

CONTENTS

5 February 2015 / Vol 518 / Issue No 7537

THIS WEEK

EDITORIALS

- 5 **FUNDING**
Redirection home
Europe's researchers need to keep an eye on where Horizon 2020 money goes
- 5 **SAUDI ARABIA**
House of cards
Western institutions should challenge human-rights abuses in partner states
- 6 **TECHNOLOGY**
Road test
The route to driverless cars requires governments to take the wheel

WORLD VIEW

- 7 **Major biodiversity initiative needs support**
Ehsan Masood
Given space, the nascent organization can make political inroads

RESEARCH HIGHLIGHTS

8 **SELECTIONS FROM THE SCIENTIFIC LITERATURE**
Sweet temptation / It is rocket science / Californian birds / Journals of choice / Squid colour story / Counting by chickens / Europe feels the heat

SEVEN DAYS

- 10 **THE NEWS IN BRIEF**
China opens biosafety lab / Myriad settles cancer-test lawsuit / Carl Djerassi dies / US public opinion of scientists measured

CAREERS

- 127 **UNDERGRADUATE RESEARCHERS**
Fresh perspective
Undergraduates bring vitality to a lab but will need support and sound advice
- 129 **TURNING POINT**
Publication of negative results, even if they fail to replicate your own work, is all part of the scientific process to cognitive psychologist William S. Horton
- 129 **CAREER BRIEFS**

NEWS IN FOCUS

- 13 **POLICY**
Obama's budget seeks boost for science
- 16 **COSMOLOGY**
Gravitational-wave result is dead but search for cosmic ripples goes on
- 17 **MATERIALS SCIENCE**
Graphene's silicon cousin makes technological debut
- 18 **SAUDI ARABIA**
University researchers back softly, softly approach to modernization

FEATURES

ON THE COVER

Drive time

The Mercedes F 015 Concept car at the North American International Auto Show in Detroit last month. Another step towards the goal of autonomous or 'driverless' cars. Cover: Steve Lagreca/Shutterstock.com **PAGE 20**

- 24 **NEUROSCIENCE**
The brain, interrupted
The bid to unpick the cognitive effects of premature birth

TOOLBOX

- 125 **PROGRAMMING TOOLS**
Pick up Python
As computer languages go, Python is easy to learn, but it still packs a punch

COMMENT

REPRODUCIBILITY

Research in a bind

Antibodies used in the lab need to be standardized, urge Andrew Bradbury, Andreas Plückthun *et al.* **PAGE 27**

- 29 **POLICY**
Start research on climate engineering
Jane C S Long, Frank Loy & M Granger Morgan
Small-scale experiments would build public trust and governance

BOOKS & ARTS

- 32 **NUCLEAR PHYSICS**
New light on a cold war conundrum
Sharon Weinberger
- 33 **BOOKS IN BRIEF**

CORRESPONDENCE

- 35 Achieving flood resilience / French postdocs lose out / Introducing perceptogens / Typhoon forecasting / African neurosciences

OBITUARY

- 36 **Mary F Lyon (1925–2014)**
Sohaila Rastan

FUTURES

- 132 **How to configure your quantum disambiguator**
Stewart C Baker

RESEARCH

NEW ONLINE

37 Papers published this week at nature.com

NEWS & VIEWS

38 CHEMICAL BIOLOGY

How to minimize antibodies

Small molecules that recruit immune cells to attack cancer cells
Christoph Rader

39 EARTH SCIENCE

The slippery base of a tectonic plate

A 10-kilometre-thick channel beneath the Pacific plate
Catherine A Rychert
SEE LETTER P.85

41 CELL BIOLOGY

Organelles under light control

Optogenetic regulation of intracellular organization
Franck Perez **SEE LETTER P.111**

42 DEVICE FABRICATION

Three-dimensional printed electronics

Making fully 3D-printed quantum-dot-based light-emitting diodes
Jennifer A Lewis & Bok Y Ahn

43 ECOLOGY

Deep and complex ways to survive bleaching

Reef regime shifts from corals to macroalgae in response to bleaching
John M Pandolfi **SEE LETTER P.94**

