

CONTENTS

Commenced in May 1980

Vol. 31 No. 8 Aug. 2010 (Monthly)

- Formation of radially expanding liquid sheet by impinging two round jets(937)
Zhi-liang WANG (王志亮), S. P. LIN, Zhe-wei ZHOU (周哲玮)
- Hydraulic calculation of steady uniform flows in trapezoidal compound open channels(947)
Yu-hong ZENG (曾玉红), Yue-hua WANG (王月华), Wen-xin HUAI (槐文信)
- Visco-elastic fluid flow past an infinite vertical porous plate in the presence of first-order
chemical reaction(955)
R. A. DAMSEH, B. A. SHANNAK
- Effect of thermal conductivity on heat transfer for a power-law non-Newtonian fluid over
a continuous stretched surface with various injection parameters(963)
F. A. SALAMA
- Effects of induced magnetic field on peristaltic flow of Johnson-Segalman fluid in a vertical
symmetric channel(969)
S. NADEEM, N. S. AKBAR
- The effects of variable specific heat on the stability of hypersonic boundary layer on
a flat plate(979)
Wen-li JIA (贾文利), Wei CAO (曹伟)
- First-order gradient damage theory(987)
Bing ZHAO (赵冰), Ying-ren ZHENG (郑颖人), Ming-hua ZENG (曾明华),
Xue-song TANG (唐雪松), Xiao-gang LI (李小纲)
- Dynamic and quasi-static bending of saturated proelastic Timoshenko cantilever beam(995)
Xiao YANG (杨骁), Qun WEN (文群)
- Generalized passivity-based chaos synchronization(1009)
C. K. AHN
- Singularity analysis of Duffing-van der Pol system with two bifurcation parameters under
multi-frequency excitations(1019)
Zhao-hong QIN (秦朝红), Yu-shu CHEN (陈予恕)
- A class of boundary value problems for third-order differential equation with
a turning point(1027)
Jia-qi MO (莫嘉琪), Zhao-hui WEN (温朝晖)
- Almost sure stability condition of weakly coupled linear nonautonomous random systems(1033)
T. W. MA
- Eigenfunction expansion method and its application to two-dimensional elasticity
problems based on stress formulation(1039)
Jun-jie HUANG (黄俊杰), Alatanjang (阿拉坦仓), Hua WANG (王华)
