THIS WEEK

EDITORIALS

409 BIOMEDICINE

Double vision

Let's not get carried away with cloning all over again

409 BUDGET

Uncertain times

Congress should relieve the funding pressure on US science agencies now

410 OBESITY

Shades of grey

Avoid oversimplifying public-health messages

WORLD VIEW

411 Pure hype of pure research helps no one

Daniel Sarewitz

A draft bill in Congress exposes the false arguments used to promote science

RESEARCH HIGHLIGHTS

412 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Minoans out of Europe / Ladybird invader has fungal pathogen / Fishy tale of Yellowstone elk decline? / Boulder mobility tracked by cosmogenic nuclides

SEVEN DAYS

414 THE NEWS IN BRIEF

South Africa releases radio-telescope results / Arctic Council grows / Nobel physicist dies / Italian parliament expected to amend decree on experimental stem-cell therapy

CAREERS

525 TRAVEL

Here, there and everywhere

Globetrotting is part of the job for many scientists, so make the most of it

527 TURNING POINT

The US melting pot is a stimulating environment for Polish researcher Joanna Wysocka

527 CAREER BRIEFS

NEWS IN FOCUS

417 ASTRONOMY

Kepler spacecraft's planet-hunting days could be over

418 POLITICS

US science agencies leaderless as Congress stalls over nominations

419 FUNDING

Federal budget cuts threaten to stifle US flood monitoring

420 INSTITUTIONS

Change of leadership at the Russian Academy of Sciences

421 GEOPHYSICS

Caribbean sensor network aims to bridge national differences

422 MATERIALS SCIENCE

Scientists create 'artificial graphene' in bid to make ultrafast electronics

FEATURES

428 PUBLIC HEALTH

The big fat truth

Researchers are at odds over a raft of studies showing that being overweight does not always shorten life

ASTROPHYSICS

Outward bound

Ed Stone awaits Voyager's exit from the Solar System **PAGE 424**

COMMENT

431 CLIMATOLOGY

Arctic sea ice needs better forecasts

Hajo Eicken

With more 'users' than ever, the Arctic Ocean must be closely monitored

433 SCIENCE PUBLISHING

Six red flags for suspect work

C Glenn Begley

Poor-quality papers abound — here's how to sort the wheat from the chaff

BOOKS & ARTS

ECOLOGY

Wild thing

'Rewilding' could work but Shahid Naeem cautions that it depends what you mean by the term **PAGE 436**

435 DRUG DISCOVERY

Synthesized dreams

Mike Jay

437 BOOKS IN BRIEF

438 STATISTICS

Charting chance

Anthony King

CORRESPONDENCE

439 Include negative indicators in metrics / Political tactics pollute peer review / Australian academy strives for balance

OBITUARY

440 François Jacob (1920–2013)

Michel Morange

FUTURES

530* An alien named Tim

Michael Haynes

CONTENTS

23 May 2013 / Vol 497 / Issue No 7450

RESEARCH

NEW ONLINE

441 Papers published this week at nature.com

NEWS & VIEWS

442 AGEING

Beneficial miscommunication

Imbalance of mitochondrial and nuclear proteins affects lifespan
Suzanne Wolff & Andrew Dillin

SEE ARTICLE P.451

443 DENGUE VIRUS

Two hosts, two structures

Virus particles take on an expanded and less ordered form at 34 °C and above
Felix A Rey

445 STRUCTURAL BIOLOGY

Tiny enzyme uses context to succeed

The crystal structure of diacylglycerol kinase
Jimin Zheng & Zongchao Jia

SEE LETTER P.521

446 PHYSICAL CHEMISTRY

Handedness detected by microwaves

A fresh approach for chiroptical spectroscopy
Laurence A Nafie

SEE LETTER P.475

448 MATERIALS SCIENCE

When two is better than one

Synergistic assembly of carbon aerogels
Wencai Ren & Hui-Ming Cheng

449 DNA REPLICATION

Driving past four-stranded snags

Role of Pif helicases in resolving

PHYSICS

Guiding light

A left-handed metamaterial with negative refraction in the UV. [PAGE 470](#)

ON THE COVER

Help on hand

Chiral molecules have stereoisomers that are a non-superposable mirror images of one another. It is notoriously difficult to detect or measure chirality or 'handedness'. But a new approach using microwaves does just that and has potential as a tool to determine the chirality of multiple species in a mixture. [PAGES XXX & 475](#)

G-quadruplex structures

Sergei M Mirkov [SEE ARTICLE P.458](#)

ARTICLES

451 AGEING Mitonuclear protein

imbalance as a conserved longevity mechanism

R H Houtkooper et al. [SEE N&V P.442](#)

458 DNA REPLICATION Pif1 family helicases

suppress genome instability at G-quadruplex motifs

K Paeschke et al. [SEE N&V P.449](#)

LETTERS

463 ASTRONOMY Shear-driven

dynamo waves at high magnetic Reynolds number

S M Tobias & F Cattaneo

466 ASTRONOMY Flux-freezing

breakdown in high-conductivity magnetohydrodynamic turbulence

G Eyink et al.

470 PHYSICS All-angle negative

refraction and active flat lensing of ultraviolet light

T Xu, A Agrawal, M Abashin, K J Chau & H J Lezec

475 CHEMISTRY Enantiomer-specific

detection of chiral molecules via microwave spectroscopy

D Patterson, M Schnell & J M Doyle

[SEE N&V P.446](#)

478 CLIMATE SCIENCES Weakened stratospheric quasibiennial oscillation driven by increased tropical mean upwelling

Y Kawatani & K Hamilton

482 NEUROSCIENCE Corticostriatal neurons in auditory cortex drive decisions during auditory discrimination

P Znamenskiy & A M Zador

486 NEUROSCIENCE Non-redundant coding of aversive odours in the main olfactory pathway

A Dewan, R Pacifico, R Zhan, D Rinberg & T Bozza

490 BONE REMODELLING Sema3A regulates bone-mass accrual through sensory innervations

T Fukuda et al.

494 IMMUNOLOGY Immune surveillance by CD8 α^+ skin-resident T cells in human herpes virus infection

J Zhu et al.

498 VIROLOGY The TLR4 antagonist Eritoran protects mice from lethal influenza infection

K A Shirey et al.

503 DEVELOPMENTAL BIOLOGY The microRNA miR-235 couples blast-cell quiescence to the nutritional state

H Kasuga, M Fukuyama, A Kitazawa, K Kontani & T Katada

507 CELL BIOLOGY Lamin A/C and emerin regulate MKL1-SRF activity by modulating actin dynamics

C Y Ho, D E Jaalouk, M K Vartiainen & J Lammerding

512 BIOCHEMISTRY Reconfiguration of the proteasome during chaperone-mediated assembly

S Park et al.

517 GENETICS Nonsense mutation in the LGR4 gene is associated with several human diseases and other traits

U Styrkarsdottir et al.

521 STRUCTURAL BIOLOGY Crystal structure of the integral membrane diacylglycerol kinase

D Li et al. [SEE N&V P.445](#)
