9 May 2013 / Vol 497 / Issue No 7448

THIS WEEK

EDITORIALS

157 FUNDING

Right to remain silent

The US should not put words in the mouths of those it funds

157 BIOFUELS

The cleaner state

California offers regulators positive lessons on renewable fuels

158 ANIMAL RESEARCH

Voice of Pro-Test

Scientists should be encouraged to defend animal research

WORLD VIEW

159 China's citizens must act to save their environment

Qiang Wang

Public pressure is helping to tackle air pollution in Beijing and beyond

RESEARCH HIGHLIGHTS

160 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Activating the C-H bond / Written in glass / Volcanoes reclassified / Putting off Alzheimer's / Bees need honey / Archerfish on target

SEVEN DAYS

162 THE NEWS IN BRIEF

Age limit lifted on emergency contraceptive / The toll of Somalia's famine / Coronavirus continues to spread

CAREERS

277 COLUMN

On my way to being a scientist

Thomas M Schofield

The career path for a research scientist can be winding — and rewarding

278 CAREER BRIEFS

279 TURNING POINT

There's life in long-lost species and Ben Novak intends to prove it

NATUREJOBS ADVERTISING FEATURE

Spotlight on women in science

NEWS IN FOCUS

165 NUCLEAR WEAPONS

US energy labs get cash boost to modify stockpiled weapons

167 OCEANOGRAPHY

Funding agencies ponder plan to monitor Atlantic currents

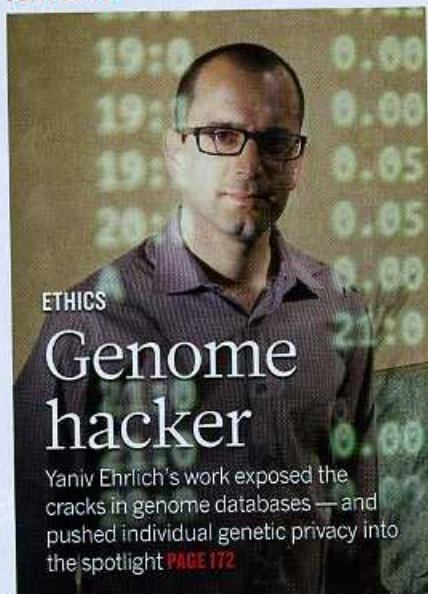

168 RESOURCES

Price hike spurs Russia and Qatar to develop new helium reserves

170 RESEARCH ETHICS

Questions raised over motion-capture data in Jamaican dance study

FEATURES

ETHICS

Genome hacker

Yaniv Ehrlich's work exposed the cracks in genome databases — and pushed individual genetic privacy into the spotlight **PAGE 172**

176 PROSTHETICS

Once more, with feeling

The challenges of developing artificial limbs with a sense of touch

COMMENT

179 POLICY

A call for peace on climate and conflict

Andrew R Solow

We need new ways to work on the link between climate and conflict

181 SUSTAINABLE MOBILITY

A vision of our transport future

Lawrence D Burns

It's time to reinvent the automobile — we already have the technology

183 PALAEOLOGY

Free digital scans of human fossils

Jean-Jacques Hublin

Open access to virtual palaeontology would transform evolutionary studies

BOOKS & ARTS

184 PHILOSOPHY

Deepities, cranes and skyhooks

Melvin Konner

185 BOOKS IN BRIEF

186 DATA

VISUALIZATION

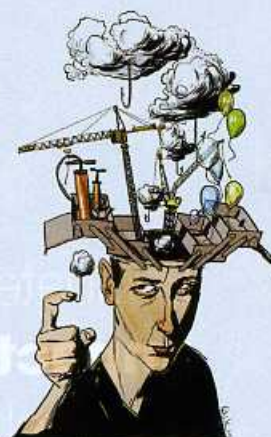

Drawing out the meaning

Felice Frankel

187 ARTS

Framing change

Daniel Cressey

CORRESPONDENCE

188 Tested on bees / Geoengineering safety / Dangers of palm oil / Right on ncRNA

FUTURES

282 The front line

Sylvia

Spruck

Wrigley

RESEARCH

NEW ONLINE

189 Papers published this week at nature.com

NEWS & VIEWS

190 FORUM: NUCLEAR PHYSICS

Exotic pear-shaped nuclei

What the shapes of atomic nuclei mean to nuclear and particle physicists
C J (Kim) Lister; Jonathan Butterworth

