

Research Papers

The signless Laplacian spectral radius of tricyclic graphs with a given girth
..... Lu QIAO, Ligong WANG (379)

The maximum Balaban index (Sum-Balaban index) of unicyclic graphs
..... Lihua YOU, Xin DONG (392)

On $L(1,2)$ -edge-labelings of some special classes of graphs Dan HE, Wensong LIN (403)

Minimal energy on unicyclic graphs Shengjin JI, Yongke QU (414)

Multiplicative perturbation bounds for the SR factorization Yanfei YANG, Hanyu LI (423)

Riemann-Hilbert problem and its well-posed-ness for elliptic complex equations of
first order in multiply connected domains Guochun WEN, Liping WANG (435)

Approximation solvability of a new system of set-valued variational inclusions involving
generalized $H(\cdot, \cdot)$ -accretive mapping in real q -uniformly smooth Banach spaces
..... Dapeng GAO, Shiqiang FENG (446)

On the structures of Hom-Lie algebras Shengxiang WANG, Xiaohui ZHANG (459)

Global exponential stability of periodic solution for competitive neural networks with time-varying
and distributed delays on time scales
..... Yang LIU, Yongqing YANG, Tian LIANG, Xianyun XU (467)

Second order derivative estimates of the solutions of a class of Monge-Ampère equations
..... Yadong WU, Hepeng LI (475)

Homoclinic solutions for a class of prescribed mean curvature equation with a deviating argument
..... Shiping LU, Zaitao LIANG (481)

On finite time ruin probability with random interest rate in a multi-risk model
..... Jinghai FENG, Lixin SONG, Linna YI (492)
