

# CONTENTS

Commenced in May 1980

Vol. 37 No. 1 Jan. 2016 (Monthly)

Constrained Hamilton variational principle for shallow water problems and Zu-class symplectic algorithm .....	(1)
Feng WU, Wanxie ZHONG	
Fluid-structure interaction simulation of three-dimensional flexible hydrofoil in water tunnel .....	(15)
Shiliang HU, Chuanjing LU, Yousheng HE	
Stability analysis method considering non-parallelism: EPSE method and its application .....	(27)
Gaotong YU, Jun GAO, Jisheng LUO	
Fully developed forced convection through semi-elliptic ducts .....	(37)
R. ALASSAR	
Numerical investigation of viscous fingering in Hele-Shaw cell with spatially periodic variation of depth .....	(45)
Jiangping HU, Bofu WANG, Dejun SUN	
Finite depth Stokes' first problem of thixotropic fluid .....	(59)
Wenwen LIU, Jie PENG, Keqin ZHU	
Numerical investigation of transonic flow over deformable airfoil with plunging motion .....	(75)
N. NEKOUBIN, M. R. H. NOBARI	
Compressible closure models for turbulent multifluid mixing .....	(97)
H. JIN	
Aeroelastic dynamics stability of rotating sandwich annular plate with viscoelastic core layer .....	(107)
Xingzhe WANG, Longfei LI, Youhe ZHOU	
Decoupling coefficients of dilatational wave for Biot's dynamic equation and its Green's functions in frequency domain .....	(121)
Boyang DING, A. H. D. CHENG, Zhanglong CHEN
