Special Issue: Selected papers from the 7th International Conference on the Foundations of Computer-Aided Process Design (FOCAPD, 2009), Breckenridge, Colorado, USA

- | | |
|--|--|
| A.A. Linninger and M.M. El-Halwagi | 1321 Preface |
| | <i>I. Energy systems design and alternative energy sources</i> |
| A.E. Eltayeb, O. Khalil, S. Al-Hallaj and F. Teymour | 1323 Design and modeling of optical modules for use in the "Emerald Forest" algae photobioreactors |
| C. Panos, K.I. Kouramas, M.C. Georgiadis and E.N. Pistikopoulos | 1341 Dynamic optimization and robust explicit model predictive control of hydrogen storage tank |
| U.M. Diwekar and Y.N. Shastri | <i>II. Design for sustainability and energy efficiency</i> |
| D. Lu and M.J. Realf | 1348 Green process design, green energy, and sustainability: A systems analysis perspective |
| I.E. Grossmann and G. Guillén-Gosálbez | 1356 Point-based standard optimization with life cycle assessment for product design |
| Y. Zhu, S. Legg and C.D. Laird | <i>III. Robust and uncertain systems</i> |
| G. Sin, A.S. Meyer and K.V. Gernaey | 1365 Scope for the application of mathematical programming techniques in the synthesis and planning of sustainable processes |
| J. Regalbuto | 1377 Optimal design of cryogenic air separation columns under uncertainty |
| | 1385 Assessing reliability of cellulose hydrolysis models to support biofuel process design—Identifiability and uncertainty analysis |
| | <i>IV. Design of biofuels biological process and biorefineries</i> |
| | 1393 An NSF perspective on next generation hydrocarbon biorefineries |

A.C. Kokossis and A. Yang	1397	On the use of systems technologies and a systematic approach for the synthesis and the design of future biorefineries
L.D. Simoni, A. Chapeaux, J.F. Brennecke and M.A. Stadtherr	1406	Extraction of biofuels and biofeedstocks from aqueous solutions using ionic liquids
<i>V. Emerging technologies and processes for the environment</i>		
R.A. Urban, B.R. Bakshi, G.F. Grubb, A. Baral and W.J. Mitsch	1413	Towards sustainability of engineered processes: Designing self-reliant networks of technological-ecological systems
T.E. Marlin	1421	Teaching "operability" in undergraduate chemical engineering design education
<i>VI. Multi-scale and complex systems</i>		
R. Misener, C.E. Gounaris and C.A. Floudas	1432	Mathematical modeling and global optimization of large-scale extended pooling problems with the (EPA) complex emissions constraints
S.S. Jogwar, M. Baldea and P. Daoutidis	1457	Tight energy integration: Dynamic impact and control advantages
A. Lucia	1467	Multi-scale methods and complex processes: A survey and look ahead
<i>VII. Product and process design I</i>		
S.E. McLeese, J.C. Eslick, N.J. Hoffmann, A.M. Scurto and K.V. Camarda	1476	Design of ionic liquids via computational molecular design
S. Bommareddy, N.G. Chemmangattuvalappil, C.C. Solvason and M.R. Eden	1481	Simultaneous solution of process and molecular design problems using an algebraic approach
<i>VIII. Product and process design II</i>		
D. Hildebrandt, D.A. Beneke, R. Abbas, S.T. Holland, M. Vrey and D. Glasser	1487	Column profile maps as a tool for synthesizing complex column configurations
B. Mansoornejad, V. Chambost and P. Stuart	1497	Integrating product portfolio design and supply chain design for the forest biorefinery
M. Hechinger and W. Marquardt	1507	Targeted QSPR for the prediction of the laminar burning velocity of biofuels
<i>IX. Emerging tools and techniques in process design</i>		
I. Banerjee, S. Pal and S. Maiti	1515	Computationally efficient black-box modeling for feasibility analysis
C.-L. Chen, S.-W. Hung and J.-Y. Lee	1522	Design of inter-plant water network with central and decentralized water mains
S.E. Zitney	1532	Process/equipment co-simulation for design and analysis of advanced energy systems
H.A. Preisig	1543	Constructing and maintaining proper process models
G.J. Ruiz, S.B. Kim, J. Moon, L. Zhang and A.A. Linninger	1556	Design and optimization of energy efficient complex separation networks
