Vol. 36 No. 8 Aug. 2015 (Monthly)

Nonlinear dynamics of axially moving viscoelastic Timoshenko beam under parametric and external excitations	(971)
Qiaoyun YAN, Hu DING, Liqun CHEN	
Nonlinear dynamic singularity analysis of two interconnected synchronous generator system with 1:3 internal resonance and principal parametric resonance	(985)
Xiaodong WANG, Yushu CHEN, Lei HOU	
Theoretical analysis on quasi-static lateral compression of elliptical tube between two rigid plates	(1005)
Ruirui LIU, Haibo WANG, Jialing YANG, Hua LIU, Yuxin SUN	
Stability and local bifurcation of parameter-excited vibration of pipes conveying pulsating fluid under thermal loading	(1017)
Demin ZHAO, Jianlin LIU, C. Q. WU	
Nonlinear vibration analysis of laminated composite Mindlin micro/nano-plates resting on orthotropic Pasternak medium using DQM	(1033)
A. G. ARANI, G. S. JAFARI	
Propagation, reflection, and transmission of SH-waves in slightly compressible, finitely deformed elastic media	(1045)
M. CHATTERJEE, A. CHATTOPADHYAY	
Optimal transient growth in turbulent pipe flow	(1057)
Yang SONG, Chunxiao XU, Weixi HUANG, Guixiang CUI	
Direct spectral domain decomposition method for 2D incompressible Navier-Stokes equations	(1073)
Benwen LI, Shangshang CHEN	
Mixed convection boundary layer flow past vertical flat plate in nanofluid: case of prescribed wall heat flux	(1091)
R. TRİMBİTAŞ, T. GROSAN, I. POP	
Exact solutions to drift-flux multiphase flow models through Lie group symmetry analysis	(1105)
B. BIRA, T. R. SEKHAR
