Research Articles

An experimental study of the turbulence quantities in the boundary layer and near-wake of an airfoil placed at upstream of a 90° bend	979
E. Farsimadan and M.R. Mokhtarzadeh-Dehghan	
Nucleate pool boiling heat transfer characteristics of TiO ₂ -water nanofluids at very low concentrations	992
A. Suriyawong and S. Wongwises	
Internal flow patterns on heat transfer characteristics of a closed-loop oscillating heat-pipe with check valves using ethanol and a silver nano-ethanol mixture	1000
N. Bhuwakietkumjohn and S. Rittidech	
A visualization study of the flow dynamics of a single round jet impinging on porous media	1008
R. Yakkatelli, Q. Wu and A.S. Fleischer	
Two-phase flow structure in dual discharges – Stereo PIV measurements	1016
W. Saleh, R.C. Bowden, I.G. Hassan and L. Kadem	
Experimental study of an air assisted mist generator	1029
S. Lal, A. Kushari, M. Gupta, J.C. Kapoor and S. Maji	
Experimental investigation of evaporative heat transfer characteristics at the 3-phase contact line	1036
K. Ibrahim, M.F. Abd Rabbo, T. Gambaryan-Roisman and P. Stephan	
A model for fluidized motion conveyor transporting fly ash	1042
S.K. Gupta, V.K. Agarwal and D. Mills	
Analysis of heat and mass transfer enhancement in porous material subjected to electric fields (effects of particle sizes and layered arrangement)	1049
C. Chakranbnd and P. Rattanadecho	
Effect of flow topology on the calculation of two-phase frictional multipliers in uniformly heated flow of R-134a in a rectangular duct	1057
P. Vassallo, W. Kevin Cope and W.C. Smith	
Application of an optimization method and experiment in inverse determination of interfacial heat transfer coefficients in the blade casting process	1068
W. Zhang, G. Xie and D. Zhang	
Mean flow structure in high aspect ratio microchannel flows	1077
J.R. Elsnab, D. Maynes, J.C. Klewicki and T.A. Ameel	
The basics and issues of Thermochromic Liquid Crystal Calibrations	1089
N. Abdullah, Abd.R. Abu Talib, A.A. Jaafar, M.A. Mohd Salleh and W.T. Chong	
Experimental study on evolution of joint velocity PDF in planar mixing layer	1122
C.-T. Li, K.-C. Chang and M.-R. Wang	
Heat transfer during condensation of HFC-134a and R-404A inside of a horizontal smooth and micro-fin tube	1133
S.N. Sapali and P.A. Patil	
Laser-saturated fluorescence of nitric oxide and chemiluminescence measurements in premixed ethanol flames	1142
C.S.T. Marques, L.G. Barreta, M.E. Sbampato and A.M. dos Santos	
Thermohydraulic investigation of turbulent flow through a round tube equipped with twisted tapes consisting of centre wings and alternate-axes	1151
S. Eiamsa-ard, K. Wongcharee, P. Eiamsa-ard and C. Thianpong	
Experimental investigation of convection heat transfer of CO ₂ at supercritical pressures in a vertical circular tube	1162
Z.-H. Li, P.-X. Jiang, C.-R. Zhao and Y. Zhang	
Heat transfer and pressure drop in hexagonal ducts with surface dimples	1172
S.W. Chang, K.F. Chiang and T.C. Chou	
Influence of geometry on liquid oxygen magnetohydrodynamics	1182
J.C. Boulware, H. Ban, S. Jensen and S. Wassom

(Continued from outside back cover)

