

Contents

Research Papers

On a variational model for selective image segmentation of features with infinite perimeter
..... Lavdie RADA, Ke CHEN (253)

Primitive non-powerful symmetric loop-free signed digraphs with base 3 and
minimum number of arcs Lihua YOU, Yuhan WU (273)

Finding community structure in networks using a shortest-path-based k -means algorithm
.....Jinglu GAO (288)

Gorenstein homological dimensions and auslander categories with respect to
a semidualizing module Chunxia ZHANG, Limin WANG, Zhongkui LIU (297)

Abundant semigroups which are disjoint unions of multiplicative adequate transversals
..... Haijun LIU, Xiaojiang GUO (312)

Multiple positive solutions of boundary value problems for systems of
nonlinear third-order differential equations Yaohong LI, Xiaoyan ZHANG (321)

A construction of low-density parity-check codes Xiuling SHAN, Tienan LI (330)

Negative \mathbb{Z} -homogeneous derivations for even parts of odd Hamiltonian superalgebras
..... Xiuying HUA, Wende LIU (337)

Bounds of solutions of a kind of hyper-chaotic systems and application
..... Fuchen ZHANG, Yuhuan LI, Chunlai MU (345)

A note on monotonically metacompact spaces Hui LI, Liangxue PENG (353)

Fredholm weighted composition operators on Hardy space Liankuo ZHAO (361)

New generalized L -KKM type theorems in topological spaces with applications
..... Min FANG (365)

Solving a class of generalized Nash equilibrium problems Peiyu LI, Guihua LIN (372)
