### Issue 1

#### Articles

- A methodology for auto-calibrating urban building energy models using surrogate modeling techniques  
*Shreshth Nagpal, Caitlin Mueller, Arfa Aijazi and Christoph F. Reinhart* 1
- Solving nonlinear diffusive problems in buildings by means of a Spectral reduced-order model  
*Suelen Gasparin, Julien Berger, Denys Dutykh and Nathan Mendes* 17
- Development of an office tenant electricity use model and its application for right-sizing HVAC equipment  
*William O'Brien, Aly Abdelalim and H. Burak Gunay* 37
- Clustering a building stock towards representative buildings in the context of air-conditioning electricity demand flexibility  
*Dieter Patteeuw, Gregor P. Henze, Alessia Arteconi, Charles D. Corbin and Lieve Helsen* 56
- Rapid visualization of the potential residential cost savings from energy storage under time-of-use electric rates  
*Michael Lanahan, Sarah Engert, Taewoo Kim and Paulo Cesar Tabares-Velasco* 68
- Influence of error terms in Bayesian calibration of energy system models  
*Kathrin Menberg, Yeonsook Heo and Ruchi Choudhary* 82
- Large eddy simulation of thermal stratification effect on convective and turbulent diffusion fluxes concerning gaseous pollutant dispersion around a high-rise model building  
*Farzad Bazdidi-Tehrani, Payam Gholamalipour, Mohsen Kiamansourin and Mohammad Jadidi* 97

### Issue 2

#### Articles

- Investigation of maximum cooling loss in a piping network using Bayesian Markov Chain Monte Carlo method  
*Pei Huang, Godfried Augenbroe, Gongsheng Huang and Yongjun Sun* 117
- Convection at the indoor side of complex fenestration systems: the ASHWAT model revisited  
*Sepehr Ferooshani, John Wright and David Naylor* 133
- Semantics for assembling modular components in a scalable building performance simulation  
*Matthias Mitterhofer, Georg Ferdinand Schneider, Sebastian Stratbücker and Simone Steiger* 145
- A cross analysis of existing methods for modelling household appliance use  
*Y. Yamaguchi, S. Yilmaz, N. Prakash, S. K. Firth and Y. Shimoda* 160
- TACO, an automated toolchain for model predictive control of building systems: implementation and verification  
*F. Jorissen, W. Boydens and L. Helsen* 180
- Advanced machine learning techniques for building performance simulation: a comparative analysis  
*Debaditya Chakraborty and Hazem Elzarka* 193
- Innovative low-energy evaporative cooling system for buildings: study of the porous evaporator wall  
*Guilian Leroux, Nathan Mendes, Louis Stephan, Nolwenn Le Pierrès and Etienne Wurtz* 208
- Comparison between two genetic algorithms minimizing carbon footprint of energy and materials in a residential building  
*Richard Gagnon, Louis Gosselin, Sumeet Park, Sebastian Stratbücker and Stéphanie Decker* 224
