THIS WEEK

EDITORIALS

265 HEALTH

Don't blame the CIA

Rumours of fake vaccination must not obscure problems in health care in Pakistan

265 GENETIC ENGINEERING

Growing pains

Decades-old US regulations on modifying crops need updating

266 PHILANTHROPY

With strings

Industry involvement in medical research will help turn ideas into therapies

WORLD VIEW

267 Focus on quality, not just quantity

Changhui Peng

China should focus on quality research — and on tackling the big questions

RESEARCH HIGHLIGHTS

268 SELECTIONS FROM THE SCIENTIFIC LITERATURE

E. coli's shock tactics / Lizards learn a lesson / Urban carbon sinks / Hope for meningitis vaccine / Graphene textiles / Dinosaurs alive at the K-T boundary

SEVEN DAYS

270 THE NEWS IN BRIEF

European research rethink / Rare toad seen for the first time since the 1920s / Ship efficiency standards set / Californian universities hike tuition fees / Egypt's antiquities minister fired

CAREERS

413 MINNESOTA

Medicine and materials

Doubts over funding cloud prospects for the green technology sector

415 TURNING POINT

The ability to communicate is a big career advantage, says research chemist Christian Hackenberger

415 CAREERS NEWS

NEWS IN FOCUS

273 MOLECULAR BIOLOGY

Structure of key membrane receptor determined

274 BIOTECHNOLOGY

Technology for genetic modification has advanced beyond US regulations

275 PHILANTHROPY

Drug patents provide growing income streams for medical research charities

276 SPACE SCIENCE

Astrophysics missions feel the squeeze again, following NASA's budget cut

278 GENOMICS

Ion chip DNA sequencing proves its worth with computer pioneer Gordon Moore as guinea pig

279 GENETICS

Mouse breeding project helps to pin down genetic origins of disease

FEATURES

283 SPORTS DOPING

Racing just to keep up

Can anti-doping authorities keep pace with cheating sports stars?

PHYSICS

Still in suspense

High-temperature superconductors cling on to their secrets **PAGE 200**

COMMENT

287 AGRICULTURE

Freeze the footprint of food

Jason Clay

290 ECOLOGY

Conservation science outside the comfort zone

Sandy J Andelman

BOOKS & ARTS

292 EPIDEMIOLOGY

Charting the spread of sickness

Andy Tatem

293 BOOKS IN BRIEF

TECHNOLOGY

Suit you, sir

Margaret Weitekamp welcomes a book that gives the lowdown on the iconic Apollo spacesuit **PAGE 294**

295 Q&A

The sci-fi adviser

Richard Berendzen, adviser on the award-winning movie *Another Earth*, sees robots as tomorrow's astronauts

CORRESPONDENCE

296 Chimps are poor immunological models / Indian vaccine trial defended / Chinese scientists look to home

FUTURES

418 Event horizon

Jeff Hecht

21 July 2011 / Vol 475 / Issue No 7356

RESEARCH

NEW ONLINE

297 Papers published this week at nature.com

NEWS & VIEWS

298 QUANTUM PHYSICS

Spin flips with a single proton
Route to a high-precision test of matter–antimatter symmetry
Rainer Blatt

299 NEUROSCIENCE

Imprinting in the brain
The role of *Dlk1* in mouse neurogenesis
Edwin C Oh & Nicholas Katsanis
[SEE LETTER P.381](#)

300 EARTHQUAKES

The lessons of Tohoku-Oki
Geodetic analyses of the Japan earthquake of March 2011
Jean-Philippe Avouac [SEE LETTER P.373](#)

301 MICROBIOLOGY

Molecular syringes scratch the surface
Insights from studies of the bacterial type VI secretion system
Peggy Cotter [SEE ARTICLE P.343](#)

303 ASTROPARTICLE PHYSICS

A multi-messenger story
The IceCube search for γ -ray-burst neutrinos
Dieter H Hartmann

304 MOLECULAR PROGRAMMING

DNA and the brain
A network of four artificial neurons with simple memory functions
Anne Condon [SEE LETTER P.368](#)

305 STRUCTURAL BIOLOGY

Peering into the spark of life
Crystal structure of the sodium channel NavAb
Richard Horn [SEE ARTICLE P.353](#)

ARTICLES

343 MICROBIOLOGY Type VI secretion delivers bacteriolytic effectors to target cells
A B Russell et al. [SEE N&V P.301](#)

348 GENOMICS An integrated semiconductor device enabling non-optical genome sequencing
J M Rothberg et al. [SEE NEWS P.278](#)

353 STRUCTURAL BIOLOGY The crystal structure of a voltage-gated

ON THE COVER

Duel track

In this clash between two bacteria, type VI secretion effector proteins transferred from donor (red) to recipient degrade the recipient's cell wall, breaching the peptidoglycan layer. The pathogen *Pseudomonas aeruginosa* uses this tactic to beat the competition. [PAGES 301 & 343](#)

sodium channel

J Payandeh, T Scheuer, N Zheng & W A Catterall [SEE N&V P.305](#)

LETTERS

359 PHYSICS Sideband cooling of micromechanical motion to the quantum ground state
J D Teufel et al.

364 APPLIED PHYSICS Inkjet printing of single-crystal films
H Minemawari et al.

368 INFORMATION TECHNOLOGY Neural network computation with DNA strand displacement cascades
L Qian, E Winfree & J Bruck [SEE N&V P.304](#)

373 GEOPHYSICS Coseismic and postseismic slip of the 2011 magnitude-9 Tohoku-Oki earthquake
S Ozawa et al. [SEE N&V P.300](#)

377 NEUROSCIENCE Excitatory transmission from the amygdala to nucleus accumbens facilitates reward seeking
G D Stuber et al.

381 STEM CELLS Postnatal loss of *Dlk1* imprinting in stem cells and niche astrocytes regulates neurogenesis
S R Ferrón et al. [SEE N&V P.299](#)

386 STEM CELLS Induction of functional hepatocyte-like cells from mouse fibroblasts by defined factors
P Huang et al.

390 BIOTECHNOLOGY Direct conversion of mouse fibroblasts to hepatocyte-like cells by defined factors
S Sekiya & A Suzuki

394 CELL BIOLOGY Protein targeting and degradation are coupled for elimination of mislocalized proteins
T Hessa et al.

398 PLANT SCIENCES The ELF4-ELF3-LUX complex links the circadian clock to diurnal control of hypocotyl growth
D A Nusinow et al.

403 MOLECULAR BIOLOGY Structure and mechanism of the Swi2/Snf2 remodeller Mot1 in complex with its substrate TBP
P Wollmann et al.

408 BIOPHYSICS Multi-domain conformational selection underlies pre-mRNA splicing regulation by U2AF
C D Mackereth et al.

412 ERRATUM Observation of the antimatter helium-4 nucleus
The STAR Collaboration

GENOMICS

Dark star

DNA sequencing chips are made cheaper by sensing chemistry, not light. [PAGES 278 & 348](#)
