled through Japan

SCIENCE & POLITICS

After the Arab Spring

How the uprisings affected science in Egypt, Tunisia and Syria **PAGE 604**

COMMENT

609 MEDICAL RESEARCH

Time for one-person trials

Nicholas J Schork

Precision medicine techniques demand a different type of testing

612 STATISTICS

P values are just the tip of the iceberg

Jeffrey T Leek & Roger D Peng

Studies need to improve data analysis from the ground up

SPRING BOOKS

614 CLIMATE ECONOMICS

The high road

Michael Grubb

615 GENETICS

We are the 98%

Nathaniel Comfort

616 NEW IN PAPERBACK

617 ORIGINS OF LIFE

An improbable journey

Adrian Woolfson

618 VIROLOGY

Journal of the plague years

Mark Dybul

620 MEDICAL HISTORY

Pioneer of polio education

Tilli Tansey

621 PHYSICS

One hundred years

of general relativity

Pedro Ferreira

CORRESPONDENCE

623 Germline editing is inevitable /

Sanctions undermine public health in Iran / Weakness of double-blind peer review / The catch with fishing data

FUTURES

716 The archive personality protocol

Brian Trent

CONTENTS

30 April 2015 / Vol 520 / Issue No 7549

RESEARCH

NEW ONLINE

625 Papers published this week at nature.com

NEWS & VIEWS

626 CANCER

An essential passenger with p53

Co-deletion of *TP53* and *POLR2A* creates a therapeutic vulnerability
James E Bradner **SEE LETTER P.697**

627 IMMUNOLOGY

Stillbirth prevented by signal blockade

Blocking CXCR3 prevents fetal loss during some bacterial infections
Anna Bakardjiev

628 MICROBIOLOGY

Malaria runs rings round artemisinin

Elucidating the mechanism that confers dihydroartemisinin resistance
Jeremy Burrows **SEE LETTER P.683**

630 PALAEOCLIMATE

Northern push for the bipolar seesaw

Ice-core data reveal the direction of inter-hemispheric climate coupling
Tas van Ommen **SEE LETTER P.661**

631 MATERIALS SCIENCE

Semiconductors grown large and thin

How to grow atomically thin layers of transition-metal dichalcogenides
Tobin J Marks & Mark C Hersam
SEE LETTER P.656

ARTICLES

633 NEUROSCIENCE

A multilevel multimodal circuit enhances action selection in *Drosophila*
T Ohyama et al.

640 STRUCTURAL BIOLOGY

Structure of the human 80S ribosome
H Khatter, A G Myasnikov, S K Natchiar & B P Klaholz

LETTERS

646 ASTROPHYSICS

Extended hard-X-ray emission in the inner few parsecs of the Galaxy
K Perez et al.

650 GRAPHENE

Topological valley transport at bilayer graphene domain walls
L Ju et al.

656 MATERIALS SCIENCE

High-mobility three-atom-thick semiconducting

ON THE COVER

Good times... bad times

The amygdala is part of the brain important for emotional processing, handling stimuli with either positive or negative associations — the good and the bad. Neurons in the basolateral amygdala projecting to fear and reward circuits undergo opposing changes in synaptic strength following fear or reward conditioning. **PAGE 677**

films with wafer-scale homogeneity
K Kang et al. **SEE N&V P.631**

661 PALAEOCLIMATE

Precise inter-polar phasing of abrupt climate change during the last ice age

WAIS Divide Project Members

SEE N&V P.630

666 BIOGEOCHEMISTRY

Isotopic evidence for biological nitrogen fixation by molybdenum-nitrogenase from 3.2Gyr

E E Stüeken, R Buick, B M Guy & M C Koehler

670 IMMUNOLOGY

An epigenome-wide association study of total serum immunoglobulin E concentration
L Liang et al.

675 NEUROSCIENCE

A circuit mechanism for differentiating positive and negative associations
P Namburi et al.

679 PLANT SCIENCES

NIK1-mediated translation suppression functions as a plant antiviral immunity mechanism
C Zoratto et al.

683 MICROBIOLOGY

A molecular mechanism of artemisinin resistance in *Plasmodium falciparum* malaria
A Mbenge et al. **SEE N&V P.628**

688 EBOLA VIRUS

Single-dose attenuated Vesiculovax vaccines protect primates against Ebola Makona virus
C E Mire et al.

692 CANCER

Mutant MHC class II epitopes drive therapeutic immune responses to cancer
S Kreiter et al.

697 CANCER

TP53 loss creates therapeutic vulnerability in colorectal cancer
Y Liu et al. **SEE N&V P.626**

702 IMMUNOLOGY

Structural basis of CpG and inhibitory DNA recognition by Toll-like receptor 9
U Ohto et al.

706 STRUCTURAL BIOLOGY

The octahaem MccA is a haem c-copper sulfite reductase
B Hermann, M Kern, L La Pietra, J Simon & O Einsle

710 CORRIGENDUM

Deterministic direct reprogramming of somatic cells to pluripotency
Y Rais et al.

706 CORRIGENDUM

Derivation of novel human ground state naive pluripotent stem cells
O Gafn et al.

GRAPHENE

Tune the gap

Bandgaps in bilayer graphene can be tuned with an electric field. **PAGE 650**
