

Contents

Issue 1

List of reviewers	1
Articles	
Development of building energy asset rating using stock modelling in the USA <i>Na Wang, Supriya Goel, Atefe Makhmalbat and Nicholas Long</i>	4
Performance of a reversible heat pump/organic Rankine cycle unit coupled with a passive house to get a positive energy building <i>Olivier Dumont, Carolina Carmo, Valentin Fontaine, François Randaxhe, Sylvain Quoilin, Vincent Lemort, Brian Elmegaard and Mads P. Nielsen</i>	19
A Bayesian network model for the optimization of a chiller plant's condenser water set point <i>Sen Huang, Ana Carolina Laurini Malara, Wangda Zuo and Michael D. Sohn</i>	36
Validated air handling unit model using indirect evaporative cooling <i>F. Jorissen, W. Boydens and L. Helsen</i>	48
The reliability of inverse modelling for the wide scale characterization of the thermal properties of buildings <i>Alfonso P. Ramallo-González, Matthew Brown, Elizabeth Gabe-Thomas, Tom Lovett and David A. Coley</i>	65
TEASER: an open tool for urban energy modelling of building stocks <i>Peter Remmen, Moritz Lauster, Michael Mans, Marcus Fuchs, Tanja Osterhage and Dirk Müller</i>	84
Fast and self-learning indoor airflow simulation based on <i>in situ</i> adaptive tabulation <i>Wei Tian, Thomas Alonso Sevilla, Dan Li, Wangda Zuo and Michael Wetter</i>	99
A new local pressure loss coefficient model of a duct tee junction applied during transient simulation of a HVAC air-side system <i>Qiujian Wang, Yiqun Pan, Mingya Zhu, Zhizhong Huang and Peng Xu</i>	113

Issue 2

Articles	
Stable explicit schemes for simulation of nonlinear moisture transfer in porous materials <i>Suëten Gasparin, Julien Berger, Denys Dutykh and Nathan Mendes</i>	129
Multiscale modeling of in-room temperature distribution with human occupancy data: a practical case study <i>Yohei Kono, Yoshihiko Susuki, Mitsunori Hayashida, Igor Mezić and Takashi Hikiyara</i>	145
A multiple model approach for predictive control of indoor thermal environment with high resolution <i>Kangji Li, Xue Wenping, Chao Xu and Hanping Mao</i>	164
A multi-scale homogenization approach for the effective thermal conductivity of dry lime-hemp concrete <i>T. Nguyen-Sy, A.D. Tran-Le, T. Nguyen-Thoi and T. Langlet</i>	179
Experimental validation and model development for thermal transmittances of porous window screens and horizontal louvred blind systems <i>Robert Hart, Howdy Goudey and D. Charlie Curcija</i>	190
Simulation model to find the best comfort, energy and cost scenarios for building refurbishment <i>Antoni Fonseca i Casas, Joana Ortiz, Núria Garrido, Pau Fonseca and Jaume Salom</i>	205
Numerical estimation and sensitivity analysis of the energy demand for six industrial buildings in France <i>Matthieu Labat and Kévin Attonaty</i>	223
Scale-adaptive simulation of unsteady flow and dispersion around a model building: spectral and POD analyses <i>Mohammad Jadidi, Farzad Bazdidi-Tehrani and Mohsen Kiamansouri</i>	241
