

Research Papers

Classification of flag-transitive primitive symmetric (v, k, λ) designs with $PSL(2, q)$ as socle
..... Delu TIAN, Shenglin ZHOU (127)

On the atom-bond connectivity index of two-trees
..... Siyong YU, Haixing ZHAO, Yaping MAO, Yuzhi XIAO (140)

On derivations of bounded hyperlattices
..... Juntao WANG, Youngbae JUN, Xiaolong XIN, Yuxi ZOU (151)

On Jordan biderivations of triangular matrix rings Driss AIAT HADJ AHMED (162)

The twin domination number of Cartesian product of directed cycles ... Hongxia MA, Juan LIU (171)

Limiting property of the distribution function of L^p function at endpoints
..... Shaozhen XU, Dunyan YAN (177)

Trace Formulae for the nonlinearization of Periodic finite-bands Dirac spectral problem
..... Guangyao ZHANG, Huiqian ZHU (183)

n -clean rings with involutions Jian CUI, Xiaobin YIN (194)

Persistence and almost periodic solutions in a model of plankton allelopathy with impulsive effects
..... Lijun XU, Yaqin LI, Yonghong YANG, Tianwei ZHANG (201)

Local well-posedness for the Hyperelastic rots equation in Besov space Shenggui LIU (213)

The construction of I -bornological vector spaces Hui ZHANG, Huapeng ZHANG (223)

A note on almost completely regular spaces and c -semistratifiable spaces
..... Lianhua FANG, Lihong XIE, Kedian LI (233)

Wittmann type strong laws of large numbers for blockwise m -negatively associated random variables
..... Guohui ZHANG, Henar URMENETA, Andrei VOLODIN (239)

Legendre polynomials-based numerical differentiation: a convergence analysis in a weighted L^2 space
..... Qin FANG, Haojie LI, Min XU (247)
