THIS WEEK

EDITORIALS

7 MEDICINE

Ills of the system

Germany's medical-education system urgently needs reform

7 CONFLICT

Care for the carers

More must be done to halt the flagrant breaches of the Geneva Conventions

8 LOGIC

Smooth operator

George Boole and the algebra behind the search engine

WORLD VIEW

9 Avoid major disasters by welcoming minor change

Len Fisher

Alleviating pressure is a way to address the refugee crisis

RESEARCH HIGHLIGHTS

10 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Mammoths had enemies / Wasp against wasp / Moving sounds / Why do basic science? / Fine-tuned 3D printing / Worming away at immunity

SEVEN DAYS

12 THE NEWS IN BRIEF

Cassini captures geysers on Enceladus / Moves to improve study reproducibility / Gender bias in engineering

CAREERS

125 SUPERVISION

Clear direction

The ability to manage laboratory members is a skill that project leaders may have to work at

NATUREJOBS ADVERTISING FEATURE

Spotlight on Denmark

NEWS IN FOCUS

15 NEUROSCIENCE

Electrodes enter trials to bolster failing memories

16 SPACE

Rosetta probe prepares to go out with a bang

18 CONSERVATION

Indonesian fires spark fears for endangered wildlife

19 BUSINESS

Silicon Valley's venture capitalists take the plunge with synthetic biology

20 INDIA

Prominent scientists condemn religiously motivated killings

20 CHEMISTRY

Software takes the guesswork out of predicting crystal structures

FEATURES

NEUROSCIENCE

The baby experiment

London lab seeks the secrets of the infant brain **PAGE 22**

26 ARCHAEOLOGY

And then there were none

Why did an ancient people flee their homes in the American Southwest?

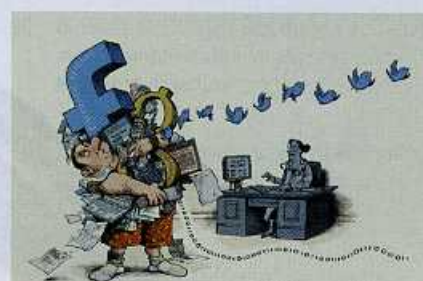

TOOLBOX

123 REFERENCE-MANAGEMENT SOFTWARE

Eight ways to clean a digital library

A number of tools can help you keep on top of your reference collection

COMMENT

INFORMATICS

Data synthesis

It's time to join up the wealth of health information, say Julian H Elliott and colleagues **PAGE 31**

33 SOCIETY

Build digital democracy

Dirk Helbing & Evangelos Pournaras
Open sharing of data from smart devices would empower people

