Special Issue: 10th International Symposium on Process Systems Engineering, Salvador, Bahia, Brasil, 16–20 August 2009

R.M.B. Alves, C.A.O. Nascimento and E.C. Biscaia	1907	Preface
M. Hechinger, A. Voll and W. Marquardt	1909	Towards an integrated design of biofuels and the production pathways
S. Terrazas-Moreno, I.E. Grossmann, J.M. Wassick and S.J. Bury	1919	Optimal design of reliable integrated chemical produ tion sites
L.A. Alvarez and D. Odloak	1937	Robust integration of real time optimization with line model predictive control
J.J. Liu, C.Y. Ma, Y.D. Hu and X.Z. Wang	1945	Effect of seed loading and cooling rate on crystal size a shape distributions in protein crystallization—A stu using morphological population balance simulation
A.F. Hernandez and M.A. Grover	1953	Stochastic dynamic predictions using Gaussian proce models for nanoparticle synthesis
A.E. Bresciani, C.F.X. Mendonça, R.M.B. Alves and C.A.O. Nascimento	1962	Modeling the kinetics of the coalescence of wat droplets in crude oil emulsions subject to an electr field, with the cellular automata technique
A. Küpper, L. Wirsching, M. Diehl, J.P. Schlöder, H.G. Bock and S. Engell	1969	Online identification of adsorption isotherms in SM processes via efficient moving horizon state a parameter estimation
J.L. Favero, A.R. Secchi, N.S.M. Cardozo and H. Jasak	1984	Viscoelastic fluid analysis in internal and in fr surface flows using the software OpenFOAM
A. Ferrari, S. Gutierrez and E.C. Biscaia Jr.	1994	Development of an optimal operation strategy in sequential batch reactor (SBR) through mixed-integ particle swarm dynamic optimization (PSO)
G. De Souza, D. Odloak and A.C. Zanin	1999	Real time optimization (RTO) with model predicti control (MPC)

ISSN 0098-13

doi:10.1016/S0098-1354(10)00325-X

J. Nishiguchi and T. Takai	2007	IPL2 and 3 performance improvement method fc process safety using event correlation analysis
M.S. Reis and A. Bauer	2014	Image-based classification of paper surface qualit using wavelet texture analysis
F. Corona, M. Mulas, R. Baratti and J.A. Romagnoli	2022	On the topological modeling and analysis of industri process data using the SOM
M. Gassner and F. Maréchal	2033	Combined mass and energy integration in proces design at the example of membrane-based gas separatio systems
M. Alvarado-Morales, M.K.A. Hamid, G. Sin, K.V. Gernaey, J.M. Woodley and R. Gani	2043	A model-based methodology for simultaneous desig and control of a bioethanol production process
N.G. Chemmangattuvalappil, C.C. Solvason, S. Bommareddy and M.R. Eden	2062	Reverse problem formulation approach to molecula design using property operators based on signatur descriptors
S. Ochoa, G. Wozny and J.-U. Repke	2072	A new algorithm for global optimization: Molecular Inspired Parallel Tempering
R.S. Kamath, L.T. Biegler and I.E. Grossmann	2085	An equation-oriented approach for handling thermo dynamics based on cubic equation of state in proces optimization
L.F. Domínguez and E.N. Pistikopoulos	2097	Multiparametric programming based algorithms fo pure integer and mixed-integer bilevel programmin problems
J.M. Laínez, G.V. Reklaitis and L. Puigjaner	2107	Linking marketing and supply chain models for improve business strategic decision support
J. Li, I.A. Karimi and R. Srinivasan	2118	Efficient bulk maritime logistics for the supply an delivery of multiple chemicals
J.M. Novas and G.P. Henning	2129	Reactive scheduling framework based on domai knowledge and constraint programming
