THIS WEEK

EDITORIALS

245 SCIENCE & SOCIETY

A Russian renaissance?

It will take more than money to revitalize Russian science

245 GERMANY

The shared burden

Complications to a bill for funding Germany's universities should be dropped

246 ETHICS

Final say

Japan needs to find closure for the dispute at Tohoku University

WORLD VIEW

247 Two nations divided by a common purpose

Colin Macilwain

Introducing the London Science Media Centre to the US will be an uphill struggle

RESEARCH HIGHLIGHTS

248 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Rain dampens seismic waves / Versatile sawfish / Sterilizable electronics / Australia's first foresters / High sperm mutation rates / The weather on Venus

SEVEN DAYS

250 THE NEWS IN BRIEF

South Africa edges closer to hosting the SKA / China marks neutrino success / Earth weathers solar storm / Tevatron data hint at Higgs

CAREERS

363 ENVIRONMENT

Toxic effects

Pollution and laws to control it mean more work for toxicologists

365 TURNING POINT

Stem-cell researcher Sean Bendall has some tips for aspiring postgraduates

NATUREJOBS ADVERTISING FEATURE

Spotlight on chemistry

NEWS IN FOCUS

253 POLITICS

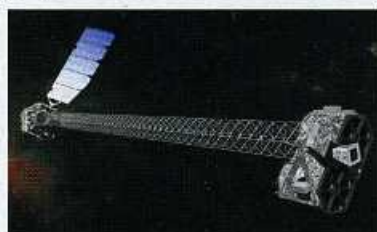

Putin promises cash injection for Russian science

254 CLIMATE SCIENCE

Forecasters use ancient data to put climate models through their paces

255 ASTROPHYSICS

NuSTAR X-ray telescope prepares for launch

256 ENVIRONMENT

UN urges action on water

258 FUNDING

China pledges support for science

259 ETHICS

Japanese scientists renew calls for body to oversee research ethics

FEATURES

260 NEUROSCIENCE

A tale of two halves

The remarkable legacy of split-brain patients

BIOTECHNOLOGY

Coffee break

The quest for a bean without the buzz
PAGE 264

COMMENT

267 DRUG DEVELOPMENT

Plug the real brain drain

Martin Schwab & Anita Buchli

The retreat of the drugs companies has left neuropharmacology in a bad way

269 DRUG DEVELOPMENT

A plan for mental illness

Thomas R Insel & Barbara J Sahakian

Researchers, clinicians and patients can contribute to a better future

BOOKS & ARTS

271 NEUROSCIENCE

The mind mapped

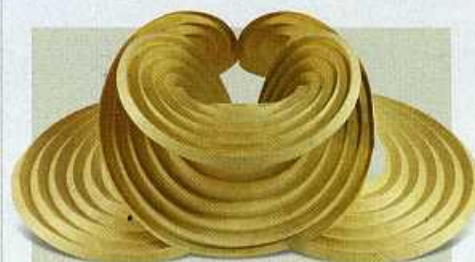

Robert Stickgold

272 POLAR RESEARCH

Deep-frozen science

Francis Halzen

273 BOOKS IN BRIEF

Q&A

Game plan

Erik Demaine's computational origami is a work of art
PAGE 274

CORRESPONDENCE

275 Lobby group's attack on primate research / Turing's legacy / The trouble with alcohol controls

FUTURES

368 The pi that wasn't round

Dan Erlanson

CONTENTS

15 March 2012 / Vol 483 / Issue No 7389

RESEARCH

NEW ONLINE

277 Papers published this week at nature.com

NEWS & VIEWS

278 ORGANIC CHEMISTRY

Catalysis in tight spaces

Asymmetric synthesis of spiroacetals
Noah Z Burns & Eric N Jacobsen

SEE LETTER P.315

279 ELECTRONICS

Inside story of ferroelectric memories

How to increase the storage density of FERAMs

Vincent Garcia & Manuel Bibes

280 DEVELOPMENTAL BIOLOGY

A brainy background

Hemichordate homologues of neuroectodermal signalling centres
Henry Gee SEE ARTICLE P.289

281 GENETICS

Broken giant linked to heart failure

Truncations of titin explain many cases of dilated cardiomyopathy
Elizabeth M McNally

282 CONDENSED-MATTER PHYSICS

A duo of graphene mimics

Two ways of making graphene analogues
Jonathan Simon & Markus Greiner
SEE LETTERS P.302 & P.306