45 BIOCHEMISTRY

Elusive source of sulfur unravelled

The metabolic origin of sulfur in a naturally occurring antibiotic
Charles E Melançon III **SEE LETTER P.115**

46 PALAEOCLIMATE

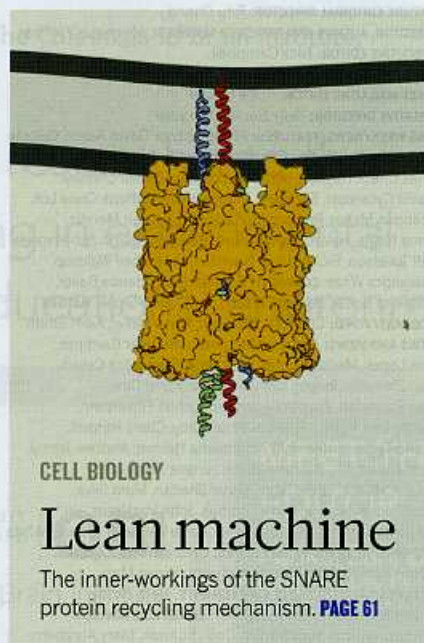

Climate sensitivity in a warmer world

The strength of positive climate feedbacks during warm intervals
David W Lea **SEE ARTICLE P.49**

ARTICLES

49 **CLIMATE SCIENCES** Plio-Pleistocene climate sensitivity evaluated using high-resolution CO₂ records
M A Martínez-Botí et al. **SEE N&V P.46**

55 **BIOTECHNOLOGY** Biocontainment of genetically modified organisms by synthetic protein design
D J Mandell et al.

CELL BIOLOGY

Lean machine

The inner-workings of the SNARE protein recycling mechanism. **PAGE 61**

61 **CELL BIOLOGY** Mechanistic insights into the recycling machine of the SNARE complex
M Zhao et al.

68 **STRUCTURAL BIOLOGY** Transport domain unlocking sets the uptake rate of an aspartate transporter
N Akyuz et al.

LETTERS

74 **ASTROPHYSICS** A possible close supermassive black-hole binary in a quasar with optical periodicity
M J Graham et al.

77 **MATERIALS SCIENCE** Brittle intermetallic compound makes ultrastrong low-density steel with large ductility
S-H Kim, H Kim & N J Kim

80 **ORGANIC CHEMISTRY** Silylation of C-H bonds in aromatic heterocycles by an Earth-abundant metal catalyst
A A Toutov et al.

85 **SEISMOLOGY** A seismic reflection image for the base of a tectonic plate
T A Stern et al. **SEE N&V P.39**

89 **BIOTECHNOLOGY** Recoded organisms engineered to depend on synthetic amino acids
A J Rovner et al.

94 **ECOLOGY** Predicting climate-driven regime shifts versus rebound potential in coral reefs

N A J Graham, S Jennings, M A MacNeil, D Mouillot & S K Wilson
SEE N&V P.43

98 **IMMUNOLOGY** Transferred interbacterial antagonism genes augment eukaryotic innate immune function
S Chou et al.

102 **GENETICS** Exome sequencing identifies rare *LDLR* and *APOA5* alleles conferring risk for myocardial infarction
R Do et al.

107 **DRUG DISCOVERY** MicroRNA silencing for cancer therapy targeted to the tumour microenvironment
C J Cheng et al.

111 **CELL BIOLOGY** Optogenetic control of organelle transport and positioning
P van Bergeijk, M Adrian, C C Hoogenraad & L C Kaptein
SEE N&V P.41

115 **CHEMICAL BIOLOGY** Metabolic coupling of two small-molecule thiols programs the biosynthesis of lincomycin A
Q Zhao, M Wang, D Xu, Q Zhang & W Liu
SEE N&V P.45

120 **STRUCTURAL BIOLOGY** Structure and function of a single-chain, multi-domain long-chain acyl-CoA carboxylase
T H Tran et al.

ECOLOGY

Coming back

Coral reefs can renew after ecosystem damage, depending on structure, depth and fish density. **PAGE 94**
