14 April 2011 / Vol 472 / Issue No 7342

THIS WEEK

EDITORIALS

135 JAPAN

A little knowledge

The data flow for Fukushima is impressive — but not very user friendly

135 DISASTER MANAGEMENT

This is not a drill

It is not acceptable to pretend that the worst won't happen

136 LINGUISTICS

Universal truths

When it comes to scientific theories, one size does not fit all

WORLD VIEW

137 Governments must pay for clean-energy innovation

Marty Hoffert

The current energy debate should focus on funding a clean revolution

RESEARCH HIGHLIGHTS

138 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Camouflage exposed / Graphene foam makes its debut / Siskins show brains as well as beauty / An RNA enzyme that makes another RNA enzyme

SEVEN DAYS

140 THE NEWS IN BRIEF

US Congress finally agrees budget / Virgin launches submarine expedition / Australian researchers take to the streets over cuts / India says water is free of antibiotic-resistant bacteria / Sub-Saharan Africa shows some areas of growth in research spending / US biopharmaceutical firms feel the pain

CAREERS

249 CONSULTING

Juggling act

Consultancies boost your income — but may make life very complicated

251 TURNING POINT

Giovanna Tinetti on what it takes to get an astrobiology experiment off the ground

NEWS IN FOCUS

143 ENERGY

Japan's struggle to meet electricity demand raises doubts over climate targets

145 RADIOECOLOGY

Researchers call for marine monitoring projects to assess impact of Fukushima

146 NUCLEAR ACCIDENT

Reactor damage suggests Japan faces a long clean-up process

149 PATENT REFORM

US seeks to clarify process for assigning ownership of inventions

150 PALAEOLOGY

Bid launched to make online data deposition compulsory

FEATURES

156 NEUROSCIENCE

Brain buzz

To the surprise of many, it seems that electrical stimulation can boost the brain

ON THE COVER

Deep wounds

Crude oil from the Deepwater Horizon oil spill washes ashore in June 2010. One year on, researchers are trying to assess the damage.

Credit: Dave Martin/AP

PAGE 152

COMMENT

159 NITROGEN EMISSIONS

Too much of a good thing

Mark A Sutton, Oene Oenema, Jan Willem Erisman, Adrian Leip, Hans van Grinsven & Wilfried Winiwarter

162 ENVIRONMENT

A frozen hell

Jeffrey Short & Susan Murray

BOOKS & ARTS

164 MEDICINE

Blood feud

W F Bynum

165 BOOKS IN BRIEF

166 NEUROETHICS

The origins of morality

Adina Roskies

167 BIOTECHNOLOGY

DIY biology

Bart Penders

THEATRE

Principle man

Newton's life transfers to the stage entertainingly enough — but it helps if you are physicist, says Philip Ball

PAGE 168

CORRESPONDENCE

169 NIH must stick to basics / Boost for tuna / Nuclear risk / Local droughts

OBITUARY

170 Simon van der Meer (1925–2011)

Carlo Rubbia

FUTURES

254 Steve Sepp, tasty! tasty!

Matthew Sanborn Smith

RESEARCH

NEW ONLINE

171 Papers published this week at nature.com

NEWS & VIEWS

172 ATOMIC PHYSICS

Spin drag in a perfect fluid

Insights from an ultracold, strongly interacting atomic Fermi gas

John E Thomas [SEE LETTER P.201](#)

173 NEUROSCIENCE

Channelopathies have many faces

The multiple roles of a sodium channel

Stephen G Waxman [SEE ARTICLE P.186](#)

174 MAMMALIAN EVOLUTION

A jaw-dropping ear

Evolution of the hearing apparatus in mammals

Anne Weil [SEE ARTICLE P.181](#)

176 SIGNAL TRANSDUCTION

How cells sense energy

Studies of the enzyme AMPK

D Grahame Hardie [SEE LETTER P.230](#)

177 BIOMECHANICS

Swimming in the Sahara

Sandfish locomotion

Stephanie B Crofts & Adam P Summers

178 SPECTROSCOPY

A closer look at polymer annealing

Single-molecule spectroscopy applied to polymers

Yi Fu & Joseph R Lakowicz

179 HOST-MICROBE INTERACTION

Innate immunity cues virulence

Subversion of the host immune system by *Salmonella*

Michelle M C Buckner & B Brett Finlay