SEE ARTICLE P.199

191 GALAXY FORMATION

The cosmic web in focus

Discrete clouds of neutral hydrogen gas between Andromeda and Triangulum

Robert Braun SEE LETTER P.224

193 STRUCTURAL BIOLOGY

Security measures of a master regulator

Crystal structure of the catalytically active mTOR kinase

Dario R Alessi & Yogesh Kulathu

SEE ARTICLE P.217

194 IMMUNOLOGY

Memory cells sound the alarm

Resident memory T cells secrete IFN γ to recruit additional memory cells
Jennifer E Smith-Garvin & Luis J Sigal

196 CELL BIOLOGY

Death brings new life to muscle

Apoptotic myoblasts may aid muscle development, regeneration and repair

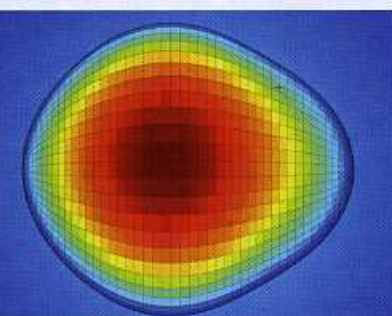

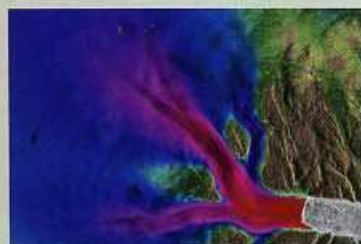

Shannon F Yu & Mary K Baylies

SEE LETTER P.263

CLIMATE SCIENCE

On the level

A new model of Greenland ice loss lessens the sea level rise. **PAGE 235**

ON THE COVER

Shape shift

A representation of the radium-224 atomic nucleus. Accelerated to 8% of the speed of light in the REX-ISOLDE facility at CERN, this nucleus undergoes octupole deformation and distorts into a pear shape — a phenomenon predicted in theory and now confirmed. **PAGES 190 & 199**

197 PHYSIOLOGY

Inflammation links ageing to the brain

Hypothalamic NF- κ B signalling and the regulation of systemic ageing

Dana Gabuzda & Bruce A Yankner

SEE ARTICLE P.211

ARTICLES

199 PHYSICS Studies of pear-shaped nuclei using accelerated radioactive beams

L P Gaffney et al. SEE N&V P.190

205 NEUROSCIENCE Hierarchy of orofacial rhythms revealed through whisking and breathing

J D Moore et al.

211 AGEING Hypothalamic programming of systemic ageing involving IKK- β , NF- κ B and GnRH

G Zhang et al. SEE N&V P.197

217 STRUCTURAL BIOLOGY mTOR kinase structure, mechanism and regulation

H Yang et al. SEE N&V P.193

LETTERS

224 ASTRONOMY Discrete clouds of neutral gas between the galaxies M31 and M33

S A Wolfe, D J Pisano, F J Lockman, S S McGaugh & E J Shaya
SEE N&V P.191

227 PHYSICS Bell violation using entangled photons without the fair-sampling assumption

M Giustina et al.

231 PHYSICS Formation of a topological non-Fermi liquid in MnSi

R Ritz et al.

235 CLIMATE SCIENCE Future sea-level rise from Greenland's main outlet glaciers in a warming climate

F M Nick et al.

239 STEM CELLS M-CSF instructs myeloid lineage fate in single haematopoietic stem cells

N Mossadegh-Keller et al.

244 MOLECULAR BIOLOGY A role for the Perlman syndrome exonuclease Dis3l2 in the Lin28-let-7 pathway

H-M Chang, R Triboulet, J E Thornton & R I Gregory

249 CARDIOVASCULAR BIOLOGY Meis1 regulates postnatal cardiomyocyte cell cycle arrest

A I Mahmoud et al.

254 BACTERIAL GENETICS A CRISPR/Cas system mediates bacterial innate immune evasion and virulence

T R Sampson, S D Saroj, A C Llewellyn, Y-L Tzeng & D S Weiss

258 IMMUNOLOGY Thymus-derived regulatory T cells contribute to tolerance to commensal microbiota

A Cebula et al.

263 CELL BIOLOGY Phosphatidylserine receptor BAI1 and apoptotic cells as new promoters of myoblast fusion

A E Hochreiter-Hufford et al.

SEE N&V P.196

268 STRUCTURAL BIOLOGY Crystal structure of a folate energy-coupling factor transporter from *Lactobacillus brevis*

K Xu et al.

272 STRUCTURAL BIOLOGY Structure of a bacterial energy-coupling factor transporter

T Wang et al.