An experimental study of the flow and heat transfer between enhanced heat transfer plates for PHEs	1194
X.-w. Li, J.-a. Meng and Z.-x. Li	
Determination of the integral characteristics of an asymmetrical thermal plume from air speed/velocity and temperature measurements	1205
D. Zukowska, Z. Popiolek and A. Melikov	
Two-phase gas-liquid flow characteristics inside a plate heat exchanger	1217
K. Nilpueng and S. Wongwises	
New correlation to predict the heat transfer coefficient in-tube cooling of supercritical CO ₂ in horizontal macro-tubes	1230
H.-K. Oh and C.-H. Son	
A thickness measurement technique based on low-coherence interferometry applied to a liquid film with thermal gradient	1242
N. Borgetto, C. Galizzi, F. André and D. Escudié	
Effect of ultrasound on frost formation on a cold flat surface in atmospheric air flow	1247
D. Li, Z. Chen and M. Shi	
Study of junction flows in louvered fin round tube heat exchangers using the dye injection technique	1253
H. Huisseune, C. T'Joel, P. De Jaeger, A. Willockx and M. De Paepe	
Experimental study on corrugated cross-flow air-cooled plate heat exchangers	1265
M. Kim, Y.-J. Baik, S.-R. Park, H.-S. Ra and H. Lim	
Heat transfer and hydrodynamics analysis of a novel dimpled tube	1273
Y. Wang, Y.-L. He, Y.-G. Lei and J. Zhang	
On the near-field flow structure and mode behaviors for the right-angle and sharp-edged orifice plane jet	1282
F.-B. Hsiao, Y.-C. Lim and J.-M. Huang	
Phenomena in oscillating downward propagating flames induced by external laser irradiation method	1290
J.S. Park, O. Fujita, T. Honko, Y. Yamada, H. Ito and Y. Nakamura	
Forced and mixed convection heat transfer to supercritical CO ₂ vertically flowing in a uniformly-heated circular tube	1295
Y.-Y. Baq, H.-Y. Kim and D.-J. Kang	
Single-phase flow and heat transfer in swirl microchannels	1309
Y. Xi, J. Yu, Y. Xie and H. Gao	
The discharge coefficient of effervescent atomizers	1316
M. Ochowiak, L. Broniarz-Press and J. Rozanski	
Two-phase flow characteristics in multiple orifice valves	1324
C. Alimonti, G. Falcone and O. Bello	
Experimental study on underwater acoustic imaging of 2-D temperature distribution around hot springs on floor of Lake Qiezishan, China	1334
W. Fan, Y. Chen, H. Pan, Y. Ye, Y. Cai and Z. Zhang	
Experimental study of the boiling mechanism of a liquid film flowing on the surface of a rotating disc	1346
D. Kolokotsa and S. Yanniotis	
Characterization of high-pressure water-mist sprays: Experimental analysis of droplet size and dispersion	1353
P.E. Santangelo	
A critical review of temperature separation in a vortex tube	1367
Y. Xue, M. Arjomandi and R. Kelso	
Bubble confinement in flow boiling of FC-72 in a "rectangular" microchannel of high aspect ratio	1375
J. Barber, D. Brutin, K. Sefiane and L. Tadrif	
Orthogonal wavelet decomposition of turbulent structures behind a vehicle external mirror	1389
A. Rinoshika and S. Watanabe	
Ring-shaped microchannel heat exchanger based on turning process	1398
Y. Tang, Z. He, M. Pan and J. Wang	
Experimental study on capillary pumping performance of porous wicks for loop heat pipe	1403
J. Li, Y. Zou and L. Cheng	
Experiments on the transient heat transfer of minichannel heat sink under high heat flux density in an enclosed loop	1409
Z. Zhou, X. Xu and X. Liang	
Operation characteristics of cylindrical miniature grooved heat pipe using aqueous CuO nanofluids	1415
G.-S. Wang, B. Song and Z.-H. Liu	
Some investigations on the enhancement of boiling heat transfer from planer surface embedded with continuous open tunnels	1422
A.K. Das, P.K. Das and P. Saha	

(Contents continued)

Experimental study on tribrachial flames in narrow channels with small fuel concentration gradients	1432
S.M. Cho, M.J. Lee and N.I. Kim	
Influence of sintering on deposit formation during pool boiling of calcium sulphate solutions	1439
M. Esawy, M.S. Abd-Elhady, M.R. Malayeri and H. Müller-Steinhagen	
Influence of wall conditions on friction factor for flow of gases under slip condition	1448
A. Demsis, S.V. Prabhu and A. Agrawal	
Experimental investigations on decay heat removal in advanced nuclear reactors using single heater rod test facility: Air alone in the annular gap	1456
S.B. Bopche and A. Sridharan	
Measuring air core characteristics of a pressure-swirl atomizer via a transparent acrylic nozzle at various Reynolds numbers	1475
E.J. Lee, S.Y. Oh, H.Y. Kim, S.C. James and S.S. Yoon	
Investigation on average void fraction for air/non-Newtonian power-law fluids two-phase flow in downward inclined pipes	1484
J.-y. Xu	
Small droplet formation in a pneumatic drop-on-demand generator: Experiments and analysis	1488
A. Amirzadeh and S. Chandra	
An experimental study on the motion, deformation and electrical charging of water drops falling in oil in the presence of high voltage D.C. electric field	1498
M. Jalaal, B. Khorshidi and E. Esmailzadeh	
Dependency of the thermal and electrical conductivity on the temperature and composition of Cu in the Al based Al-Cu alloys	1507
S. Aksöz, Y. Ocak, N. Maraşlı, E. Çadırli, H. Kaya and U. Büyük	
Acknowledgment of reviewers	I
