#### NATURE'S MISSION, 1869:

*'The objective which it is proposed to attain by this periodical may be broadly stated as follows. It is intended, first, to place before the general public the grand results of scientific work and scientific discovery; and to urge the claims of science to move to a more general recognition in education and in daily life... Secondly, to aid scientific men [sic] themselves, by giving early information of all advances made in any branch of natural knowledge throughout the world, and by affording them an opportunity of discussing the various scientific questions which arise from time to time.'*

**Nature's mission statement was updated in 2000:**

### THIS WEEK'S PODCAST

The new edition includes background on the resolution of a long-standing paradox: why are most dwarf galaxies 'bulgeless' despite predictions to the contrary? And from the week's AOP list, the Y chromosome and chimp-human divergence.
