THIS WEEK

EDITORIALS

547 CHERNOBYL

Lessons from the past

Long-term studies into the effects of low-level radiation on health near Chernobyl deserve funding

548 FORENSIC SCIENCE

Courtroom drama

The integrity of forensic research is under threat on both sides of the Atlantic

548 JOURNAL LAUNCH

Welcome *Nature Climate Change*

A new addition to *Nature's* family opens wider the door to social science

WORLD VIEW

549 Concerns over nuclear energy are legitimate

Colin Macilwain

Fukushima reminds us that continual human intervention is key for nuclear safety

RESEARCH HIGHLIGHTS

550 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Seven up for exoplanetary system / Pre-Clovis stone tools from Texas / Lack of sleep works both ways / Piscine seed dispersal / Pancreatic stem cells

SEVEN DAYS

552 THE NEWS IN BRIEF

Canadian election leave researchers in limbo / UK budget focuses on clinical trials / Tiger population on the rise in India / Farewell to Stardust / John Milnor wins Abel Prize in mathematics

CAREERS

667 SOCIAL MEDIA

Self-reflection, online

If you don't like your online presence, change it

669 CAREER BRIEFS

NATURE JOBS ADVERTISING FEATURE

Spotlight on Catalonia

NEWS IN FOCUS

555 NUCLEAR POWER

Data begin to reveal true picture of Japan's nuclear fallout

556 DISASTER PREPAREDNESS

Japan in shock over failure of quake forecasts and warning system

558 HEALTH POLICY

Petition fails to move NIH over grant cutoff rules

559 COMMUNITY

International collaborations — many with 'BRIC' countries — are in vogue

560 CONSERVATION

Canadian forest negotiations leave conservationists wanting more

561 CANCER THERAPY

Approval of antibody drug is a milestone for melanoma treatment

FEATURES

CHERNOBYL

The long goodbye

The legacy of the world's worst civilian nuclear disaster lives on — and on

PAGE 562

566 SOCIAL SCIENCE

Web of war

The Pentagon is spending millions on computer models to predict human behaviour — but can this win wars?

TECHNOLOGY

661 TISSUE MODELS

A living system on a chip

Artificial versions of the liver and other vital organs are beginning to convince

COMMENT

569 BIOMEDICAL RESEARCH

Time to rethink the NIH

Michael M Crow

BOOKS & ARTS

573 EARTH SCIENCE

Mind your head

Birger Schmitz

574 GASTRONOMY

A visual feast

Felice Frankel

575 Q&A

Nathan Myhrvold on his magnum opus

577 BOOKS IN BRIEF

MUSEUMS

Shelf life

Too many of Germany's historic gems lie hidden, says Thomas Schnalke

PAGE 576

CORRESPONDENCE

578 Containments of emerging concern /

Funding the unpredictable / Health benefits of microbial sequences

FUTURES

672 A perfect drug

Dan Erlanson

RESEARCH

NEW ONLINE

579 Papers published this week at nature.com

NEWS & VIEWS

580 ASTROPHYSICS

The inner lives of red giants

Insight into stellar evolution theory
Travis S Metcalfe [SEE LETTER P.608](#)

581 IMMUNOLOGY

Cross-dressers turn on T cells

New angles on antigen presentation
Jonathan W Yewdell & Brian P Dolan
[SEE LETTER P.629](#)

582 MOLECULAR GENETICS

The sound of silence

A synonymous mutation in Crohn's disease
Laurence D Hurst

583 BIOCHEMISTRY

How two amino acids become one

The biosynthesis of pyrrolysine
Stephen W Ragsdale [SEE LETTER P.647](#)

584 CLIMATE

Cold winters from warm oceans

Rossby-wave connection with an asymmetry in Earth's climate
William R Boos [SEE LETTER P.621](#)

586 DEVELOPMENTAL BIOLOGY

A hair-raising tale

Stem cells act as a niche for muscle cells
Bruce A Morgan

587 CONDENSED-MATTER PHYSICS

Transitions on triangles

Ordered magnetism in a quantum spin liquid
Thomas F Rosenbaum [SEE LETTER P.612](#)

588 MICROBIOLOGY

Dicing defence in bacteria

Variation in the CRISPR bacterial-defence system
Susan Gottesman [SEE ARTICLE P.602](#)

ARTICLES

591 **CELL BIOLOGY** Linear ubiquitination prevents inflammation and regulates immune signalling
B Gerlach et al.

597 **NEUROSCIENCE** Habenular $\alpha 5$ nicotinic receptor subunit signalling controls nicotine intake

ON THE COVER

Early bloom

A stream of fossil finds from the Early Cretaceous of China is beginning to fill in some of the gaps in our knowledge of the early history of flowering plants. The latest of these, about 124 million years old, is a member of the relatively derived group that dominates the flowering plants in the world today.

[PAGE 625](#)

C D Fowler, Q Lu, P M Johnson, M J Marks & P J Kenny

602 **MICROBIOLOGY** CRISPR RNA maturation by *trans*-encoded small RNA and host factor RNase III
E Deltcheva et al. [SEE N&V P.588](#)

LETTERS

608 **ASTRONOMY** Gravity modes as a way to distinguish between hydrogen- and helium-burning red giant stars
T R Bedding et al. [SEE N&V P.580](#)

612 **PHYSICS** Magnetic and non-magnetic phases of a quantum spin liquid
F L Pratt et al. [SEE N&V P.587](#)

617 **PHYSICS** Controlling inelastic light scattering quantum pathways in graphene
C-F Chen et al.

621 **CLIMATE SCIENCE** Winter cold of eastern continental boundaries induced by warm ocean waters
Y Kaspi & T Schneider [SEE N&V P.584](#)

625 **PALAEONTOLOGY** A eudicot from the

Early Cretaceous of China¹

G Sun, D L Dilcher, H Wang & Z Chen

629 **IMMUNOLOGY** Cross-dressed dendritic cells drive memory CD8⁺ T-cell activation after viral infection
L M Wakim & M J Bevan [SEE N&V P.581](#)

633 **CELL BIOLOGY** SHARPIN is a component of the NF- κ B-activating linear ubiquitin chain assembly complex
F Tokunaga et al.

637 **CELL BIOLOGY** SHARPIN forms a linear ubiquitin ligase complex regulating NF- κ B activity and apoptosis
F Ikeda et al.

642 **MOLECULAR BIOLOGY** Aberrant chromosome morphology in human cells defective for Holliday junction resolution
T Wechsler, S Newman & S C West

647 **BIOCHEMISTRY** The complete biosynthesis of the genetically encoded amino acid pyrrolysine from lysine
M A Gaston, L Zhang, K B Green-Church & J A Krzycki [SEE N&V P.583](#)

651 **STRUCTURAL BIOLOGY** Crystal structure of metarhodopsin II
H-W Choe et al.

656 **STRUCTURAL BIOLOGY** The structural basis of agonist-induced activation in constitutively active rhodopsin
J Standfuss et al.

CLIMATE SCIENCE

Cold case

Why are the winters in New England so chilly? [PAGES 584 & 621](#)
