

CONTENTS

2 October 2014 / Vol 514 / Issue No 7520

THIS WEEK

EDITORIALS

- 5 **PUBLISHING**
Retraction challenges
However hard it is, errors must be fixed
- 5 **ENVIRONMENT**
Warming up
Prospects for climate treaty brighten
- 6 **NEUROSCIENCE**
BRAIN gain
US initiative could boost big neuroscience

WORLD VIEW

- 7 **Water politics must adapt to a warming world**
Moshe Alamaro
Changes to technology and legislation will aid universal access to water

RESEARCH HIGHLIGHTS

- 8 **SELECTIONS FROM THE SCIENTIFIC LITERATURE**
Molecular microphone / Ancient limb regeneration / Gravitational waves brighten stars / Melatonin patterns in zooplankton

SEVEN DAYS

- 10 **THE NEWS IN BRIEF**
US expands marine reserve / Ivory trade still strong / Japanese eruption surprises scientists / Kepler back on track

CAREERS

- 129 **AT THE BENCH**
The right mix
Top tips for how to recruit lab members
- 131 **TURNING POINT**
Molecular parasitologist Juan David Ramirez awarded Pew fellowship

NATUREJOBS ADVERTISING FEATURE

Spotlight on Osaka
Naturejobs Career Expo review

NEWS IN FOCUS

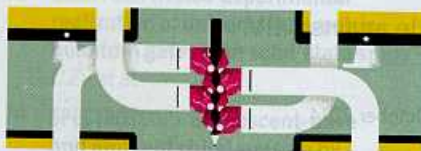

- 13 **GENOMICS**
Sick newborns benefit from fast genome sequencing
- 14 **POLICY**
Biopiracy ban sparks fears over red tape
- 15 **INFECTIOUS DISEASE**
Ebola outbreak impedes malaria control in West Africa
- 16 **CLIMATE SCIENCE**
Tibetan plateau wired to predict monsoons
- 17 **BOTANY**
Isotope forensics takes on stolen plants
- 18 **ASTRONOMY**
Large Synoptic Survey Telescope spurs debate over access

FEATURES

- 20 **ASTRONOMY**
To catch a cosmic ray
The future of the Pierre Auger Observatory hangs in the balance
- 24 **HUMAN MIGRATION**
Extreme living
How hunter-gatherers spread across South America

TOOLBOX

- 127 **SCIENTIFIC WRITING**
The online cooperative
Collaborative browser-based tools allow simultaneous re-writes on scientific papers — and their creators hope to change the way in which manuscripts are written and published.

COMMENT

- 27 **RESOURCES**
Curb vast water use in central Asia
Olli Varis
An economic rethink would ease tensions over water access

ENVIRONMENT

Ditch 2 °C

There are better ways to measure Earth's health than temperature

PAGE 30

BOOKS & ARTS

- 32 **COMPUTING HISTORY**
Geeks, Inc.
Jennifer Light

- 33 **BOOKS IN BRIEF**

- 34 **EVOLUTION**
The neighbourly nature of evolution
Mark Pagel

CORRESPONDENCE

- 35 Japan's research integrity / Lung-cancer screening justified / Control use of mobile data / Change energy sources in Tibet / Positivity important to ageing