BOOKS & ARTS

35 NEUROSCIENCE

Tortured reasoning

Lasana T Harris

36 INNOVATION

A binary life

Timo Hannay

37 BOOKS IN BRIEF

CORRESPONDENCE

38 Make transport greener / Badger headcount / China's carbon emissions / Bf3R standards for animal experimentation

FUTURES

128 One slow step for man
S.R. Algonon

CONTENTS

5 November 2015 / Vol 527 / Issue No 7576

RESEARCH

NEW ONLINE

39 Papers published this week at nature.com

NEWS & VIEWS

40 SUSTAINABILITY

Australia at the crossroads

Scenario modelling for a continent's environmental and economic future

Benjamin L Bodirsky
& Alexander Popp **SEE ARTICLE P.49**

41 MATERIALS SCIENCE

Droplets leap into action

Spontaneously bouncing droplets on superhydrophobic surfaces

Doris Vollmer & Hans-Jürgen Butt
SEE LETTER P.82

43 METABOLISM

Light on leptin link to lipolysis

Optogenetic activation of sympathetic axons causes fat loss in mice

J Ruud & Jens C Brüning

44 MICROBIOLOGY

Electrical signalling goes bacterial

Potassium ion channels aid electrical communication across a biofilm

Sarah D Beagle & Steve W Lockless
SEE ARTICLE P.59

45 NANOPHYSICS

Quantum sound waves stick together

A test of the quantum theory of sound

Dave Kelpinski **SEE LETTER P.74**

46 GENE REGULATION

Expression feels two pulses

Combinatorial transcription-factor pulses modulate gene expression

Antoine Baudrimont & Attila Becskei
SEE ARTICLE P.54

ARTICLES

49 ENVIRONMENTAL ECONOMICS Australia 'free to choose' economic growth and falling environmental pressures

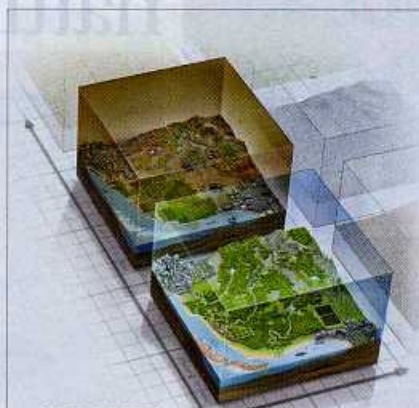

S Hatfield-Dodds et al. **SEE N&V P.40**

54 SYSTEMS BIOLOGY Combinatorial gene regulation by modulation of relative pulse timing

Y Lin, C H Sohn, C K Dalal, L Cai
& M B Elowitz **SEE N&V P.46**

59 MICROBIOLOGY Ion channels enable electrical communication in bacterial communities

A Prindle et al. **SEE N&V P.44**

ON THE COVER

Growing pains

A representation of two alternative scenarios for the Australian economy to 2050. Steve Hatfield-Dodds et al. use a multimodel framework to show that a single nation-continent, Australia, can achieve economic improvement without ecological deterioration, but that specific political and economic choices need to be made to achieve this. **PAGES 40 & 49**

64 STRUCTURAL BIOLOGY Architecture of the mammalian mechanosensitive Piezo1 channel

J Ge et al.

LETTERS

70 ASTROPHYSICS Episodic molecular outflow in the very young protostellar cluster Serpens South

A L Plunkett et al.

74 QUANTUM PHYSICS Hong–Ou–Mandel interference of two phonons in trapped ions

K Toyoda, R Hiji, A Noguchi
& S Urabe **SEE N&V P.45**

78 POLYMER CHEMISTRY An aqueous, polymer-based redox-flow battery using non-corrosive, safe, and low-cost materials

T Janoschka et al.

82 MATERIALS SCIENCE Spontaneous droplet trampolining on rigid superhydrophobic surfaces

T M Schutz et al. **SEE N&V P.41**

86 ORGANIC CHEMISTRY Rhodium-catalysed syn-carboamination of alkenes via a transient directing group

T Piou & T Rovis

91 ZOOLOGY The genetic sex-determination system predicts adult sex ratios in tetrapods

I Pipoly et al.

95 NEUROSCIENCE Differential responses to lithium in hyperexcitable neurons from patients with bipolar disorder

J Mertens et al.

100 CANCER Microenvironment-induced PTEN loss by exosomal microRNA primes brain metastasis outgrowth

L Zhang et al.

105 CELL BIOLOGY Autophagy mediates degradation of nuclear lamina

Z Dou et al.

110 GENETIC ENGINEERING Conformational control of DNA target cleavage by CRISPR–Cas9

S H Sternberg, B LaFrance, M Kaplan
& J A Doudna

114 VIROLOGY Crystal structure of the RNA-dependent RNA polymerase from influenza C virus

N Hengrung et al.

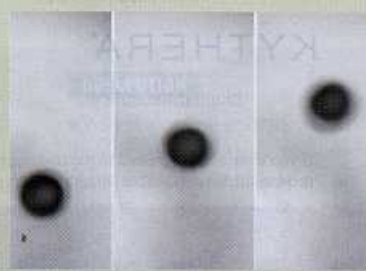

118 STRUCTURAL BIOLOGY Structural insight into substrate preference for TET-mediated oxidation

L Hu et al.

MATERIALS SCIENCE

On the up

How trampolining drops of water 'self remove' from a specially designed superhydrophobic surface. **PAGE 82**

EMILY COOPER
