

Research Papers

The signless Laplacian spectral characterization of strongly connected bicyclic digraphs

..... Weige XI, Ligong WANG (1)

Decomposing complete 3-uniform hypergraphs into cycles

..... Guanru LI, Yiming LEI, Yuansheng YANG, Jirimutu (9)

Some recursion formulae for the number of Derangements and bell numbers

..... Yuan HE, Jing PAN (15)

The application of rough set theory in pseudo-BCK-algebra ..... Xiaoyan MAO, Huijie ZHOU (23)

G-inner actions equivalence of G-crossed products ..... Haijun CAO (36)

On skew strongly reversible rings relative to a monoid

..... Zhaiming PENG, Qinqin GU, Liang ZHAO (43)

Inequalities on the triangle ..... Zlatko PAVIĆ (51)

Some extensions and improvements of discrete Carlson's inequality ... Jianzhong LIU, Bo JIANG (61)

Fixed points of mappings satisfying a weakly contractive type condition

..... Dipankar DAS, Nilakshi GOSWAMI (70)

Existence and uniqueness of solutions for a nonlinear fractional integrodifferential equation with

three-point fractional boundary conditions .... Zhenyu GUO, Min LIU, Zhijing WANG (79)

Nontrivial solutions for a class of quasilinear elliptic equations ..... Ruichang PEI, Jihui ZHANG (87)

Singular integral operators on new BMO and Lipschitz spaces of Homogeneous type

..... Peng LI, Jiang ZHOU (97)

Two new relative efficiencies of the weighted mixed estimator with respect to the ordinary least

squares estimator in linear regression models ..... Min LI, Jibo WU (109)

$L^p$  solutions of BSDEs with non-uniformly linear growth generators and general time interval

..... Gaojie LU, Long JIANG, Depeng LI, Shengjun FAN (117)