284 NEUROSCIENCE

How brains learn to control machines

The corticostriatal system is needed for learning abstract skills
David T Blake SEE LETTER P.331

285 BIOCHEMISTRY

Favouring the unfavoured

Biosynthetic ring-closing reactions
David E Cane SEE LETTER P.355

286 GENE EXPRESSION

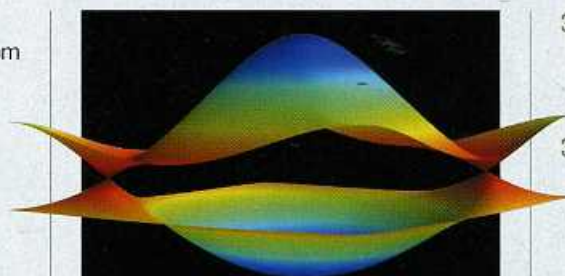

Transcription initiation unwrapped

High-resolution mapping of initiation complexes on the yeast genome
Stephen Buratowski
SEE ARTICLE P.295

ARTICLES

289 **EVOLUTION** Ancient deuterostome origins of vertebrate brain signalling centres
A M Pani et al. SEE N&V P.280

295 **GENOMICS** Genome-wide structure

ON THE COVER

Carbon copy

The band structure of artificial graphene with intersections at two Dirac points. Ultracold quantum gases in an adjustable lattice are used to model the physics of exotic materials such as topological insulators and graphene. **PAGES 282 & 302**

and organization of eukaryotic pre-initiation complexes

H S Rhee & B F Pugh SEE N&V P.286

LETTERS

302 **PHYSICS** Creating, moving and merging Dirac points with a Fermi gas in a tunable honeycomb lattice

L Tarruell, D Greif, T Uehlinger, G Jotzu & T Esslinger SEE N&V P.282

306 **PHYSICS** Designer Dirac fermions and topological phases in molecular graphene

K K Gomes, W Mar, W Ko, F Guinea & H C Manoharan SEE N&V P.282

311 **PHYSICS** DNA-based self-assembly of chiral plasmonic nanostructures with tailored optical response

A Kuzyk et al.

315 **CHEMISTRY** Asymmetric spiroacetalization catalysed by confined Brønsted acids

I Čorić & B List SEE N&V P.278

320 **EARTH SCIENCE** Uncovering the Neoproterozoic carbon cycle

D T Johnston, F A Macdonald, B C Gill, P F Hoffman & D P Schrag

324 **PALAEONTOLOGY** On the difficulty of increasing dental complexity

E Harjunmaa et al.

328 **ECOLOGY** Coevolution in multidimensional trait space favours escape from parasites and pathogens
R T Gilman, S L Nuismer & D-C Jhwueng

331 **NEUROSCIENCE** Corticostriatal plasticity is necessary for learning intentional neuroprosthetic skills
A C Koralek, X Jin, J D Long II, R M Costa & J M Carmena SEE N&V P.284

336 **CELL BIOLOGY** Phase transitions in the assembly of multivalent signalling proteins
P Li et al.

341 **PLANT SCIENCES** A petunia ABC protein controls strigolactone-dependent symbiotic signalling and branching
T Kretschmar et al.

345 **IMMUNOLOGY** Goblet cells deliver luminal antigen to CD103⁺ dendritic cells in the small intestine
J R McDole et al.

350 **GENETICS** Dysfunction of lipid sensor GPR120 leads to obesity in both mouse and human
A Ichimura et al.

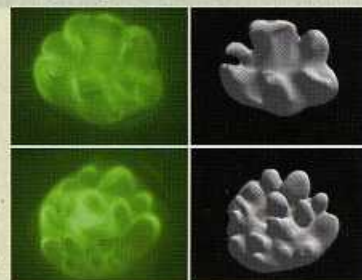

355 **BIOCHEMISTRY** Enzymatic catalysis of anti-Baldwin ring closure in polyether biosynthesis
K Hotta et al. SEE N&V P.285

359 **BIOCHEMISTRY** An oxygenase that forms and deoxygenates toxic epoxide
R Teufel, T Friedrich & G Fuchs

PALAEONTOLOGY

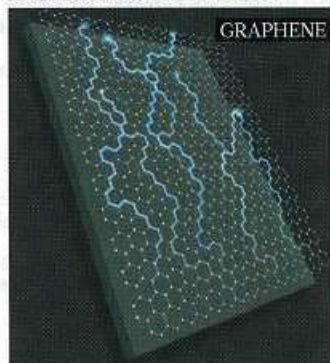

Bite size

Mouse molars are prime examples of complexity in evolution. **PAGE 324**

GRAPHENE

natureOUTLOOK

Finding a route
out of the lab

Turn to page 276

S30 MATERIALS SCIENCE

Super carbon

How does graphene measure up to other materials?