FUTURES

- 134 **Welcome to the world, Trilby Freedom**
Marcelina Vizcarra

CONTENTS

2 October 2014 / Vol 514 / Issue No 7520

RESEARCH

NEW ONLINE

37 Papers published this week at nature.com

NEWS & VIEWS

38 GEOSCIENCE

The plumbing of Greenland's ice

The subglacial hydrologic system of the Greenland Ice Sheet

Peter Nienow **SEE LETTER P.80**

39 DNA REPAIR

Making the cut

Mre11 endonuclease activity initiates homologous recombination

Lorraine S Symington

SEE LETTER P.122

40 SOLAR SYSTEM

Not just a storm in a teacup

Titan's south polar cloud is made up of hydrogen cyanide ice particles

Caitlin A Griffith **SEE LETTER P.65**

41 MEDICAL RESEARCH

Ebola therapy protects severely ill monkeys

Treatment of advanced Ebola infection with the antibody cocktail ZMapp

Thomas W Geisbert **SEE ARTICLE P.47**

43 ASTRONOMY

The age of the quasars

The evolution of accreting supermassive black holes over cosmic time

Daniel Mortlock

44 MICROBIOLOGY

An integrated view of the skin microbiome

Metagenomic analysis of healthy skin microbiota at 18 body sites

Patrick D Schloss **SEE ARTICLE P.59**

ARTICLES

47 EBOLA VIRUS

Reversion of advanced Ebola virus disease in nonhuman primates with ZMapp

X Qiu et al. **SEE N&V P.41**

54 CANCER

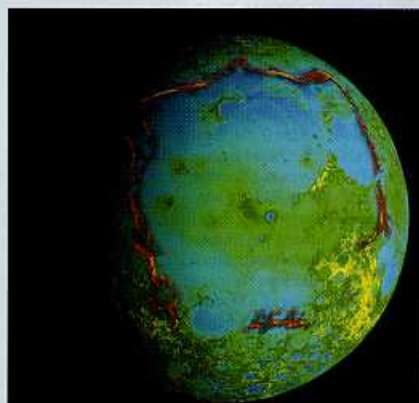

Non-cell-autonomous driving of tumour growth supports sub-clonal heterogeneity

A Marusyk et al.

59 MICROBIOLOGY

Biogeography and individuality shape function in the human skin metagenome

J Oh et al. **SEE N&V P.44**

ON THE COVER

Lunar rifts

The red outline shows gravity anomalies bordering the Procellarum, a broad feature on the nearside of the Moon, calculated with data from NASA's GRAIL mission. Andrews-Hanna et al. interpret these anomalies as evidence of ancient volcanism, not as remnants of an impact basin rim as has been suggested. **PAGE 68**

LETTERS

65 **PLANETARY SCIENCE** HCN ice in Titan's high-altitude southern polar cloud
R J de Kok, N A Teanby, L Malgouyres, P G J Irwin & S Vinatier **SEE N&V P.40**

68 **PLANETARY SCIENCE** Structure and evolution of the lunar Procellarum region as revealed by GRAIL gravity data
J C Andrews-Hanna et al.

72 **QUANTUM PHYSICS** Experimental realization of universal geometric quantum gates with solid-state spins
C Zu et al.

76 **SPECTROSCOPY** Evanescent-wave and ambient chiral sensing by signal-reversing cavity ringdown polarimetry
D Sofikitis et al.

80 **CLIMATE SCIENCES** Direct observations of evolving subglacial drainage beneath the Greenland Ice Sheet
L C Andrews et al. **SEE N&V P.38**

84 **GEODYNAMICS** Prevalence of viscoelastic relaxation after the 2011 Tohoku-oki earthquake
T Sun et al.

88 **AGRICULTURE** Molecular basis of adaptation to high soil boron in wheat landraces and elite cultivars
M Pallotta et al.

92 **GENETICS** Parent-of-origin-specific allelic associations among 106 genomic loci for age at menarche
J R B Perry et al.

98 **STEM CELLS** The neurotrophic factor receptor RET drives haematopoietic stem cell survival and function
D Fonseca-Pereira et al.

102 **CARDIOVASCULAR DISEASES** A long noncoding RNA protects the heart from pathological hypertrophy
P Han et al.

107 **CANCER** DNA-damage-induced differentiation of leukaemic cells as an anti-cancer barrier
M A Santos et al.

112 **CANCER** Endothelial-cell FAK targeting sensitizes tumours to DNA-damaging therapy
B Tavora et al.

117 **MOLECULAR BIOLOGY** Promoter sequences direct cytoplasmic localization and translation of mRNAs during starvation in yeast
B M Zid & E K O'Shea

122 **MOLECULAR BIOLOGY** Sae2 promotes dsDNA endonuclease activity within Mre11-Rad50-Xrs2 to resect DNA breaks
A E Cannavo & P Cejka
SEE N&V P.39

126 **CORRIGENDUM** Mammalian Y chromosomes retain widely expressed dosage-sensitive regulators
D W Bellott et al.

126 **CORRIGENDUM** Hotspots of aberrant epigenomic reprogramming in human induced pluripotent stem cells
R Lister et al.

NASA/COLORADO SCHOOL OF MINES/GODDARD SPACE FLIGHT CENTER/SCIENTIFIC VISUALIZATION STUDIO
