

CONTENTS

Issue 5

Articles

- Sensitivity analysis of feedback control for concrete core activation and impact on installed thermal production power
Maarten Sourbron and Lieve Helsen 309
Signature analysis calibration of a school energy model using hourly data
Alaa-Eldin Kandil and James A. Love 326
Trial application of ASHRAE 1051-RP: calibration method for building energy simulation
Michael J. Gestwick and James A. Love 346
Acoustic evaluation of the cathedral of Seville as a concert hall and proposals for improving the acoustic quality perceived by listeners
Alicia Alonso, Juan J. Sendra, Rafael Suárez and Teófilo Zamarreño 360
Simulation efficiency and accuracy of different moisture transfer potentials
Hans Janssen 379

Issue 6

Articles

- Analysis and improvement of the representativeness of EN ISO 15927-4 reference years for building energy simulation
Giovanni Pernigotto, Alessandro Prada, Andrea Gasparella and Jan L.M. Hensen 391
A methodology for identifying the influence of design variations on building energy performance
Scott Bucking, Radu Zmeureanu and Andreas Athienitis 411
Stochastic control optimization for a mixed mode building considering occupant window opening behaviour
Ryan A. Tanner and Gregor P. Henze 427
Optimized transmission line matrix model implementation for graphics processing units computing in built-up environment
Gwenaël Guillaume and Nicolas Fortin 445
Coupling stochastic occupant models to building performance simulation using the discrete event system specification formalism
H. Burak Gunay, William O'Brien, Ian Beausoleil-Morrison, Rhys Goldstein, Simon Breslav and Azam Khan 457