S32 PRODUCTION

Beyond sticky tape

The drive to create ever larger sheets of graphene

S34 ELECTRONICS

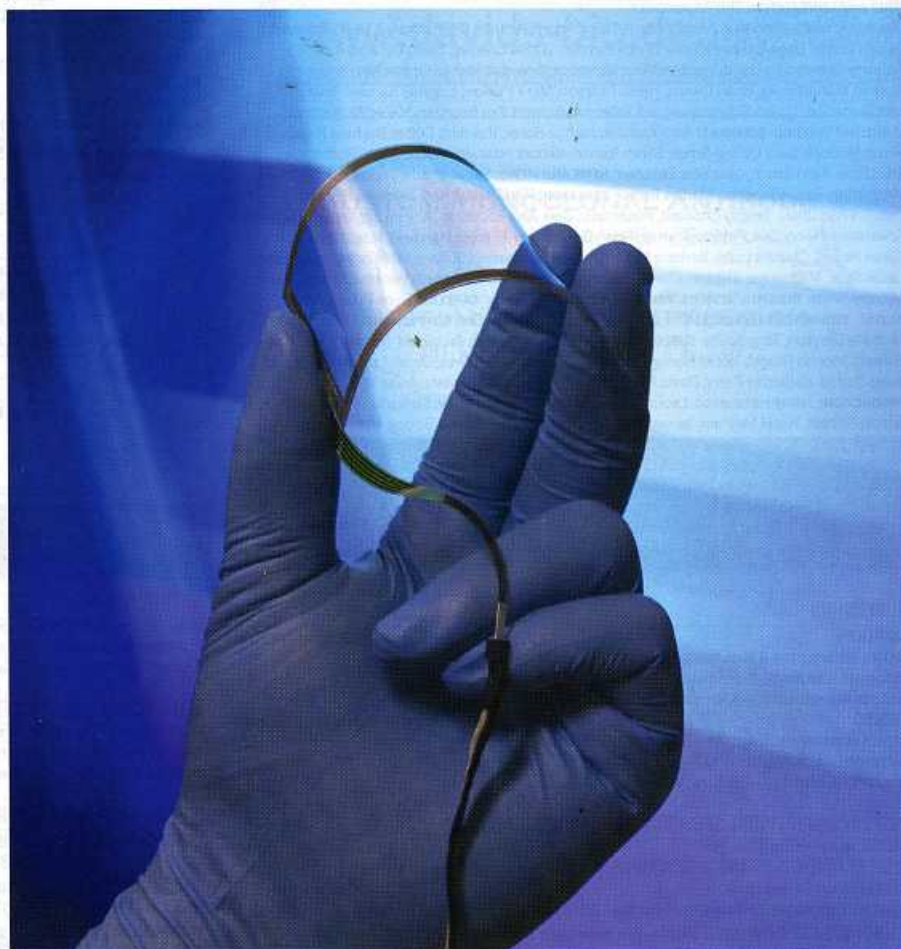

Back to analogue

It's not naturally suited to digital technology, but graphene might be more useful in another way

S37 BIOELECTRONICS

The bionic material

New sensory implants that plug into the nervous system

Researchers are just getting to grips with graphene, used to make this flexible touch screen.

S38 OPTOELECTRONICS

Come into the light

Its brilliance is becoming transparent

S40 Q&A

Taking charge

MIT's Tomás Palacios discusses this fledgling technology

S42 PERSPECTIVE

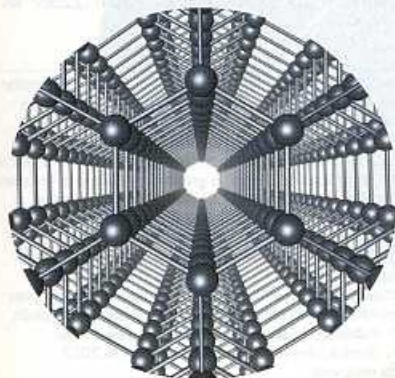

A means to an end

Rodney Ruoff

S43 MATERIAL HISTORY

Learning from silicon

Silicon's past yields valuable lessons for graphene's future
